I can work with languages	I can work with people	I can make more money than the average person	I can do practical work and I do not have to study theories	I can study for a number of years and face intellectual challenges	Minimum or no qualifications are required	I can work for myself
I can work flexible hours	I can entertain people	I can work internationally	I can determine my own income	I am very interested in a specific subject or field	I can progress in the business world	I do not have to struggle with finding vacancies
I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours	I like to work with nature	I like to work with animals	I like to be physical active

Geohydrologist			
General Information			
Description – what is this occupation?			
The geohydrologist investigates the occurrence and exploitation of groundwater in different geological formations.			
Typical Job Activities – what will I do in this occupation?			
A geohydrologist studies: - the characteristics and distribution of natural underground reservoirs - their water storing capacity - the movement of water through them - the consequences of withdrawal of water for human consumption - replenishment during precipitation. A geohydrologist also locates the positions of waste-disposal dumps and evaluates ground water pollution. Underground water is an important resource in South Africa and the geohydrologist offers expert advice to users. The job of geohydrologist involves both office and fieldwork.			
Related Occupations – which occupations are more or less the same?			
- Ecologist - Geographer - Geohydrological technician - Hydrologist (surface water) - Oceanographer			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption. COMPULSORY SUBJECTS: Mathematics, Physical Science RECOMMENDED SUBJECTS: Biology, Geography			
Entry to Work Place			
UNIVERSITY: BSc degree. Post-graduate study: BSc Honours degree with appropriate subjects. ADDITIONAL REQUIREMENTS: Preference is given to a candidate with qualifications that include courses in Geohydrology, a BSc Honours degree in Geohydrology and specialist training such as Applied Geophysics.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low

A geohydrologist should: - be observant and objective; - have problem solving skills; - be flexible and adapt easily to new situations; - communicate clearly in writing and in speech; - be responsible; - be dedicated to his work; - love nature; - enjoy travelling; - have good health and stamina.				
Employment Indicators – what are the important employment facts regarding this occupation				
Employment Opportunities in South Africa for this Career				
Exceptionally High	High	Moderate	Low	
Supply of People The number of people with the qualifications, skills (able to do it) or interest in this career, that I have to compete with				
Exceptionally High number of people	High number of people	Moderate number of people	Low number of people	
Income Potential Estimated average income for people in this occupation (excluding extreme examples of high or low income):				
R300 000+per year	R144 000 - R300 000	R60 000 - R144 000	R 60 000 per year	
Income based on Performance What is the chance to improve my pay in this occupation through exceptional performance, skills or business ideas?				
Exceptionally High	High	Moderate	Low	
Self Employment Can I use this career to work for myself or to start a small company in this career field?				
Exceptionally High	High	Moderate	Low	
General Management Opportunities What is the potential to use this occupation as a platform to become a general manager in a medium to big company or organisation?				
Exceptionally High	High	Moderate	Low	
International Employment Market What is the chance of being able to use this career's qualifications and skills in the international labour market?				
Exceptionally High	High	Moderate	Low	
Possible Employers – where do I find this occupation?				
Government (national, provincial, local councils and government related organisations like universities, semi-government, etc.	Big private companies	Medium or small companies	Own small business: Entrepreneurial opportunities in this field	Self-employed: Contractor, consultant, own practise, freelance
- Department of Water Affairs and Forestry - CSIR - Municipalities - Universities The experienced geohydrologist can open his own businesses. This can be particularly successful if done in collaboration with an engineering firm.				
Relevant Contact Details – where can I get more information on this occupation?				

Career Progress and Path						
Activities to enhance career progress – what can I do to improve my career progress in this occupation?						
Further Studies in the specific career field	Further studies in related fields	Experience in specific field	Work performance	Work performance	Do presentations, seminars, publish articles, etc.	General management studies
Possible career paths – which kind of career path can I follow in this occupation?						
Specialist career in the specific field	Management positions in the specific field	Management positions in related fields	General business management	Executive positions	Consultant/ contractor/ own practice/ freelance	Own business
Employment Stability						
Is the demand (the need) for this particular skills stable over the years?						
Exceptionally Stable		Very stable		Moderately stable		Not very stable
The need for people in this occupation and with these skills is influenced by:						
Government policy and legislation		Government strategy and activities			The growth of private companies (big and small)	
Technology		Direct consumer demands – “man in the street”			My own performance and skills	
Possible reasons to consider this career – I should consider this career if I want a job where:						
The need is determined by government	The need is determined by the consumers	The need is determined by private companies	The need is determined by new technology	I can start a business in this field or with these skills	The job is fairly stable	The job is ideal for becoming a general manager
I can be of service to people	I can work with my hands	I can design things	I can repair things	I can work with technology	I can create new things	I'll be able to learn new things on an ongoing basis
I can work with languages	I can work with people	I can make more money than the average person	I can do practical work and I do not have to study theories	I can study for a number of years and face intellectual challenges	Minimum or no qualifications are required	I can work for myself
I can work flexible hours	I can entertain people	I can work internationally	I can determine my own income	I am very interested in a specific subject or field	I can progress in the business world	I do not have to struggle with finding vacancies
I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours	I like to work with nature	I like to work with animals	I like to be physical active

Geologist			
General Information			
Description – what is this occupation?			
Geology is the study of the structure, composition and history of the earth.			
Typical Job Activities – what will I do in this occupation?			
The geologist locates and obtains specimens to investigate by drilling and collecting samples. The physical and chemical properties of the samples are then examined in a laboratory. When this is completed, the geologist writes a report on the results of the investigations. Geological research may help in locating mineral deposits, predicting earthquakes, and advising on the suitability of sites for buildings, dams and highways. The knowledge obtained is also used in a wide variety of ways - from the plastering on walls of buildings (where lime and other mixtures are used), to the discovery and refinement of oil and other energy sources. Geology is a very broad-based science which draws from virtually every other science including natural, engineering and economic sciences. We can distinguish between different careers within geology: - cartographer - economic geologist - environmental geologist - engineering geologist - geochemist - geotechnologist - geohydrologist - geophysicist - mineralogist - mining geologist - palaeontologist - petroleum geologist. NOTE: Use the alphabetical list to locate information on the above-mentioned careers.			
Related Occupations – which occupations are more or less the same?			
- Agricultural meteorologist - Agronomist - Chemist - Ecologist - Geographer - Geophysicist - Hydrogeologist - Hydrographic surveyor - Metallurgist - Meteorologist - Mineralogist - Nuclear physicist - Oceanographer - Physicist			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training

Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption for a degree course. Senior Certificate for a diploma course. COMPULSORY SUBJECTS: Mathematics, Physical Science RECOMMENDED SUBJECTS: Biology, Geography, Economics			
Entry to Work Place			
The honours degree is regarded as the minimum qualification for entry into the profession. Postgraduate study (for Masters and Doctors degrees) is possible at most South African universities. REGISTRATION: To register as a professional scientist with the South African Council for Natural Scientists, a minimum qualification of a BSc (Hons) degree is required. REGISTRATION: A student studying at a technikon registers as a geotechnologist who works closely with the geologist in various fields.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A geologist should: - be curious and imaginative; - be observant and objective; - be able to visualise things in three dimensions; - have problem solving skills; - enjoy working with others; - be flexible and adapt easily to new situations; - communicate clearly in writing and in speech; - be responsible; - be dedicated to his work; - love nature; - enjoy travelling; - have good health and stamina.

Geophysicist			
General Information			
Description – what is this occupation?			
The geophysicist studies the earth's physical features including its atmosphere and hydrosphere			
Typical Job Activities – what will I do in this occupation?			
As a geophysicist, you will examine and measure seismic, gravitational, electrical, thermal and magnetic forces, using the principles of physics, mathematics and chemistry. You will compile and analyse the data to: - compute the earth's shape - estimate its composition and the structure of its interior - determine the flow patterns of ocean tides and currents - help locate petroleum and mineral deposits - prepare navigational charts and maps - predict atmospheric conditions - prepare environmental reports - establish water supply and flood-control programmes. The geophysicist also investigates the origin and activity of volcanoes, glaciers and earthquakes, and studies other planets. Solid earth, fluid earth and the upper atmosphere are three general fields of study for geophysicists. Geophysics is connected to a number of techniques which can be employed to solve a specific problem. The most important of these are the gravity technique, the magnetic method, seismic techniques, electric and electromagnetic methods and radiomagnetic methods.			
Related Occupations – which occupations are more or less the same?			
- Agricultural chemist - Agricultural scientist - Agronomist - Algologist - Astronomer - Biophysicist - Chemist - Ecologist - Geochemist - Geographer - Geohydrologist - Geologist - Metallurgist - Meteorologist - Mineralogist - Oceanographer - Palaeontologist - Physicist			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption. COMPULSORY SUBJECTS: Mathematics, Physical Science RECOMMENDED SUBJECTS: Geography			

Entry to Work Place			
UNIVERSITY: BSc degree with appropriate subjects. Post graduate study: The entry requirement for this career is a BSc(Hons) in Geophysics or Physics.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A geophysicist should: - be curious; - think analytical; - have mathematical ability; - be able to communicate well both in speech and in writing; - be able to work as part of a team; - have good health; - enjoy working outside and away from home.

I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours	I like to work with nature	I like to work with animals	I like to be physical active

Geotechnologist			
General Information			
Description – what is this occupation?			
The geotechnologist conducts research on and in the crust of the earth:			
Typical Job Activities – what will I do in this occupation?			
The geotechnologist conducts research on and in the crust of the earth to: - locate and extract natural resources - determine subsurface conditions - locate building materials. Each aspect of this challenging career is highly complex. The geotechnologist therefore needs to specialise in a particular field: - Geophysics: The technologist specialising in geophysics uses sophisticated instruments to ascertain conditions in the sub-surface of the earth, to find underground water and ores and to establish bedrock conditions for large constructions. - Geohydrology: A geohydrology technologist uses geophysical techniques to locate sources of underground water and to establish the quality of this water. - Engineering geology: These technologists conduct geological investigations into the sub-surface of the earth to provide the constructors of large construction projects (dams, bridges and tunnels) with sufficient information to design firm and safe foundations. They also locate building material for construction projects. - Geochemistry: This involves the analysis of rocks, soil and water with the use of electron microscopes, x-ray diffractometers and spectrographs. Geologists use the results to make decisions. - Mining geotechnology: Mining companies employ a geotechnologist to assist them to pinpoint the location of ores and also to investigate underground conditions on a regular basis to establish the existence of potentially hazardous mining conditions. - Exploration geotechnology: Exploration geotechnologists work with a team of scientists to locate new mineral resources for the purpose of mining or quarrying. They also try to find new water resources.			
Related Occupations – which occupations are more or less the same?			
- Cartographer - Civil engineering technologist - Engineering geologist - Extraction metallurgist - Geophysicist - Land surveyor - Mining engineer - Mine surveyor - Soil scientist			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training

Entry to Tertiary or Further Studies			
Senior Certificate. COMPULSORY SUBJECTS: Mathematics, Physical Science RECOMMENDED SUBJECTS: Geography			
Entry to Work Place			
TECHNIKON: After obtaining the NDip the candidate can be appointed as geotechnician. Advanced training: A BTech degree is necessary for appointment as geotechnologist. Further study to obtain a MTech and DTech degree is recommended.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A geotechnologist should: - have mathematical and scientific aptitude; - have good observational and analytical skills; - have good eyesight; - be interested in the natural physical environment; - be practical; - work outdoors in all weather conditions.

Glass-blower			
General Information			
Description – what is this occupation?			
Glass-blowers shape glassware from gobs of molten glass. They use a blow-pipe, producing anything from unique tableware to scientific equipment.			
Typical Job Activities – what will I do in this occupation?			
Glass dates back many years. It is believed that the first major breakthrough in glassware took place around 200 BC, when hot air was blown into molten glass. Glass-makers spread the news quickly and soon other people were making blown-glass objects. In the 20th century, scientists had a breakthrough that helped them understand the properties of glass. Many new types of glass, such as laminated glass, heat resin glass and glass fabrics were developed. Some glass-blowers shape and attach hot glass to other objects forming pedestals and handles.			
Related Occupations – which occupations are more or less the same?			
- Glass instrument-maker - Stained glass artist			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 9 Certificate.			
Entry to Work Place			
A certificate in Art at Technical(FET) Colleges. In service training may be provided under the supervision of an experienced glass-blower.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A glass-blower should: - be artistic; - be creative; - be ambitious.

Goldsmith and Jeweller			
General Information			
Description – what is this occupation?			
A goldsmith and a jeweller are trained craftsmen who design and manufacture jewellery.			
Typical Job Activities – what will I do in this occupation?			
They use metals such as gold, silver or platinum and precious and semi-precious stones. Craftwork production entails the making of individual articles by hand by skilled craftsmen whereas mass production entails the use of moulds and machines to produce articles. The goldsmith and jeweller make and repair rings, necklaces, earrings and other jewellery. They make moulds to cast mass-produced jewellery or dies to stamp it and carry out the finishing work, such as setting stones and engraving. Typical alterations and repair jobs involve enlarging or reducing the size of rings, resetting stones and replacing broken clasps and mountings. A jeweller may also repair watches and do hand-engraving. A qualified gemmologist appraises precious and semi-precious stones.			
Related Occupations – which occupations are more or less the same?			
- Diamond industry worker - Gemmologist - Instrument maker - Optical technician - Optical dispenser - Watchmaker			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption for a degree course. Senior Certificate for a diploma course. Grade 9 Certificate for an apprenticeship. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Art			

Entry to Work Place			
APPRENTICESHIP TRAINING: If you want to become a goldsmith and jeweller you need to register with an employer providing suitable training. Training consists of theoretical and practical work: - Theoretical training: At a technical(FET) college or a correspondence course at Technisa. - Practical training: In-service training under supervision of a qualified tradesman. - Duration of course: 3 years depending on the experience of the candidate and his qualifications prior to the apprenticeship. - Final examination: A compulsory trade test set by the Department of Labour to qualify as an artisan. Apprenticeships can be followed in the following trades: - Precious Metal Moulding and Mounting - Diamond and Jewel Setting and Engraving Additional requirements: If you want to become a goldsmith and jeweller you must be at least 16 years old. Note: Changes in the training of artisans are subject to the official approval of the Registrar of Labour Training. A new system of apprenticeship training will be introduced within the next few years. Each industry will make use of its own methods and time to implement the system. IN-SERVICE TRAINING: Short part-time courses in Jewellery Design and Manufacture are offered by privately run operations.

I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours	I like to work with nature	I like to work with animals	I like to be physical active

Golf Caddie			
General Information			
Description – what is this occupation?			
A golf caddie carries golf bags, or pulls the cart that holds golf bags, around the course for players.			
Typical Job Activities – what will I do in this occupation?			
The golf caddie advises players, if asked to do so, on the selection of the proper club for the stroke or peculiarities of the golf course. You will also locate driven balls and hold the marker out of the cup while players putt. A top-notch or professional golfer often requires a caddie who is an excellent golfer himself and whom he knows and trusts. The work of a golf caddie can be done on a part-time or full-time basis.			
Related Occupations – which occupations are more or less the same?			
- Baggage porter - Cargo controller - Courier - Hospital porter - Light delivery van driver - Mail handler			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
No specific requirements. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: None			
Entry to Work Place			
IN-SERVICE TRAINING: A caddy supervisor usually offers training in basic caddying services. The golf caddie becomes excellent at his job through on-the-job experience at caddying and through professional training and practice to improve his own golf game.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A golf caddie should: - have a keen interest in golf; - be physically fit and healthy; - be reliable and honest; - have integrity; - be friendly.

Grain Grader			
General Information			
Description – what is this occupation?			
The grain grader is responsible for the grading, storage and distribution of grain.			
Typical Job Activities – what will I do in this occupation?			
Grain is marketed according to its class and grade. The grain grader has to grade representative samples of all grain deliveries in respect of: - moisture - siftings - hectolitre mass - insufficient and harmful seeds - grains infected with mould, foreign materials and grain insects. The grader will reject the load of grain if it is found to be inferior. You will sort the loads of grain that are accepted into different classes and grades and supervise the storage of the grain, ensuring that the different grades and classes are stored separately. The grain grader is also responsible for the fumigation and hygiene of the grain silo and the various administrative tasks related to running the silo.			
Related Occupations – which occupations are more or less the same?			
- Agricultural extension officer - Baker - Farmer - Farm worker - Quality control inspector - Wool-classer

Guesthouse Manager/Owner			
General Information			
Description – what is this occupation?			
Tourism is currently the fastest growing industry in South Africa. Especially overseas tourists find South Africa sunny, interesting and affordable.			
Typical Job Activities – what will I do in this occupation?			
Guesthouse accommodation is high in demand these days due to the personal touch, informal atmosphere and general availability thereof. The guesthouse manager (often also the owner) has to fulfil different roles and perform duties such as: - Administration: Making of bookings, managing of finances, ordering of supplies, etc. - Maintenance: Upkeep of the interior and exterior of the guesthouse, managing domestic workers and gardeners. - Planning of meals: Developing menus, estimating food quantities and costs, purchasing food supplies, preparing food and supervising kitchen helpers. - Providing of information on tourist attractions in the vicinity as well as safety precautions. The guesthouse manager works with tourists of different cultures and traditions from all over the world and must therefore be able to keep different needs and requirements in mind.			
Related Occupations – which occupations are more or less the same?			
- Baker - Caterer - Chef - Dietician - Home economist - Home economist teacher - Hotel manager			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption for a degree course. Senior Certificate for a diploma course. COMPULSORY SUBJECTS: English RECOMMENDED SUBJECTS: Home Economics, Mathematics, Physical Science, Foreign Languages, Hotelkeeping and Catering, Travel and Tourism			

Entry to Work Place			
No specific training is required to manage a guesthouse. The following courses can provide suitable background: HOTEL AND CATERING INDUSTRY TRAINING COUNCIL (HCTC): Hotel management (3 years). Commercial catering and restaurant management (CBMT). IR course for middle management. Professional cookery (3 years). COOKING SCHOOLS: Several cooking schools offer appropriate training during one to three year courses. It is important for the student to know where his talent lies. This is because some schools focus on innovative cooking skills, whereas others offer a more rounded approach to cooking, service and catering management.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A guesthouse manager should: - be able to work with all kinds of people; - have good communication skills; - be very versatile; - have a knowledge of South Africa's places of interest, geography, its unique history, politics and flora and fauna; - have organisational skills; - be able to deal with unexpected situations.

Guide Dog Trainer			
General Information			
Description – what is this occupation?			
Guide dog trainers train dogs to guide people who are partially or wholly visually impaired (blind). After training a guide dog, they need to teach the blind person how to use the dog.			
Typical Job Activities – what will I do in this occupation?			
Guide dog trainers choose a team of twelve month old puppies - usually eight - for training. The pups are put through a training programme and then assessed over a period of four to six months. The guide dog trainer then trains each dog to guide a visually impaired person, making the dog used to all kinds of places and work or living conditions. This training lasts for up to six weeks. People trained at the guide dog centre usually get an extra three to five day follow up instruction after they return home. Guide dog trainers need to be physically healthy, strong and free from leg, muscular, skeletal or foot disorders because young dogs often get excited, especially when they just begin training and may jump all over the trainee.

Gunsmith			
General Information			
Description – what is this occupation?			
Gunsmiths use hand-tools and machines to repair, build and modify fire-arms according to customer specifications and blueprint orders.			
Typical Job Activities – what will I do in this occupation?			
Hand-guns and long-guns consist of three basic elements: stock barrel and firing mechanism. The pieces are usually made by a parts manufacturer, but a gunsmith may make pieces to restore antique guns or for special custom-made guns. Gunsmiths protect and treat the metal pieces of a firearm. This process is called "bluing". They first strip the old finish from the barrel and then place the metal parts in bluing salt bath. This gives the metal a bluish colour and a rust resistant surface. Some gunsmiths send their guns to such specialised gunsmiths. Gunsmiths also cut new rifling into barrels of small firearms with a broaching machine, making the calibre of the bore larger. Gunsmiths also display their special skills in customised work - for instance, hunters often require gunsmiths to make a particular rifle for them, from blank factory pieces. After assembling the pieces, the gunsmith always test-fires the gun to check the alignment and strength of the gun.			
Related Occupations – which occupations are more or less the same?			
- Professional hunter - Shooting range manager			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training

I can work flexible hours	I can entertain people	I can work internationally	I can determine my own income	I am very interested in a specific subject or field	I can progress in the business world	I do not have to struggle with finding vacancies
I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours	I like to work with nature	I like to work with animals	I like to be physical active

Herbalist			
General Information			
Description – what is this occupation?			
The herbalist uses remedies made from plants to stimulate a patient's own bodily defences to produce relief or a cure for ailments and diseases.			
Typical Job Activities – what will I do in this occupation?			
Patients explain their symptoms and give a detailed medical and dietary history dating back to their childhood. Some herbalists use modern diagnostic methods such as blood-pressure tests, biochemical tests or x-rays. Once a diagnosis has been made the herbalist gives the patient a remedy made from plants, which is specifically blended to deal with the patient's particular condition. The herbalist's approach to medicine is essentially holistic patients are also given advice on diet, exercise, breathing and other lifestyle factors which could impact on their health. Some herbalists sell ready-made remedies to pharmacies and health shops.

Herpetologist			
General Information			
Description – what is this occupation?			
A herpetologist is a zoologist who specialises in the study of reptiles and amphibians, for example snakes, lizards, crocodiles and frogs.			
Typical Job Activities – what will I do in this occupation?			
Herpetology can be split into two broad categories: - Basic herpetology: The study of reptiles and amphibians for its own sake. - Applied herpetology: Entails applying the information gained in basic herpetology to a particular situation. A basic herpetologist studies the origin of these animals, their interrelationship with other species, relation to the environment, behaviour, growth and development, genetics, and distribution. As a herpetologist, you may also work in museums as a taxonomist where you will be responsible for the naming and classifying of species. As an applied herpetologist you will work as a curator in a reptile park or in the reptile section of a zoo, as well as in other positions where you will manage the breeding of reptiles and amphibians. You may also work in a position where you are required to educate the public about these species.			
Related Occupations – which occupations are more or less the same?			
- Entomologist - Ichthyologist - Game ranger - Nature conservator - Ornithologist - Veterinary nurse - Veterinary surgeon - Veterinary technologist			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption for degree courses. Senior Certificate for diploma courses. COMPULSORY SUBJECTS: Mathematics, Physical Science RECOMMENDED SUBJECTS: Biology			

Entry to Work Place			
UNIVERSITY: BSc degree in Zoology. Post-graduate study: BSc honours degree in Herpetology. Essential for basic herpetology and senior positions in applied herpetology. TECHNIKON: National Diploma and National Higher Diploma in Nature Conservation. This level of study will only qualify you for assistant positions in zoos and reptile parks. Advanced training: BTech degree in Nature Conservation will be applicable. IN-SERVICE TRAINING: Most zoos and reptile parks will supply in-service training for technikon graduates.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A herpetologist should: - love wild animals and concern for their conservation, especially reptiles and amphibians; - have patience; - be responsible; - commit himself to educate the public about these species; - be willing to work long and unusual hours; - obtain the highest possible qualification (competition for the limited availability of jobs is intense).

Possible Employers – where do I find this occupation?						
Government (national, provincial, local councils and government related organisations like universities, semi-government, etc.	Big private companies	Medium or small companies	Own small business: Entrepreneurial opportunities in this field	Self-employed: Contractor, consultant, own practise, freelance		
- Reptile parks - Zoos - Crocodile farms - National Parks Board - Museums - Universities and technikons - Manufacturers of snake-bite serum As this is a highly specialised field the advice of a herpetologist is often sought by the media or by a medical team in the treatment of snake-bite victims. The field does offer entrepreneurial possibilities in the form of writing articles and appearing on nature conservation programmes on television, but it is unlikely that this will be a full-time option. A herpetologist can also open his own reptile park, zoo or crocodile farm but these are all ventures which will require a considerable amount of start-up capital.

Historian			
General Information			
Description – what is this occupation?			
A historian uses knowledge of the past to attempt to explain current events.			
Typical Job Activities – what will I do in this occupation?			
A historian involved in research evaluates any evidence obtained, such as photographs, letters or verbal accounts of events to determine their authenticity and value. You will then develop theories about the evidence, and present your findings by teaching, lecturing or writing. In addition to conducting research, the historian may teach at colleges or universities. You can also serve as a consultant to editors, publishers or radio and television shows or films.

Home-Care Worker			
General Information			
Description – what is this occupation?			
The home-care worker is responsible for nursing patients in their own homes.			
Typical Job Activities – what will I do in this occupation?			
The home-care worker is not a qualified nurse but is usually hired to take care of: - patients who are recovering from heart attacks, strokes and major operations - elderly and disabled people who are not able to care for themselves. These situations do not require the services of a qualified nurse and hiring a home-care worker is far more cost-effective than hiring a nurse or keeping the person in a hospital or clinic. A home-care worker is trained in basic nursing and first aid as well as routine housekeeping, as assignments often call for a combination of the two.			
Related Occupations – which occupations are more or less the same?			
- Ambulance and emergency care worker - Community development worker - Nursing auxiliary - Social worker			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
No specific requirements. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: None			
Entry to Work Place			
IN-SERVICE TRAINING: Home-Care Workers usually receive in-service training. NOTE: The training of nursing auxiliary is also applicable. For more information refer to the alphabetical list of occupations to find the job description of Nursing Auxiliary.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A home-care worker should: - be able to acquire basic nursing and first-aid skills; - have patience and concern for the well-being of the patient; - be reliable and have integrity; - be friendly; - be neat and orderly.

Hospice Worker			
General Information			
Description – what is this occupation?			
Typical Job Activities – what will I do in this occupation?			
A number of different skills at various levels of professionalism are required in a hospice. Doctors, nurses, psychologists, social workers and accountants provide the professional services required.			
Related Occupations – which occupations are more or less the same?			
Hospices also rely heavily on volunteers, including lay counsellors, to spend time with patients and their families helping them come to terms with death. A volunteer hospice worker is trained to take care of the psychological and physical needs of patients and to reduce their pain and discomfort as much as possible. Hospices operate on a voluntary-contribution basis, so they require the services of professional fund-raisers to help them raise funds to keep the institution running.			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption for the degree courses required to become a professional doctor, nurse, psychologist, social worker, administrator or accountant. Senior Certificate is required for the nursing diploma course. No specific requirements for volunteer hospice workers. COMPULSORY SUBJECTS: Depend on the field of study RECOMMENDED SUBJECTS: Depend on the field of study			
Entry to Work Place			
Senior Certificate with matric exemption for the degree courses required to become a professional doctor, nurse, psychologist, social worker, administrator or accountant. Senior Certificate is required for the nursing diploma course. No specific requirements for volunteer hospice workers.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A hospice worker should: - be reliable and responsible; - have compassion, patience and empathy with terminally-ill patients and their families; - have an understanding of the process of grief; - be willing to sacrifice time in community service.

Hospital Porter			
General Information			
Description – what is this occupation?			
The hospital porter is responsible for the moving of patients on stretchers, trolleys, beds and wheelchairs between different locations.			
Typical Job Activities – what will I do in this occupation?			
Patients need to be moved from the ambulance into the hospital and between different sections of the hospital, the wards, operating theatre, delivery room and x-ray section. The hospital porter also needs to move patients who have just undergone operations and are often still anaesthetised from operating tables to trolleys to beds. This requires care and practice. It is also the responsibility of the porter to ensure that trolleys are always made up with fresh linen and blankets and that equipment such as oxygen cylinders and cot sides are available. The hospital porter works three shifts, alternating between morning, afternoon and night and is also expected to work weekends.			
Related Occupations – which occupations are more or less the same?			
- Ambulance and emergency care worker - Messenger - Receptionist - Security official

I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours	I like to work with nature	I like to work with animals	I like to be physical active

Human Resources Development Practitioner			
General Information			
Description – what is this occupation?			
A human resource development (HRD) practitioner prepares and conducts training programmes for employees in the industry, commerce or government.			
Typical Job Activities – what will I do in this occupation?			
The main aim of this training is to develop the workers' skills and to improve their productivity. The HRD practitioner meets with management and studies job operations to understand the demands of the actual work situations for which employees require training. You will select teaching aids such as textbooks or manuals, demonstration models and visual aids, and schedule the training sessions. You will also test the trainees to measure their progress and you may sometimes advise them on further study at a tertiary institution. The HRD practitioner also conducts specialised training sessions, on-the-job training and apprenticeship programmes.			
Related Occupations – which occupations are more or less the same?			
- Career guidance worker - Educational psychologist - Human resources manager - Industrial economist - Industrial psychologist - Lecturer - School counsellor - Social worker - Teacher - Vocational counsellor

Human Resources Manager/Personnel Manager			
General Information			
Description – what is this occupation?			
A human resources manager/personnel manager works together with top management officials to plan personnel policies that will meet the needs of employers and employees.			
Typical Job Activities – what will I do in this occupation?			
The human resources manager forecasts employment requirements, and co-ordinates transfers, promotions, dismissals, salary increases and reinstatements. As a human resources manager you will keep the evaluation and confidential records of employees. You will also recruit, select, test, appoint and place staff in suitable posts. You will control the progress of all activities and modify policies to meet particular objectives. You will give personal attention to new programmes and personnel problems, stay updated on labour laws and advise employers and employees on their obligations and rights. You will often represent management in negotiations with trade unions and employees on issues such as salary increases. You will promote employee welfare such as benefits, leave, housing schemes and medical aid. The job description of personnel managers or human resources managers depends on the type and size of the organisation where they work. Bigger companies usually have a team of people working in the human resources department, where each one has a particular section to manage. These sections may include the following: staffing, training or human resource development, staff utilisation, organisation planning and development, labour relations, remuneration, research, management, staff welfare and administration.			
Related Occupations – which occupations are more or less the same?

Hydrologist			
General Information			
Description – what is this occupation?			
Hydrology is the study of the occurrence, distribution, quality and movement of water in both natural and people-affected environments.			
Typical Job Activities – what will I do in this occupation?			
Water resources in South Africa are limited. The hydrologist makes accurate assessment of the available water and future needs and make recommendations on long-term management practices. You will have to understand the needs of water users (agricultural, domestic and industrial) as well as the possible options available for water resource development. The hydrologist tries to secure the optimal utilisation of the country's water resources by advising civil engineers on the flow of rivers and where to build the most economical water schemes. You will advise design engineers on the frequency and magnitude of floods in order to minimise flood risks and to ensure the best operational procedures for flood control.			
Related Occupations – which occupations are more or less the same?			
- The Department of Water Affairs and Forestry - National Institute for Water Research (CSIR) - Water Boards - Municipalities - Universities and technikons - Engineering firms A skilled and entrepreneurial hydrologist can open his own private practice and act as a consultant.			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption for a degree course. COMPULSORY SUBJECTS: Mathematics, Physical Science RECOMMENDED SUBJECTS: Geography			
Entry to Work Place			
UNIVERSITY: BSc degree majoring in one of the following: Hydrology, Geology, Geography, Biochemistry, Microbiology, Chemistry, Engineering, Statistics, Computer Science, Applied Mathematics, Mathematics, Physics. Post-graduate study: A Honours degree is the minimum requirement for appointment as a hydrologist. IN-SERVICE TRAINING: The Department of Water Affairs and Forestry offers an in-service training programme in the following form: - internal lectures; - seminars; - field training; - computer programming; - analytical methods.			

What level of natural skill and/or aptitude do I need for this occupation?				
Exceptionally High	High	Moderate	Low	
A hydrologist should: - be fond of travelling and outdoor life; - have above average intelligence; - like to do research and analyse data; - have initiative; - be able to work independently; - work accurate; - be physical healthy and have stamina.

Industrial Economist			
General Information			
Description – what is this occupation?			
An economist studies the way a society uses resources such as land, labour, raw material and machinery to produce goods and services.			
Typical Job Activities – what will I do in this occupation?			
The industrial economist focuses on the effect of factors such as government policy, international trade regulations and labour relations on the sectors in which the business operates. You will consider all social, political and other factors (locally and abroad) that have an effect on the economy. At least four different types of industrial economist can be identified: - The industrial economist employed at large corporations on a full-time basis gathers information, assesses the impact of industrial economic factors on the organisation and advises top management accordingly. - An industrial economist at educational institutions conducts on-going research and lectures. Your approach to the subject should be creative and you may develop original economic theories based on your research. Sometimes large corporations seek the professional advice of this type of economist. - The techno-economist is research-orientated and is normally employed by research institutions such as the CSIR. You usually will have additional qualifications in a technical or scientific field. - The business economist is employed by corporations in the private sector as a financial, marketing, production or general manager. It is your responsibility to identify areas of potential benefit and potential disaster and makes recommendations to senior management.			
Related Occupations – which occupations are more or less the same?			
- Accountant - Agricultural economist - Auditor - Conveyancer - Credit analyst - Financial analyst - Financial manager - Insurance agent - Stockbroker - Underwriter			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption for a degree. COMPULSORY SUBJECTS: Mathematics RECOMMENDED SUBJECTS: Economics, Business Economics, Accounting			

Entry to Work Place			
UNIVERSITY: Various degrees with appropriate subjects are offered at most universities. Post-graduate study: A postgraduate degree in Economy or Business Economy will enable an economist to get promotion more readily and will qualify him more responsible research and administrative positions as well as for permanent teaching positions at universities and technikons.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
An industrial economist should: - have good literacy and numerical skills; - have verbal and written communication skills; - understand statistics and data manipulation; - have computer literacy; - have a methodical and inquiring mind; - have initiative and an interest in local and international economic affairs.

Industrial Theatre Director			
General Information			
Description – what is this occupation?			
The industrial theatre business has grown rapidly because it is made for the audience, not for the playwright or director.			
Typical Job Activities – what will I do in this occupation?			
Almost every organisation in the country is experiencing difficulty in changing from autocratic and authoritarian management styles to more inclusive and democratic workplace cultures. It is a uniquely flexible and vigorous medium that gets people laughing and talking about problems in a warm, human way. The industrial theatre director: - spends a lot of time in researching the play, getting the flashpoints of the organisation and most of the dialogue from the people on the ground - writes clues for the play and suggests solutions for problems without being didactic - identifies the best place for the play to take place which may be a corner of the factory or an office area - decides on props and costumes which are usually very simple and inexpensive - directs the play. The industrial theatre director has to know how to conduct physical, interactive comedy. This is a highly kinetic form of theatre with few silences and you have to choreograph the play and make visual jokes that punctuate and support the emotional progression and learning points. You also have to induct the actors in the special demands and responsibilities of making industrial theatre.			
Related Occupations – which occupations are more or less the same?			
- Actor - Art editor and critic - Dancer - Drama teacher - Journalism - Musician - Music director - Orchestra leader - Producer - Radio And Television announcer - Singer			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption for a degree course. Senior Certificate for a diploma course. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Speech and Drama, Music, Art			
Entry to Work Place			

What level of natural skill and/or aptitude do I need for this occupation?				
Exceptionally High	High	Moderate	Low	
An industrial theatre director should: - have communication skills; - like to work with people; - have acting talent; - be creative and imaginative; - express himself well by using facial expressions, gestures and voice inflections; - be a quick thinker; - be committed to his vocation; - direct players in the special demands and responsibilities of industrial theatre; - take criticism well; - have good health, physical strength and stamina; - have a clear, well-trained voice.

Further Studies in the specific career field	Further studies in related fields	Experience in specific field	Work performance	Work performance	Do presentations, seminars, publish articles, etc.	General management studies
Possible career paths – which kind of career path can I follow in this occupation?						
Specialist career in the specific field	Management positions in the specific field	Management positions in related fields	General business management	Executive positions	Consultant/ contractor/ own practice/ freelance	Own business
Employment Stability						
Is the demand (the need) for this particular skills stable over the years?						
Exceptionally Stable		Very stable		Moderately stable		Not very stable
The need for people in this occupation and with these skills is influenced by:						
Government policy and legislation		Government strategy and activities		The growth of private companies (big and small)		
Technology		Direct consumer demands – “man in the street”		My own performance and skills		
Possible reasons to consider this career – I should consider this career if I want a job where:						
The need is determined by government	The need is determined by the consumers	The need is determined by private companies	The need is determined by new technology	I can start a business in this field or with these skills	The job is fairly stable	The job is ideal for becoming a general manager
I can be of service to people	I can work with my hands	I can design things	I can repair things	I can work with technology	I can create new things	I'll be able to learn new things on an ongoing basis
I can work with languages	I can work with people	I can make more money than the average person	I can do practical work and I do not have to study theories	I can study for a number of years and face intellectual challenges	Minimum or no qualifications are required	I can work for myself
I can work flexible hours	I can entertain people	I can work internationally	I can determine my own income	I am very interested in a specific subject or field	I can progress in the business world	I do not have to struggle with finding vacancies
I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours	I like to work with nature	I like to work with animals	I like to be physical active

Inspector of Works			
General Information			
Description – what is this occupation?			
An inspector of works ensures that the structural, mechanical and electro-technical aspects of building constructions are carried out according to plan, specifications and required standards.			
Typical Job Activities – what will I do in this occupation?			
The inspector of works: - draws up specifications and lists of materials for new works as well as building repairs, refurbishments and extensions - carries out inspections - prepares reports - makes recommendations - draws up cost estimates for specific jobs - performs valuations of particular properties - recommends progress payments - inspects jobs on completion - tests the completed buildings or installations for compliance with required specifications. The inspector of works is not only in charge of the artisans in his department, but also of the contract workers, because most of the work is done on a contract basis by private contractors. You will work closely with architects and engineers in an office as well as on-site.			
Related Occupations – which occupations are more or less the same?			
- Architect - Construction manager - Contractor - Electrician - Health inspector			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate. COMPULSORY SUBJECTS: Mathematics, Physical Science RECOMMENDED SUBJECTS: None			

Entry to Work Place			
TECHNICAL(FET) COLLEGE: National Technical Diploma or N3 Certificate in one of the following fields: - Building specifications. - Mechanical specifications. - Electro-technical specifications. TECHNIKON: NDip in a relevant building, mechanical, electro-technical or engineering field. NOTE: A person with registration as engineering technician can also be appointed as inspector of works. A person with a Senior Certificate or a N3 Certificate, apprenticeship training as well as three years appropriate experience can be appointed as chief inspector of works.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
An inspector of works should: - get along well with others and be able to work with people at all levels; - express himself clearly in speech and writing; - be objective and persuasive; - be independent and self-reliant; - be very responsible and have sound judgement; - be able to criticise without causing ill-feeling; - speak more than one language fluently; - have an aptitude for figures.

Instrument Maker			
General Information			
Description – what is this occupation?			
An instrument maker manufactures, installs and repairs instruments.			
Typical Job Activities – what will I do in this occupation?			
Very high standards have to be met with regard to the design and production of instruments to be used by scientists, industrial organisations and academic institutions. Instruments may be classified according to their use: - Mechanical instruments are used for mechanical purposes e.g. watches, thermometers, odometers and pressure gauges. - Optical instruments include spectacles, telescopes and cameras. The production of this requires a high degree of skill and accuracy. - Electrical instruments such as volt- and ammeters, kilowatt gauges and delicate electronic equipment. - Chemical instruments include very complex apparatus used in chemical engineering. - Medical instruments and apparatus such as scissors and pincers. The instruments have to be checked regularly and defects should be detected and repaired by the instrument maker.			
Related Occupations – which occupations are more or less the same?			
- Biomedical technologist - Chemical laboratory technician - Electrical engineering technician - Electronics engineering technician - Instrument mechanician - Optical technician - Scientific glass-blower			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate or a N3. COMPULSORY SUBJECTS: Mathematics, Physical Science RECOMMENDED SUBJECTS: Technical Drawing, Metalwork, Trade Theory, Technika: Electronics, Technika: Electrical			

Entry to Work Place			
APPRENTICESHIP TRAINING: If you want to become an instrument maker you need to register with an employer providing suitable training. Training consists of theoretical and practical work: - Theoretical training: At a technical(FET) college or a correspondence course at Technisa. - Practical training: In-service training under supervision of a qualified tradesman. - Duration of course: 5 years but it can be completed in a shorter period provided that the candidate has higher educational qualifications. - Final examination: A compulsory trade test set by the Department of Labour to qualify as an artisan. NOTE: Changes in the training of artisans are subject to the official approval of the Registrar of Labour Training. A new system of apprenticeship training will be introduced within the next few years. Each industry will make use of its own methods and time to implement the system.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
An instrument maker should: - work meticulous; - be very accurate and precise; - have mathematical ability and mechanical aptitude; - be diligent and patient; - have good hand and finger dexterity; - be practical; - enjoy the design and manufacture of scale models.

Instrument Mechanician			
General Information			
Description – what is this occupation?			
The instrument mechanician manufactures and repairs instruments and recalibrates old instruments.			
Typical Job Activities – what will I do in this occupation?			
You will play a vital role to ensure that automatic processes and plant systems operate correctly and efficiently. The control of nearly all manufacturing processes depends on instruments that can be electrical, mechanical or hydraulic. They are responsible for measuring the pressure, temperature, position, level, mass and flow of solids, fluids and gases. Should the plant processes not operate according to specifications, the instrument mechanic diagnoses the faults and repairs them as quickly as possible. The instrument mechanic is trained to design, manufacture and repair almost any kind of instrument, whether electrical, mechanical, hydraulic, chemical or optical. To design a specific research instrument he works according to sketches and instructions from scientists and engineers.			
Related Occupations – which occupations are more or less the same?			
- Biomedical technologist - Chemical laboratory technician - Electrical engineering technician - Electronics engineering technician - Instrument maker - Meteorological instrument technician - Optical technician - Scientific glass-blower			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 9 Certificate. Some employers prefer higher qualifications. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Mathematics, Physical Science			

Entry to Work Place			
APPRENTICESHIP TRAINING: If you want to become an instrument mechanic you need to register with an employer providing suitable training. - Theoretical training: At a technical(FET) college or a correspondence course at Technisa up to N2 level. - Practical training: At an accredited training centre. - In-service training: Under supervision of a qualified tradesman. - Duration of course: 2 to 4 years. - Final examination: A compulsory trade test set by the Department of Labour to qualify as an artisan. ADDITIONAL REQUIREMENTS: If you want to become an instrument mechanic you must be at least 16 years old. NOTE: Changes in the training of artisans are subject to the official approval of the Registrar of Labour Training. A new system of apprenticeship training will be introduced within the next few years. Each industry will make use of its own methods and time to implement the system.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
An instrument mechanic should: - have mechanical insight; - have a good understanding of physics and mathematics; - be thorough and precise; - be accurate and patient in doing complicated work; - have initiative; - have dexterity and steady hands; - have good eye-hand co-ordination; - have good eyesight.

Insurance Broker/Consultant			
General Information			
Description – what is this occupation?			
An insurance agent sells policies to individuals and businesses to provide protection against future losses and/or financial pressures.			
Typical Job Activities – what will I do in this occupation?			
The agent must analyse the needs of clients and help them to plan the protection that meets these needs. Insurance protection may be for motorcar, home, business or other property for protection of a family if the breadwinner dies or for protection against hospital and medical costs. The agent also provides clients with information on investment policies and funds. A client may, for example, invest money for his child's education. The insurance agent helps clients to obtain claim settlements and provides follow-up services to keep clients' insurance programmes up to date.			
Related Occupations – which occupations are more or less the same?			
- Account executive: advertising - Agent: employment - Agent: slaughter stock - Broker: insurance and investment - Client canvasser - Commercial traveller - Consultant: marketing - Market researcher			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate for a diploma course. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Accounting, Economics, Mathematics			
Entry to Work Place			
IN-SERVICE TRAINING: No specific training is needed for entering this occupation as all insurance companies offer in-service training. FURTHER TRAINING: In addition to in-service training an employee may take the examination of the Insurance Institute of South Africa which provides correspondence courses. Two levels of examination lead to two diplomas, namely the qualifying examination for the Associateship Diploma and the Fellowship Diploma. As the insurance agent may be looked upon also as financial adviser he is selected and examined carefully by his company and given a thorough training to fulfil his tasks.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low

An insurance agent should:

- have a mature and balanced personality;
- be ambitious, enthusiastic and motivated;
- have initiative;
- have a real interest in people and get along well with others;
- be convincing;
- be self-disciplined and work well without supervision.

Insurance agents need:

- good health and physical stamina;
- a neat, well-groomed appearance;
- good communication skills.

I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours	I like to work with nature	I like to work with animals	I like to be physical active

Internal Auditor			
General Information			
Description – what is this occupation?			
An internal auditor is the person who examines and vouches for the accuracy and completeness of bookkeeping records and the financial statements of any business establishment.			
Typical Job Activities – what will I do in this occupation?			
You will independently appraise the functions within an organisation to examine and evaluate these activities as a service to the organisation. The internal auditor provides the management of the organisation with analysis, appraisals, recommendations and information about the activities he reviews. You will analyse compliance with policies, procedures and practices, and also evaluate established controls, and appraise the efficiency, effectiveness and economy of operations. In addition, the internal auditor identifies, evaluates and handles risks. You may prepare financial statements for a client, such as profit and loss statements and balance sheets. You will also prepare detailed reports showing items such as operating costs, total assets, liabilities, volume of sale, net profits and depreciation costs. As an auditor you are able to act as a financial adviser due to your wide knowledge, experience and thorough training. You will act as adviser when, for instance, new bookkeeping systems and computers are introduced and you will advise companies and individuals on aspects concerning taxation, legal matters and finances.

Internist			
General Information			
Description – what is this occupation?			
An internist is a medical doctor who has specialised as a diagnostician in internal medicine.			
Typical Job Activities – what will I do in this occupation?			
You will study the basic bodily systems (digestive, circulatory, respiratory, etc.) to be able to identify the causes of unusual internal disorders. Patients are referred to you by general practitioners or other specialists. The internal physician performs tasks similar to those of a general practitioner and often recommends laboratory tests and x-rays to aid diagnosis. Once the problem is defined it is treated by accepted medical methods. The internal physician may specialise in the treatment of allergies, the cardiovascular system, gastro-enterology, pulmonary diseases, nephrology or rheumatology.			
Related Occupations – which occupations are more or less the same?

Interpreter			
General Information			
Description – what is this occupation?			
The interpreter helps people from different cultures to communicate effectively in spite of language differences by translating orally what one person has said into a language that others can understand			
Typical Job Activities – what will I do in this occupation?			
It is important to note that the interpreter differs from the translator because the interpreter concentrates on the spoken language and on the emotions and attitude of the speaker, while the translator deals with the written language. A distinction is often made between two types of interpreter - the simultaneous and the consecutive interpreter. A simultaneous interpreter translates a speaker's words into a second language while the words are still being spoken. A consecutive interpreter waits until a speaker pauses, and then translates what has been said up to that point. An interpreter may work in government departments, embassies and courts. The cultural, historical and political background of the people whose language are being interpreted is studied in order to best understand the meaning of the words. Working conditions are generally excellent. A simultaneous interpreter usually works at international conferences in glass booths that are so placed that the interpreter has a good view of everything that goes on in the conference hall. A consecutive interpreter works mainly in court and in the diplomatic field.			
Related Occupations – which occupations are more or less the same?			
- Editor - Journalist - Proof-reader - Speech therapist and audiologist - Tour guide - Translator (works with written material) - Writer			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 10 Certificate. Preference is given to a Senior Certificate. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Two or more languages, History			
Entry to Work Place			
TRAINING OF A COURT INTERPRETER: The candidate must undergo a language test. The successful candidate is appointed temporarily and works under the supervision of a chief court interpreter. He must pass a further language test taken by the inspector of interpreters to be appointed on probation. After the probation period of 12 months he attends a theoretical and practical course. On completion of the course the interpreter is allowed to work independently.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low

An interpreter should; - be trustworthy and responsible as incorrect interpretations may have far-reaching consequences; - be patient and tactful; - have fluency in speech; - have good hearing and a clear voice.

Joiner and Woodmachinist			
General Information			
Description – what is this occupation?			
The joiner and woodmachinist is responsible for manufacturing and assembling the woodwork in a building, such as doors, door and window frames, counters and built-in cupboards.			
Typical Job Activities – what will I do in this occupation?			
As a joiner and woodmachinist, you will spend your time in a workshop where you will work with machine and hand tools. You will design, manufacture and assemble wooden components according to specified needs. The joiner and woodmachinist is involved in the final finishing of a building as the wooden components are usually the last items to be installed.			
Related Occupations – which occupations are more or less the same?			
- Cabinetmaker - Carpenter - Carver - Frame-maker - Furniture polisher - Roofer - Shopfitter - Upholsterer			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 9 Certificate. Grade 10 Certificate or N1 is recommended. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Mathematics, Trade Theory, Woodwork			

Entry to Work Place			
APPRENTICESHIP TRAINING: If you want to become a joiner and woodmachinist you need to register with an employer providing suitable training. Training consists of theoretical and practical work: - Theoretical training: At a technical(FET) college to obtain a N2 plus Institutional Competency-based Modular Training at a BIFSA Training College or any other accredited training centre. - Practical training: Practical site experience with an employer. - Duration of course: 2 to 4 years depending on the experience of the candidate. - Final examination: A compulsory trade test set by the Department of Labour to qualify as an artisan. ADDITIONAL REQUIREMENTS: If you want to become a joiner and woodmachinist you must be at least 16 years old. Training should comply with the Production Performance Criteria of BIFSA. NOTE: Changes in the training of artisans are subject to the official approval of the Registrar of Labour Training. A new system of apprenticeship training will be introduced within the next few years. Each industry will make use of its own methods and time to implement the system.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A joiner and woodmachinist should: - be practical; - have an eye for line; - work well with his hands; - work accurately with regard to details, drawings and instructions; - have a methodical approach to his work.

Technology		Direct consumer demands – “man in the street”			My own performance and skills	
Possible reasons to consider this career – I should consider this career if I want a job where:						
The need is determined by government	The need is determined by the consumers	The need is determined by private companies	The need is determined by new technology	I can start a business in this field or with these skills	The job is fairly stable	The job is ideal for becoming a general manager
I can be of service to people	I can work with my hands	I can design things	I can repair things	I can work with technology	I can create new things	I'll be able to learn new things on an ongoing basis
I can work with languages	I can work with people	I can make more money than the average person	I can do practical work and I do not have to study theories	I can study for a number of years and face intellectual challenges	Minimum or no qualifications are required	I can work for myself
I can work flexible hours	I can entertain people	I can work internationally	I can determine my own income	I am very interested in a specific subject or field	I can progress in the business world	I do not have to struggle with finding vacancies
I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours	I like to work with nature	I like to work with animals	I like to be physical active

Land Surveyor			
General Information			
Description – what is this occupation?			
Land surveying is the science and practice of recording and setting out the exact measurements of man-made and natural features of the earth's surface			
Typical Job Activities – what will I do in this occupation?			
Surveying is basic to all construction planning and development. It involves the making of maps and the determination of boundaries. A land surveyor participates in the planning and construction of roads, railways, power lines, canals, engineering structures, buildings and townships and is indispensable when it comes to preparing data on the measurements of lakes, rivers and the coastline. The land surveyor can specialise in one of the following fields: - Geodetic surveying: Determining markers or beacons according to the lines of latitude and longitude. - Cartography: The drawing of maps. - Cadastral surveying: Entails the measuring of property for the planning of towns and cities. - Engineering surveying: Helping with the design of roads, bridges and tunnels. - Hydrographic and oceanographic surveying: Surveying the marine environment for the development of harbours.			
Related Occupations – which occupations are more or less the same?			
- Cartographer - Civil engineering technician - Draughtsman - Hydrologist - Metallurgical engineering - Mining engineer - Oceanographer - Photogrammetric surveyor			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption. COMPULSORY SUBJECTS: Mathematics, Physical Science RECOMMENDED SUBJECTS: Geography			
Entry to Work Place			
REGISTRATION: To be entitled to practise as a land surveyor the graduate has to register with the SA Council for Professional and Technical Surveyors.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low

A land surveyor should: - enjoy working outdoors; - like to travel; - be able to work on his own; - maintain good relations with the public; - have mathematical ability.

I can work flexible hours	I can entertain people	I can work internationally	I can determine my own income	I am very interested in a specific subject or field	I can progress in the business world	I do not have to struggle with finding vacancies
I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours	I like to work with numbers and calculations	I like to work with animals	I like to be physical active

Landscape Architect/Technologist			
General Information			
Description – what is this occupation?			
A landscape architect/technologist designs outdoor spaces to make them functional and attractive.			
Typical Job Activities – what will I do in this occupation?			
These spaces may range in size from small privately owned gardens to city squares and parks. The landscape architect/technologist first studies the geography of the project site, examining the slope of the land, the trees present and the distribution of shade and sun. Preliminary plans and budgets are then drawn up after consultation with engineers, project architects, horticulturists and municipal officials. After plans have been approved final drawings are prepared showing existing and proposed features. Lists of all materials needed are drawn up. Finally contractors are invited to submit tenders for carrying out the work.			
Related Occupations – which occupations are more or less the same?			
- Architect - Contractor - Horticulturist - Town and regional planner			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption for a degree course. Senior Certificate for a diploma course. COMPULSORY SUBJECTS: Mathematics, Physical Science RECOMMENDED SUBJECTS: None			
Entry to Work Place			
Applicable qualification			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A landscape architect/technologist should: - be creative and artistic; - have a technical-scientific aptitude; - have a love for nature; - be proficient in speech and writing; - get along well with others.

Laser Display Artist			
General Information			
Description – what is this occupation?			
The word 'laser' comes from the first letters of the words 'light amplified by stimulation emission of radiation'			
Typical Job Activities – what will I do in this occupation?			
Laser converts electrical power into a beam of light or optical power. To understand the wide range of duties that lasers can perform, potential artists need to understand the laser light properties, namely monochrome (single colour), coherence (light waves in various link like a chain) and directionality (light that radiates very little). The colour of light depends on the wavelength. Red light has the longest wavelength and violet the shortest, while white light is a combination of all the wavelengths. Directionality refers to the fact that light from the lasers only travels in one direction unlike ordinary light, which radiates away from the surface. Coherence has to do with the fact that waves form an orderly pattern when beaming from a laser. Such light is known to be in phase. Laser display artists put the three properties mentioned above together to make a spectacular show. There are many kinds of lasers. Some lasers produce continuous power, while others make short bursts. Some are small enough to be hand-held. Some lasers are so powerful that they can drill holes through thick metal plates and denotate explosives.			
Related Occupations – which occupations are more or less the same?			
Laser display artists are usually self-employed.			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Entry to Work Place			
In service training may be provided under the supervision of an experienced laser display artist.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
You need to be at least 18 years old. Basic knowledge of electrical equipment is a pre-requisite.

Leather Worker			
General Information			
Description – what is this occupation?			
The leather worker uses leather, imitation leather, plastics and other materials to make products such as clothes, handbags and shoes.			
Typical Job Activities – what will I do in this occupation?			
There are four sections within the leather industry: - Tanning: The tanning section uses chemicals to prepare animal hides. The hides are soaked to remove the salt and treated with chromium salt or vegetable products to remove hair and flesh. -- The staker, stretcher and toggler work on the hide to produce a satisfactory shape. -- A splitter uses sharp knives to split the hides. -- The shaver removes the remaining hair. -- The sprayer uses special equipment to spray on different colours according to demand. -- A buffer buffs the leather to impart a smooth surface. - The footwear section: This section employs by far the largest number of both skilled and unskilled labour. -- The clicker cuts the leather material (the uppers). -- A lining-cutter cuts out the lining. -- The skiver thins the seam edges. -- A machinist sews the uppers and lining together. -- The sole-cutter and insole-cutter cut out the various parts of the sole. -- The pull toe laster fits the uppers to the lasts and joins them by using lasting machines. -- The sole-attacher applies adhesive and the sole-stitcher stitches around the soles. -- A heel-attacher fastens on the heels. -- The sole-moulder applies rubber soles where required. -- An edge trimmer trims the soles and heels and smoothes rough edges. -- The bottom scourer polishes the soles. -- The inker applies black dye to obtain a black sole. - In the general leather goods section shopping bags, briefcases, saddles, bridles, suitcases and even clothes are made. - The handbags department employs some of the workers of the footwear section. They are then responsible for the manufacturing of handbags.			
Related Occupations – which occupations are more or less the same?			
- Cobbler - Dressmaker - Fashion designer - Footwear Technologist - Furrier - Knitter - Sewing machine operator - Tailor			
Educational Requirements - which qualifications do I need to enter this occupation?

Lexicographer			
General Information			
Description – what is this occupation?			
Lexicographers compile, write and edit dictionaries.			
Typical Job Activities – what will I do in this occupation?			
They study languages and their uses, the difference and similarities between certain languages and the sounds used in speech. Lexicographers need to be familiar with history, because by gaining information about the etymological origins and development of words, they can describe the grammatical structure of language concerned. They also differentiate between the languages of various regions and social settings. Because they study unknown and ancient languages, lexicographers mostly do not travel to gather their data, but perform research by making use of books in and on the ancient language in question. Some lexicographers teach at universities. Others also study small children and exactly how they acquire language. Etymology, philology, social science and discourse analysis are some of the subjects a lexicographer is familiar with.			
Related Occupations – which occupations are more or less the same?			
- Social scientist - Etymologist - Philologist - Editor			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training

Librarian and Information Worker			
General Information			
Description – what is this occupation?			
The basic function of the librarian and information worker is not only to select, acquire and organise a vast amount of information, but also to make information and sources available as efficiently as possible.			
Typical Job Activities – what will I do in this occupation?			
Libraries have the following departments: - ordering or acquisition - cataloguing and classification - lending or circulation - information and reference. In large libraries and information services the various tasks may be handled in separate departments, but in small libraries all the work is usually performed by the same staff. A direct service to the user consists of the answering enquiries. The librarian responsible for reader advisory services could be known as a: - Reference librarian: Attending to general reference questions. - Subject reference librarian: Responsible for a related group of subjects. - Subject specialist: Responsible for services to readers of a particular subject. Every library has to select the books and other material needed and order it from local or foreign sources. Upon receipt the books and material are handed to the cataloguing and classification department. The contents are determined and the books and material are indexed accordingly. Books and periodicals normally form the major part of library acquisitions. There are also various libraries aimed at a certain type of user: - Public libraries. - University and college libraries. - School libraries. - Information services serving individual research institutions, government departments, commercial firms, organisations and associations.			
Related Occupations – which occupations are more or less the same?			
- Archivist - Critic - Cultural officer - Information officer - Journalist - Librarian teacher - Library assistant - Literature teacher - Medical record technician			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training

Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption for a degree course. Senior Certificate for a diploma course. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Languages, Mathematics			
Entry to Work Place			
NOTE: Usually a school librarian is a qualified teacher with specialisation in librarianship.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A librarian and information worker should: - enjoy working with data and people; - be fond of books; - enjoy reading; - have an aptitude for organisation and management; - be systematic, accurate and responsible; - be creative and imaginative.

Lifeguard			
General Information			
Description – what is this occupation?			
It is the responsibility of the lifeguard to watch over designated areas of beaches and to be knowledgeable about ocean currents so as to control bather movements and ensure that swimmers do not get into trouble.			
Typical Job Activities – what will I do in this occupation?			
Should a bather need help, the lifeguard on duty should spot the situation immediately and rescue the bather. If a rescued bather has swallowed a lot of water or is suffering from any form of injury the lifeguard needs to perform basic first aid and call an ambulance if necessary.			
As a lifeguard you need to maintain a peak level of physical fitness so that you can quickly swim to where you are needed and support the weight of possibly struggling people in the water. You constantly have to practise rescue techniques with your team so that you can operate at maximum speed and efficiency when called upon to do so.			
Related Occupations – which occupations are more or less the same?			
- Ambulance and emergency care worker - Diver - Police officer - Security officer - Swimming-pool superintendent - Oceanographer			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: None			
Entry to Work Place			
IN-SERVICE TRAINING: The Surf Proficiency Award is compulsory and must be taken shortly after appointment. Many town councils require a bronze medal in Lifesaving in order to qualify for a position as a lifeguard.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A lifeguard should: - have a high level of physical fitness; - have excellent eyesight; - be a strong swimmer; - understand sea currents and the different types of dangers that bathers can get into; - have communication skills (to move groups of bathers to safer areas and make announcements over a public address system); - love outdoor life and athletic activity.

Lift Mechanic			
General Information			
Description – what is this occupation?			
The lift mechanic is involved with the construction, erection, testing and maintenance of lifts, escalators and hoists.			
Typical Job Activities – what will I do in this occupation?			
When a new lift is installed, the shaft is constructed and prepared for use. The electrical wiring and controls are then installed. The elevator car is assembled and finally the hoist that winds and unwinds the cable, is installed. When the lift is operational, the mechanic checks, adjusts and rechecks it to make sure it works properly. Once the equipment has been installed, the lift mechanic has to maintain and repair it. The lift mechanic may also replace old equipment with newer models in accordance with regulations as decreed by legislation.			
Related Occupations – which occupations are more or less the same?			
- Battery mechanic - Construction electrician - Construction plant mechanic - Diesel fitter - Electrical and electronic fitter - Electro-mechanician(millwright) - General electrician - Hydraulic systems mechanic - Lift fitter: electrical - Machine tool mechanic - Radio and television mechanic			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 9 Certificate. Some employers prefer higher qualifications. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Mathematics, Physical Science, Trade Theory, Technika: Electrical, Technika: Mechanical, Technical Drawing			

Entry to Work Place			
APPRENTICESHIP TRAINING: If you want to become a lift mechanic you need to register with an employer providing suitable training. Training consists of theoretical and practical work: - Theoretical training: At a technical(FET) college or at the company's registered in-service training centre. - Practical training: The practical training period is spent in the construction, maintenance and repair sections of a company installing and maintaining lifts. - Duration of course: Between 80 and 208 weeks depending on the progress of the apprentice. - Final examination: A compulsory trade test set by the Department of Labour to qualify as an artisan. ADDITIONAL REQUIREMENTS: If you want to become a lift mechanic you must be at least 16 years old. NOTE: Changes in the training of artisans are subject to the official approval of the Registrar of Labour Training.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A lift mechanic should: - be thorough and responsible; - have a good knowledge of electronics and electricity; - enjoy working with his hands and handling tools; - have technical and practical aptitude; - have mechanical ability; - be in good health and have stamina.

Light Delivery Van Driver			
General Information			
Description – what is this occupation?			
The driver of a light delivery van transports goods from a supplier to a customer.			
Typical Job Activities – what will I do in this occupation?			
The total load is relatively light and usually comprises a number of small consignments for different customers. The routes for delivery vans are normally limited to a certain radius, for example within a city and surrounding districts, but not to other cities. The driver of a light delivery van can expect to be responsible for the following tasks: - checking the condition and safety of the vehicle before he makes deliveries - reporting vehicle defects - unloading goods for customers - ensuring that customers sign delivery notes - receiving money and issuing of receipts. The driver usually works regular hours on the same routes every day. In the case of the delivery of newspapers or fresh products such as milk the driver has to work very early in the morning. Depending on new deliveries, the route can also change.			
Related Occupations – which occupations are more or less the same?			
- Bus driver - Cargo controller - Crane operator - Driver and stacker - Driver instructor - Taxi driver - Tractor driver - Train driver - Truck driver - Vehicle driver			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
No specific requirements. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: None			
Entry to Work Place			
IN-SERVICE TRAINING: A light delivery van driver is normally accompanied by an experienced driver until he is familiar with routes and procedures. ADDITIONAL REQUIREMENTS: If you want to become a light delivery van driver you must: - be at least 18 years old; - be in possession of a valid driver's licence.			

What level of natural skill and/or aptitude do I need for this occupation?				
Exceptionally High	High	Moderate	Low	
A light delivery van driver should: - have a good driving record; - be alert and attentive; - have physical fitness and stamina; - have excellent eyesight; - be responsible with sober habits; - have mental stability; - have a mechanical aptitude to perform emergency repairs.

Linesman			
General Information			
Description – what is this occupation?			
A linesman is responsible for the erection, maintenance and repair of the wooden poles, metal towers, cables and other equipment used to construct electrical transmission and distribution power lines.			
Typical Job Activities – what will I do in this occupation?			
These lines carry electricity from power stations to sub-stations to consumers. A linesman starts working under supervision of a qualified linesman and assists with the erection of overhead power lines and laying of underground cables. With experience the linesman moves up to more responsible positions, such as planning and the mapping out of the positions of the line supports. You will then have a team of ground workers to support you. The work includes tasks such as: - erecting and installation of power lines - attaching cross-arms, insulators and lightning arresters - climbing poles or towers to install transformers - routine maintenance and repair. The linesman sometimes has to deal with land owners when construction work or maintenance has to be done on private property.			
Related Occupations – which occupations are more or less the same?			
- Bricklayer - Construction electrician - Construction worker - Electrician			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 10 or N1 Certificate. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: None			
Entry to Work Place			
IN-SERVICE TRAINING: Basic training lasts six months after which the candidate begin to work as a learner linesman. The training includes: Fire fighting, Safety measures, First aid, High tension regulations, Electricity I and II, Construction. ADDITIONAL REQUIREMENTS: If you want to become a linesman you must be at least 17 years old. An aptitude test must also be taken.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low

A linesman should: - be technically oriented; - in excellent physical condition; - be willing to work outdoors in all kinds of weather; - like to travel; - not be colour blind or afraid of heights.

I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours	I like to work with nature	I like to work with animals	I like to be physical active

Lithographic Machine-minder			
General Information			
Description – what is this occupation?			
A lithographic machine-minder is responsible for all the duties relating to the setting up of printing machines.			
Typical Job Activities – what will I do in this occupation?			
The lithographic machine-minder: - sets up the rollers, cylinders, ink-flow and material transport of the printing machine - makes sure that the plates are correct and mounts them on the machine - ensures that instructions are followed correctly - controls the standard of the printing work. Specialised fields include the following: - The photo-lithographer (camera operator) photographs and develops negatives of the materials to be printed. - A lithographic artist retouches negatives to lighten or darken certain areas. - The stripper arranges and pastes negatives onto layout sheets. - The plate maker places a sheet of film on the prepared metal plate, exposes both to bright lights and then treats the plate with chemicals to bring out the image to be printed. - A press operator mounts the developed plate on the off-set press and monitors the printing process while operating the press. - A metal decorator operates an off-set press that prints on metal.			
Related Occupations – which occupations are more or less the same?			
- Bookbinder - Carver - Compositor - Letter cutter and decorator: stone - Lithographer: ceramics decorating - Lithographic stone engraver - Photogravure engraver - Rotary machine-minder - Stipple artist - Toolmaker			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 10 Certificate for an apprenticeship at a company. Senior Certificate for full-time training at the South African Printing College. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: None			

Entry to Work Place			
APPRENTICESHIP TRAINING: If you want to become a lithographic machine-minder you need to register with an employer providing suitable training. Training consists of theoretical and practical work: - Theoretical training: At the Southern African Printing College (full-time) or through their Distance Learning Department (part-time). - Practical training: In-service training under supervision of a qualified tradesman (Competency-Based Modular Method). - Duration of course: 2 to 4 years depending on the experience of the candidate. - Final examination: A compulsory trade test set by the Department of Labour to qualify as an artisan. ADDITIONAL REQUIREMENTS: If you want to become a lithographic machine-minder you must be at least 16 years old. NOTE: Changes in the training of artisans are subject to the official approval of the Registrar of Labour Training. A new system of apprenticeship training will be introduced within the next few years. Each industry will make use of its own methods and time to implement the system.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A lithographic machine-minder should: - enjoy working with his hands; - work quickly and accurately even under pressure; - have some artistic ability; - be responsible; - have good work habits; - have an interest in mechanical and electro-technical matters.

Locksmith			
General Information			
Description – what is this occupation?			
A locksmith installs, repairs, changes and opens locks and combination locking mechanisms. As a locksmith, you will also make and duplicate keys.			
Typical Job Activities – what will I do in this occupation?			
In an emergency, for example when a customer is locked out of a car, home or office, you will have to pick the lock to retrieve keys left inside. You will be able to make duplicate keys by impression or key code. Combination locks are opened by touch or by use of a drill. Damaged locks are repaired by replacing tumblers, springs and other parts. The locksmith also recommends security measures such as periodical re-keying (changing the locking mechanism to fit new key codes) for businesses. Some locksmiths, known as protective signal repairers, install and repair burglar and fire alarm systems. Most locksmiths work irregular hours because they are on 24-hour emergency call. They therefore need to have their equipment with them at all times.			
Related Occupations – which occupations are more or less the same?			
- Business machine repairer - Instrument maker - Instrument mechanician - Instrument repairer - Jeweller - Radio and TV mechanic - Watch repairer			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 10 Certificate. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Trade Theory, Metalwork, Technika: Electronics			
Entry to Work Place			
TRAINING COURSE: A three module course is offered by the Locksmiths Association of South Africa. Each module is followed by a year practical training under the supervision of a qualified locksmith. REGISTRATION: After the course the candidate register with the Association as qualified locksmith.

Magistrate			
General Information			
Description – what is this occupation?			
The magistrate may be regarded as a general practitioner of the law. South Africa is divided into at least 550 magisterial districts.			
Typical Job Activities – what will I do in this occupation?			
Each district has a magistrate's court and is staffed with magistrates who are responsible for applying the law. The magistrate is not a civil servant and acts independently without interference from the government. The magistrate acts as the presiding officer in criminal and civil cases in a magistrate's (district) court or the regional court. A district court magistrate is also responsible for the administration of the law in his district. In criminal cases the magistrate is required to ensure that both the prosecutor and the defence attorney comply with the rules so that the accused gets a fair trial. You will listen to the evidence and decide whether the accused is guilty or not and impose penalties where needed. In civil cases the magistrate will listen to the evidence and make a civil judgement, which is aimed at restoring the position between the disputing parties. This may imply paying damages or refraining from certain conduct. Every region consists of a number of magisterial areas. If you are appointed as a regional magistrate you will adjudicate serious criminal cases such as rape, fraud, murder and culpable homicide. In cities and large towns the magistrate's judicial functions are more specialised. In country districts the magistrate often acts on behalf of other government departments. The magistrate acts as registrar of births and deaths, marries people, administers deceased estates and acts as receiver of revenue.			
Related Occupations – which occupations are more or less the same?			
- Advisor - Advocate - Attorney - Executor estates - Labour relations officer - Legal assistant/paralegal - Judge - State prosecutor			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption for a degree course. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Languages			
Entry to Work Place			
ADDITIONAL REQUIREMENTS: Before a prospective magistrate is permanently appointed, he must successfully complete a course at Justice College, the training Department of Justice, as well as six months practical training in a court.			

What level of natural skill and/or aptitude do I need for this occupation?				
Exceptionally High	High	Moderate	Low	
A magistrate should: - have a good knowledge of human behaviour; - be able to judge people correctly; - be agreeable and tolerant; - have a good general knowledge; - stay calm and objective; - be intelligent and able to reason logically; - be fluent in more than one official language; - be tactful and fair; - inspire confidence for a fair trial; - be intelligent.

Typical Job Activities – what will I do in this occupation?			
You will also carry out research on design, creation of character, period make-up and hairstyles for studio dramas, live theatre and film shots. The make-up artist considers the shape of the face, the bone structure, the form of the eyes and the complexion before applying the make-up. Special effects are created by tinting and bleaching the hair, make up and applying beards, moustaches and wigs, etc. Colouring materials, padding and prosthetic pieces are used to simulate wounds, cuts, scars and bruises or to create monstrous faces and hands. The make-up artist is required to remain on duty during productions to touch up actors' make-up. A specialist in special effects and prosthetics may become a make-up designer.

I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours	I like to work with nature	I like to work with animals	I like to be physical active

Marine Biologist			
General Information			
Description – what is this occupation?			
Marine biology is the science concerned with all aspects of plant and animal life in the sea.			
Typical Job Activities – what will I do in this occupation?			
The marine biologist studies the distribution, abundance, life histories and the environmental impact of animals and plants in the sea. The aim is to understand marine life and to ensure the production of food from the sea. The field of marine biology can be divided into research and technical work: - The researcher studies the marine system as a whole or focuses on a particular marine species. - A technical marine biologist is more involved in collecting samples, building and testing equipment and analysing data. The marine biologist is concerned with the effects of pollution on marine life, the effect of introducing commercially imported species into the waters, identifying ecologically sensitive areas and assisting in establishing the ecological effects of projects such as the construction of harbours and piers.

Market Researcher			
General Information			
Description – what is this occupation?			
A market researcher is concerned with the scientific accumulation, analysis and interpretation of marketing information.			
Typical Job Activities – what will I do in this occupation?			
You will help companies to improve their products and increase sales potential. The market researcher is concerned with the factors affecting marketing activities, which may vary widely. You will collect, analyse and interpret data to determine the appeal of products or services, study the effectiveness of company advertising and advise management on sales and distribution policies. The market researcher conducts surveys to determine the acceptability of new products. The products are compared with existing and competitive items, and suggestions are made for packaging and product names. You will also conduct detailed studies of sales records to determine peak periods and trends to help plan sales campaigns and set reasonable goals. The market researcher works closely with the marketing manager. You will provide the marketing manager with the information required for the decisions-making process. In some companies the marketing manager is also responsible for the market research portfolio.

Marketing Manager			
General Information			
Description – what is this occupation?			
A marketing manager promotes and sells a company's products and services to other businesses, merchants and institutions.			
Typical Job Activities – what will I do in this occupation?			
As a marketing manager you will need to be thoroughly familiar with the products or services you are promoting as well as with their use. You should also know the special needs of customers. You will be responsible for recruiting, selecting, appointing and motivating marketing personnel. You must know and apply marketing techniques such as advertising and display, market research and identification of marketing opportunities. You will work closely with the market researcher. The marketing manager is responsible for the formation of marketing divisions and the assignment of authority and responsibility for marketing tasks. Practically every type of manufacturer employs marketing managers and sales managers. Larger organisations employ specialists in various sub-fields of marketing management.

Masseur			
General Information			
Description – what is this occupation?			
The modern masseur is a highly-qualified professional and the work is very similar to that of a somatologist.			
Typical Job Activities – what will I do in this occupation?			
The main responsibility of a masseur is to massage customers and administer other body-conditioning treatments. The masseur uses either electronic vibrating equipment or manual techniques such as kneading, rubbing and stroking flesh to stimulate blood circulation, relax contracted muscles, relieve stress or pain and facilitate the elimination of waste matter. A masseur who has acquired skills in specialised massage techniques such as aromatherapy, reflexology and manual lymph drainage is able to serve a wider client base. The masseur also recommends a diet and exercise routines for clients.			
Related Occupations – which occupations are more or less the same?			
- Aerobics instructor - Aromatherapist - Beauty technologist - Fitness consultant - Health therapist - Reflexologist - Somatologist			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate for the technikon courses and full-time private-college courses. No specific requirements for part-time and correspondence courses. COMPULSORY SUBJECTS: Biology RECOMMENDED SUBJECTS: Physical Science			
Entry to Work Place			
Interest in the holistic approach to body and mind has led to recent changes to the curriculum of this course. The course now places greater emphasis on physical education, nutrition and stress management and less on aesthetic treatments such as make-up.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low

A masseur should: - have flexible hands and fingers; - have a pleasant personality and appearance; - have empathy and tact; - communicate well; - be enthusiastic; - inspire confidence; - be professional; - be able to work independently.

Materials Scientist			
General Information			
Description – what is this occupation?			
A materials scientist studies the structures and properties of various materials such as metals, alloys, ceramics, semiconductors and polymers.			
Typical Job Activities – what will I do in this occupation?			
The purpose of these studies is to understand and characterise materials and to develop new materials for commercial and scientific benefit. The financial yield of selling finished products is generally much higher than selling natural resources that are still in ore form. The primary function of the materials scientist is to find and develop creative and economical ways of converting natural resources into final products. This covers a very broad spectrum and the materials scientist performs a range of different functions in various industries. The materials scientist usually specialises in areas such as the following: - guiding technical staff in developing materials for a specific use in a projected product - mining and processing materials - extracting certain elements from minerals - processing minerals into materials such as metals, ceramics and plastics - using materials in engineering structures - disposing of waste materials - managing a furnace or rolling mill - conducting laboratory experiments in the production of materials to confirm the feasibility of processes and techniques for potential users.			
Related Occupations – which occupations are more or less the same?			
- Ecologist - Engineering geologist - Assayer and sampler - Extraction metallurgist - Geotechnician - Metallurgical engineer - Miner - Mineralogist - Mine surveyor - Mining engineer			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption for a degree course. Senior Certificate for a diploma course. COMPULSORY SUBJECTS: Mathematics, Physical Science RECOMMENDED SUBJECTS: None			
Entry to Work Place			
Applicable qualification			

What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A materials scientist should: - have scientific and mathematical aptitude; - have above-average intelligence; - have an analytical and practical inclination; - be able to conceptualise abstract ideas; - be highly motivated.			
Employment Indicators – what are the important employment facts regarding this occupation

Possible Employers – where do I find this occupation?						
Government (national, provincial, local councils and government related organisations like universities, semi-government, etc.	Big private companies	Medium or small companies	Own small business: Entrepreneurial opportunities in this field	Self-employed: Contractor, consultant, own practise, freelance		
- Iscor - Council for Mineral Technology - Eskom - CSIR - Samancor - Sasol - Anglo American - Rand Mines - Gencor - JCI - De Beers - Columbus Stainless Steel - Hulett Aluminium An experienced materials scientist can start his own business and work as a consultant, particularly in the fields of welding, casting, corrosion and failure analysis.						
Relevant Contact Details – where can I get more information on this occupation?						
Career Progress and Path						
Activities to enhance career progress – what can I do to improve my career progress in this occupation?						
Further Studies in the specific career field	Further studies in related fields	Experience in specific field	Work performance	Work performance	Do presentations, seminars, publish articles, etc.	General management studies
Possible career paths – which kind of career path can I follow in this occupation?						
Specialist career in the specific field	Management positions in the specific field	Management positions in related fields	General business management	Executive positions	Consultant/ contractor/ own practice/ freelance	Own business
Employment Stability						
Is the demand (the need) for this particular skills stable over the years?						
Exceptionally Stable		Very stable		Moderately stable		Not very stable
The need for people in this occupation and with these skills is influenced by:						
Government policy and legislation		Government strategy and activities		The growth of private companies (big and small)		
Technology		Direct consumer demands – “man in the street”		My own performance and skills		

Possible reasons to consider this career – I should consider this career if I want a job where:						
The need is determined by government	The need is determined by the consumers	The need is determined by private companies	The need is determined by new technology	I can start a business in this field or with these skills	The job is fairly stable	The job is ideal for becoming a general manager
I can be of service to people	I can work with my hands	I can design things	I can repair things	I can work with technology	I can create new things	I'll be able to learn new things on an ongoing basis
I can work with languages	I can work with people	I can make more money than the average person	I can do practical work and I do not have to study theories	I can study for a number of years and face intellectual challenges	Minimum or no qualifications are required	I can work for myself
I can work flexible hours	I can entertain people	I can work internationally	I can determine my own income	I am very interested in a specific subject or field	I can progress in the business world	I do not have to struggle with finding vacancies
I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours	I like to work with nature	I like to work with animals	I like to be physical active

Mathematician			
General Information			
Description – what is this occupation?			
A mathematician creates, investigates and analyses mathematical structures in order to solve and understand mathematical problems.			
Typical Job Activities – what will I do in this occupation?			
The mathematician tries to find solutions for problems within the medical, agricultural, engineering, industrial, genetic, financial and ecological fields. The work of the mathematician can be divided into two broad categories: - Theoretical Mathematics demands abstract thinking for the development of mathematical theories and methods. - Applied Mathematics involves mathematical modelling, numerical analyses and operational research. It forms a bridge between theory and practice and concentrates on solving problems.			
Related Occupations – which occupations are more or less the same?			
- Actuary - Auditor - Chartered accountant - Financial analyst - Mathematics teacher - Operations researcher - Statistician - Systems analyst - Valuer			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption. COMPULSORY SUBJECTS: Mathematics RECOMMENDED SUBJECTS: Physical Science			
Entry to Work Place			
UNIVERSITY: BSc, BCom or BA degree with Mathematics as major subject. The second major depends on the specialisation field e.g. humanities, statistics, actuarial or computer science. Post-graduate study: An honours degree in Mathematics is the minimum qualification for mathematicians. High level teaching and research require a master's or doctor's degree in Mathematics.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low

A mathematician should: - have mathematical aptitude; - enjoy solving problems and have good reasoning ability; - be imaginative; - be intellectually curious; - enjoy working with ideas; - be thorough and accurate; - be able to use calculating machines and computers.

Meat Examiner			
General Information			
Description – what is this occupation?			
A meat examiner inspects meat and carcasses destined for human and animal consumption. The meat examiner works in an abattoir under the supervision of a meat inspector or veterinarian.			
Typical Job Activities – what will I do in this occupation?			
The meat examiner: - assists the meat inspector by performing the actual inspection procedures as prescribed by law - draws the attention of the inspector to any irregularities - assists the inspector in the monitoring of the slaughtering process - ensures that the highest level of hygiene is maintained at all times in the abattoir.			
Related Occupations – which occupations are more or less the same?			
- Abattoir worker - Agricultural inspector - Customs and excise officer - Environmental health inspector - Meat-cutting technician - Meat inspector			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 10 Certificate. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: None			
Entry to Work Place			
IN-SERVICE TRAINING: The prospective meat examiner receives in-service training (80 days) at any A-grade abattoir under the supervision of a health inspector and a veterinarian. After this he can write the exams for the National Certificate for Meat Examiners.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A meat examiner should: - be responsible; - be precise and observant; - stand the sight of freshly slaughtered carcasses; - be conscious of hygiene in the handling of meat.

Medical and Scientific Illustrator			
General Information			
Description – what is this occupation?			
Medical and scientific illustrators combine their knowledge of the biological sciences with their artistic skills.			
Typical Job Activities – what will I do in this occupation?			
The medical and scientific illustrator makes illustrations of surgical procedures, human anatomy, plants and animals. These illustrations are used in audio-visual presentations for teaching and lecturing as well as medical and scientific handbooks. Medical and scientific illustrators also work for lawyers (producing exhibits in court cases) and doctors. They can also draw 'story-boards' that may serve as guides on movies or TV series, for example where actors are placed in an emergency room. Advanced computer software is used, which allows ideas to be presented on the Internet or e-mailed between clients. Medical and scientific illustrators often provide schools, hospitals and medical institutions with training-related posters, e.g. dentists' posters of tooth decay or gum infections or a clinic sister's illustrations of sexually transmitted diseases.			
Related Occupations – which occupations are more or less the same?

Medical Orthotist Prosthetist			
General Information			
Description – what is this occupation?			
A medical orthotist prosthetist designs and makes artificial limbs (prosthetics) and surgical appliances such as splints, braces and surgical shoes (orthotics).			
Typical Job Activities – what will I do in this occupation?			
The patient is measured to ensure that the new appliance or limb will fit perfectly. A cast is made of the applicable part of the patient's anatomy and the appliance or limb is constructed, using the cast as a point of measurement throughout the process. The medical orthotist prosthetist constructs the appliance or limb from a variety of materials, using a number of processes including sawing, drilling, riveting and moulding molten plastic. You will mix pigments to match the natural skin colour and apply the finished product to the artificial limb. You will then test the limb for freedom of movement and other functional efficiency. You will also fit and modify the finished product until the patient is satisfied. The medical orthotist prosthetist will spend some time with the patient, giving instructions on the proper use of the new appliance or limb.			
Related Occupations – which occupations are more or less the same?			
- Ambulance and emergency care worker - Chiropractor - Clinical technologist - Dental technician - Medical laboratory technologist - Medical representative - Occupational therapist - Physiotherapist			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate. COMPULSORY SUBJECTS: Physical Science, Biology RECOMMENDED SUBJECTS: Mathematics, Technical Drawing			
Entry to Work Place			
REGISTRATION: After complying with all the requirements for the diploma and successfully completing an internship of one year at an approved centre, the medical orthotist prosthetist has to apply for registration with the Interim National Medical and Dental Council of South Africa.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A medical orthotist prosthetist should: - have an empathy for the problems of disabled people; - be creative in helping them solve their problems; - inspire confidence; - have biomechanical insight; - be able to work with his hands as a large part of the job entails the actual construction of the limbs or appliances.

Income based on Performance What is the chance to improve my pay in this occupation through exceptional performance, skills or business ideas?				
Exceptionally High	High	Moderate	Low	
Self Employment Can I use this career to work for myself or to start a small company in this career field?				
Exceptionally High	High	Moderate	Low	
General Management Opportunities What is the potential to use this occupation as a platform to become a general manager in a medium to big company or organisation?				
Exceptionally High	High	Moderate	Low	
International Employment Market What is the chance of being able to use this career's qualifications and skills in the international labour market?				
Exceptionally High	High	Moderate	Low	
Possible Employers – where do I find this occupation?				
Government (national, provincial, local councils and government related organisations like universities, semi-government, etc.	Big private companies	Medium or small companies	Own small business: Entrepreneurial opportunities in this field	Self-employed: Contractor, consultant, own practise, freelance
- Orthopaedic workshops - Hospitals - Government departments - Private institutions A medical orthotist prosthetist can go into private practice on his own or with a partner.				
Relevant Contact Details – where can I get more information on this occupation?				

Career Progress and Path						
Activities to enhance career progress – what can I do to improve my career progress in this occupation?						
Further Studies in the specific career field	Further studies in related fields	Experience in specific field	Work performance	Work performance	Do presentations, seminars, publish articles, etc.	General management studies
Possible career paths – which kind of career path can I follow in this occupation?						
Specialist career in the specific field	Management positions in the specific field	Management positions in related fields	General business management	Executive positions	Consultant/ contractor/ own practice/ freelance	Own business
Employment Stability						
Is the demand (the need) for this particular skills stable over the years?						
Exceptionally Stable		Very stable		Moderately stable		Not very stable
The need for people in this occupation and with these skills is influenced by:						
Government policy and legislation		Government strategy and activities			The growth of private companies (big and small)	
Technology		Direct consumer demands – “man in the street”			My own performance and skills	
Possible reasons to consider this career – I should consider this career if I want a job where:						
The need is determined by government	The need is determined by the consumers	The need is determined by private companies	The need is determined by new technology	I can start a business in this field or with these skills	The job is fairly stable	The job is ideal for becoming a general manager
I can be of service to people	I can work with my hands	I can design things	I can repair things	I can work with technology	I can create new things	I'll be able to learn new things on an ongoing basis
I can work with languages	I can work with people	I can make more money than the average person	I can do practical work and I do not have to study theories	I can study for a number of years and face intellectual challenges	Minimum or no qualifications are required	I can work for myself
I can work flexible hours	I can entertain people	I can work internationally	I can determine my own income	I am very interested in a specific subject or field	I can progress in the business world	I do not have to struggle with finding vacancies
I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours	I like to work with nature	I like to work with animals	I like to be physical active

Medical Physicist			
General Information			
Description – what is this occupation?			
The medical physicist specialises in applying physics to medicine.			
Typical Job Activities – what will I do in this occupation?			
You will provide a professional service in medical physics, consult with physicians, conduct multi-disciplinary research and teach physics to medical students and other medical staff. Medical physics can be sub-divided into three different applications: - Radiotherapy is the treatment of patients with malignant conditions such as cancer by the application of ionising radiations. The medical physicist is responsible for ensuring that the correct dose is delivered accurately. - In nuclear medicine radionuclides are used to diagnose diseases. A patient is given prescribed quantities of radionuclides and images of his organs are obtained by means of a computerised scintillation camera. The information obtained assists in diagnosing the patient's disease. The medical physicist works closely with a nuclear medicine physician to develop new and improved techniques of assessing organs. - A medical physicist working in diagnostic radiology must ensure that the x-ray equipment complies with safety standards, that optimal exposure techniques are used and that patients and staff are not exposed to more radiation than is absolutely necessary.			
Related Occupations – which occupations are more or less the same?			
- Biomedical engineer - EEG technician - Medical doctor - Medical laboratory technologist - Nuclear scientist - Radiation protection specialist - Radiographer - Physicist			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption. COMPULSORY SUBJECTS: Mathematics, Physical Science RECOMMENDED SUBJECTS: Biology			

Entry to Work Place			
UNIVERSITY: BSc degree majoring in Physics. Post-graduate study: BSc (Hons) degree in Medical Physics. Practical training: After the Honours degree the candidate must follow experiential training (2 years) at a recognised institution, during which he is usually employed by a hospital. The Universities of Cape Town, Orange Free State, Stellenbosch, Witwatersrand and Medunsa are recognised by the HPCSA for this training. REGISTRATION: To practise as a medical physicist, registration with the Health Professions Council of South Africa (HPCSA) is required.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A medical physicist should: - have above-average intelligence; - be responsible; - work very accurate; - be able to make quick and appropriate decisions under stress; - be interested in the practical application of science to medicine; - enjoy working with sick people			
Employment Indicators – what are the important employment facts regarding this occupation			
Employment Opportunities in South Africa for this Career

Medical Representative			
General Information			
Description – what is this occupation?			
As a medical representative your main function will be to market the medicines, diagnostic tests, dressings and other medical supplies manufactured by the pharmaceutical company where you are employed.			
Typical Job Activities – what will I do in this occupation?			
You will need to set up a disciplined and structured calling system to enable you to pay regular calls to doctors, pharmacies and hospitals, since the professionals who will prescribe and dispense your products is your target market. Increasing the size of the client base is an important aspect of this job. The medical representative needs to build brand loyalty to ensure that products (that have taken several years and a great deal of expense to develop) are continuously prescribed. You will also have to create brand awareness for new medicines and introduce them in a highly competitive market - a market that is also fraught with controversial issues such as the possible introduction of policies to enforce the use of generic medicines in state medical institutions.			
Related Occupations – which occupations are more or less the same?			
- Insurance agent - Sales representative - Marketing manager and researcher - Merchandise planner			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Biology, Physical Science			
Entry to Work Place			
TECHNIKON: A technikon qualification is not essential, but the field is highly competitive and graduates stand a better chance of landing the best jobs. IN-SERVICE TRAINING: All employers offer a short, but intensive in-service training course, which covers selling skills and basic Anatomy, Physiology, Disease and Medicine. Medical advisors at pharmaceutical companies train medical representatives on a regular basis in respect of new products.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low

A medical representative should: - have good interpersonal skills and persuasive ability; - have organisational skills; - be self-motivated; - be willing to keep learning to keep up with developments in a very dynamic industry; - have an interest in and knowledge of the medical field; - have a healthy self-esteem and confidence in himself (dealing with highly-trained professionals with stringent time pressures).

I can work with languages	I can work with people	I can make more money than the average person	I can do practical work and I do not have to study theories	I can study for a number of years and face intellectual challenges	Minimum or no qualifications are required	I can work for myself
I can work flexible hours	I can entertain people	I can work internationally	I can determine my own income	I am very interested in a specific subject or field	I can progress in the business world	I do not have to struggle with finding vacancies
I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours	I like to work with nature	I like to work with animals	I like to be physical active

Meteorologist			
General Information			
Description – what is this occupation?			
Weather and climate play a fundamental role in people's lives. The SA Weather Bureau aims at rendering an efficient service to the people.			
Typical Job Activities – what will I do in this occupation?			
In this century of rapid technological development, equipment with an increasing degree of sophistication (meteorological satellites, automatic weather stations and powerful electronic data processing systems) is being used to capture and process meteorological data. The meteorologist is responsible for the operation of these computerised systems. You will have to ensure that the Weather Bureau keeps pace with scientific and technological developments, that high standards are maintained and that it's staff receives the necessary training. The meteorologist must therefore be well trained academically and be conversant with meteorological practice. A meteorologist usually specialises in one of the following disciplines: - dynamic and synoptic meteorology - numerical weather prediction - physical meteorology - the microphysics of clouds - climatology.			
Related Occupations – which occupations are more or less the same?			
- Astronomer - Ecologist - Geographer - Geohydrologist - Geologist - Hydrologist - Meteorological instrument technician - Meteorological technician - Oceanographer			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption. COMPULSORY SUBJECTS: Mathematics, Physical Science RECOMMENDED SUBJECTS: Geography			
Entry to Work Place			
UNIVERSITY: BSc with appropriate subjects. - Practical training: A candidate must undergo practical training under the supervision of a senior officers at the Weather Bureau. Training consists of weather observation, operating meteorological instruments and weather forecasting. Post-graduate study: BSc Honours degree with Applied Mathematics, Mathematics, Physics or Mathematical Statistics is required to become a professional meteorologist.			

What level of natural skill and/or aptitude do I need for this occupation?				
Exceptionally High	High	Moderate	Low	
A meteorologist should: - be curious and imaginative; - be able to communicate clearly in both speech and writing; - have good judgement; - be responsible; - be able to concentrate; - have a mathematical and scientific aptitude.				
Employment Indicators – what are the important employment facts regarding this occupation

I can work flexible hours	I can entertain people	I can work internationally	I can determine my own income	I am very interested in a specific subject or field	I can progress in the business world	I do not have to struggle with finding vacancies
I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours	I like to work with nature	I like to work with animals	I like to be physical active

Meter-reader			
General Information			
Description – what is this occupation?			
A meter-reader records data from meters to determine the amount of electricity and water used by consumers.			
Typical Job Activities – what will I do in this occupation?			
The data taken from the meters are recorded in a route book. An average is calculated if a meter cannot be reached. At the end of the day the route books are returned to the office so that accounts may be prepared from the information recorded. The meter-reader also turns water and electricity services on and off when necessary.			
Related Occupations – which occupations are more or less the same?			
- Line-installer-repairer - Maintenance mechanic - Machine operator - Machine worker - Mail handler - Projectionist			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 8 Certificate is the minimum entry requirements. Grade 10 Certificate for appointment as an assistant chief inspector and chief inspector. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Mathematics			
Entry to Work Place			
IN-SERVICE TRAINING: The meter reader receives in-service training at the different engineering departments where the meters are manufactured. On rounds the meter reader works with a senior meter inspector until he is well acquainted with his task.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A meter-reader should: - enjoy detailed work; - work well without supervision; - be accurate and observant; - be amiable and able to communicate well; - have stamina and be in good health; - have good eye-hand co-ordination.

Microbiologist			
General Information			
Description – what is this occupation?			
A microbiologist studies the anatomy, genetics, physiology and environmental interaction of micro-organisms (bacteria, fungi, viruses).			
Typical Job Activities – what will I do in this occupation?			
This knowledge is used to manipulate selected micro-organisms to improve the quality of human life. The tasks of the microbiologist are determined by the employer. He may: - study the appearance and activities of harmful organisms in food to determine whether these foodstuffs are fit for human consumption - try to isolate an organism responsible for causing a certain disease and, after research, try to develop a vaccine to prevent the disease, or antibiotics to treat it - be involved in the manufacturing of chemicals - conduct product and process control - try to find solutions for fresh water pollution - be involved in the control of unwanted microbic activities which cause losses e.g. degrading aviation fuel, corroding iron tubing and breaking down textile products.			
Related Occupations – which occupations are more or less the same?			
- Agricultural Scientist - Botanist - Entomologist - Horticulturist - Medical technologist - Pharmacist - Physicist - Zoologist			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption for a degree course. Senior Certificate for a diploma course. COMPULSORY SUBJECTS: Mathematics, Physical Science RECOMMENDED SUBJECTS: Biology			
Entry to Work Place			
UNIVERSITY: BSc or BSc (Agric) degree with Microbiology as a major and supporting courses in subjects such as Chemistry, Biochemistry, Physics, Biology, Mathematics, Statistics. Post-graduate study: Advanced study is required for teaching posts at universities and for research and administration.			

What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A microbiologist should: - be imaginative and curious; - have good judgement; - be alert; - be precise and methodical; - work well with details; - be patient and have perseverance; - be able to work independently and as part of a team.

Midwife			
General Information			
Description – what is this occupation?			
A midwife is a nurse who specialises in the care of maternity patients and the delivery of babies.			
Typical Job Activities – what will I do in this occupation?			
In the past, the midwife worked largely under the supervision of a gynaecologist, but the country's shortage of qualified medical personnel has facilitated a move towards greater independence and authority in the case of healthy pregnancies and problem-free deliveries. The midwife refers a patient to a gynaecologist when problems in a pregnancy are diagnosed. If complications arise during a delivery, the midwife has to administer stipulated emergency measures and arrange for the immediate assistance of a gynaecologist. Duties that a midwife can be expected to perform include: - examining patients during pregnancy and advising them in respect of diet and healthy practices - initial examination of maternity patients which have just been admitted to hospital - staying with patients during labour to reassure them and administer medication - delivery of babies and postpartum examinations and treatment of mothers and babies - calling on mothers after delivery to conduct examinations - instructing mothers on how to care for themselves and their new babies.			
Related Occupations – which occupations are more or less the same?			
- Childcare educator - Family planning community worker - Gynaecologist - Industrial nurse - Nurse - Nursing auxiliary - Paediatrician - Social worker			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption for a degree course. Senior Certificate for a diploma course. COMPULSORY SUBJECTS: Mathematics, Physical Science (for the degree course) RECOMMENDED SUBJECTS: Mathematics, Physical Science, Biology			
Entry to Work Place			
NOTE: For more information refer to the alphabetical list of occupations to find the job description of Nurse. ADDITIONAL TRAINING: To qualify as a midwife the basic nursing training as well as an advanced diploma in Midwifery is necessary.			

What level of natural skill and/or aptitude do I need for this occupation?				
Exceptionally High	High	Moderate	Low	
A midwife should: - be in good health and physical fit; - have patience and tact; - have common sense and be able to make practical decisions quickly; - be responsible and inspire confidence; - be dedicated; - have a sense of humour; - have a positive attitude; - motivate and relax mothers-to-be facing labour; - be able to work comfortably with different personalities who are under stress; - possess the mental stamina to cope with the responsibility of having to make "life-and-death" decisions from time to time.

Miller			
General Information			
Description – what is this occupation?			
The miller is responsible for the processing of different types of grain, particularly wheat and maize.			
Typical Job Activities – what will I do in this occupation?			
The wheat milling process consists of three stages, each with its specific type of machinery. The breaking, scraping and reduction processes take place during these stages. The process of maize milling is much the same as that of wheat, but not as many production stages are required. To ensure that the correct standard and quality is maintained, the miller has to test the products. In addition the miller supervises the work of mill workers. Today the milling process is highly mechanised. The task of the miller consists chiefly of setting milling machines and supervising their operation. It is important that millers obey all the relevant health regulations. This will ensure a food product of the highest quality.			
Related Occupations – which occupations are more or less the same?			
- Baker - Food technologist - Grain grader - Machine-minder - Machine operator - Machine worker			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 10 Certificate. Some employers prefer higher qualifications. COMPULSORY SUBJECTS: Mathematics, Physical Science RECOMMENDED SUBJECTS: None			
Entry to Work Place			
If you want to become a miller you need to register with an employer providing suitable training. Training consists of theoretical and practical work: - Theoretical training: A correspondence course in Grain Milling Technology offered by the Grain Milling Federation. - Practical training: In-service training under supervision of a qualified tradesman. - Duration of course: 2 years. - Final examination: A trade certificate is issued by the Grain Milling Federation. ADVANCE TRAINING: Further training is available for the worker interested in management.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low

A miller should: - be neat; - be accurate; - be alert and careful; - show a sense of responsibility; - have a certain amount of mechanical insight; - have manual dexterity; - have good eye-hand co-ordination; - have good vision and colour discrimination; - be in good health; - be relatively strong.

Millwright/Electromechanician			
General Information			
Description – what is this occupation?			
A millwright/electromechanician installs and maintains heavy machinery used in the industry.			
Typical Job Activities – what will I do in this occupation?			
Maintenance work is performed on production machines, electrically driven machines and electronic control gear. The work of the millwright is both mechanical and electrical. It involves dismantling, fault detection, repairing and in some cases manufacturing of parts, as well as the maintenance, reconstruction and installation of machinery. With modern development towards automation, this trade also requires knowledge of electronics as applied in the control of heavy electrically driven equipment. A millwright must have a thorough knowledge of the manufacturing of machine components. Although fault detection will be one of your major responsibilities, you will also be concerned with the installation of new machinery. This requires specialised knowledge of fitting. A millwright is also involved in electrical installation. You will dismantle electric motors, tests them, check their wiring and determine their power output and consumption. A millwright usually works in the production section of factories, but sometimes has to perform tasks on site.			
Related Occupations – which occupations are more or less the same?			
- Aircraft engine fitter - Construction electrician - Electrician - Electronics mechanician - Fitter and turner - Lift mechanic - Motor mechanic - Refrigeration mechanic - Fuel injection mechanic			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 9 Certificate. Some employers prefer higher qualifications. COMPULSORY SUBJECTS: Mathematics RECOMMENDED SUBJECTS: Physical Science, Trade Theory, Technika: Electrical, Technika: Mechanical, Technical Drawing			

Entry to Work Place			
APPRENTICESHIP TRAINING: If you want to become a millwright you need to register with an employer providing suitable training. Training consists of theoretical and practical work: - Theoretical training: At a technical(FET) college or a correspondence course at Technisa (N3 level). - Practical training: In-service training under supervision of a qualified tradesman. - Duration of course: 3 to 5 years depending on the experience of the candidate. - Final examination: A compulsory trade test set by the Department of Labour to qualify as an artisan. ADDITIONAL REQUIREMENTS: If you want to become a millwright you must be at least 16 years old. NOTE: Changes in the training of artisans are subject to the official approval of the Registrar of Labour Training.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A millwright should: - be responsible; - have initiative; - enjoy working with his hands; - have mechanical aptitude; - have perseverance; - remember details; - have manual dexterity; - be healthy and strong; - have good eye-hand co-ordination; - broaden his field of knowledge.			
Employment Indicators – what are the important employment facts regarding this occupation			
Employment Opportunities in South Africa for this Career			
Exceptionally High	High	Moderate	Low
Supply of People			
The number of people with the qualifications, skills (able to do it) or interest in this career, that I have to compete with			
Exceptionally High number of people	High number of people	Moderate number of people	Low number of people
Income Potential			
Estimated average income for people in this occupation (excluding extreme examples of high or low income):			
R300 000+per year	R144 000 - R300 000	R60 000 - R144 000	R 60 000 per year
Income based on Performance			
What is the chance to improve my pay in this occupation through exceptional performance, skills or business ideas?			
Exceptionally High	High	Moderate	Low
Self Employment			
Can I use this career to work for myself or to start a small company in this career field?			
Exceptionally High	High	Moderate	Low
General Management Opportunities			
What is the potential to use this occupation as a platform to become a general manager in a medium to big company or organisation?			
Exceptionally High	High	Moderate	Low
International Employment Market			
What is the chance of being able to use this career's qualifications and skills in the international labour market?			
Exceptionally High	High	Moderate	Low

Possible Employers – where do I find this occupation?						
Government (national, provincial, local councils and government related organisations like universities, semi-government, etc.	Big private companies	Medium or small companies	Own small business: Entrepreneurial opportunities in this field	Self-employed: Contractor, consultant, own practise, freelance		
- Machinery manufacturers - Manufacturers of transportation equipment - Manufacturers of metal, paper, steel, and chemical products - Construction industry - Manufacturers and installers of electrical equipment - Government departments - Municipalities - Mines - Iscor - Eskom - Sasol - CSIR - Atomic Energy Corporation						
The millwright with the necessary experience and capital, can start his own business.						
Relevant Contact Details – where can I get more information on this occupation?						
- The Liaison Officer, SEIFSA, P.O. Box 1338, Johannesburg, 2000. Tel: (011) 8336033. - The Metal and Engineering Industries Education and Training Board, P.O. Box 61826, Marshalltown, 2107. Tel: (011) 4921533.						
Career Progress and Path						
Activities to enhance career progress – what can I do to improve my career progress in this occupation?						
Further Studies in the specific career field	Further studies in related fields	Experience in specific field	Work performance	Work performance	Do presentations, seminars, publish articles, etc.	General management studies
Possible career paths – which kind of career path can I follow in this occupation?						
Specialist career in the specific field	Management positions in the specific field	Management positions in related fields	General business management	Executive positions	Consultant/ contractor/ own practice/ freelance	Own business
Employment Stability						
Is the demand (the need) for this particular skills stable over the years?						
Exceptionally Stable		Very stable		Moderately stable		Not very stable
The need for people in this occupation and with these skills is influenced by:						
Government policy and legislation		Government strategy and activities		The growth of private companies (big and small)		
Technology		Direct consumer demands – “man in the street”		My own performance and skills		

Possible reasons to consider this career – I should consider this career if I want a job where:						
The need is determined by government	The need is determined by the consumers	The need is determined by private companies	The need is determined by new technology	I can start a business in this field or with these skills	The job is fairly stable	The job is ideal for becoming a general manager
I can be of service to people	I can work with my hands	I can design things	I can repair things	I can work with technology	I can create new things	I'll be able to learn new things on an ongoing basis
I can work with languages	I can work with people	I can make more money than the average person	I can do practical work and I do not have to study theories	I can study for a number of years and face intellectual challenges	Minimum or no qualifications are required	I can work for myself
I can work flexible hours	I can entertain people	I can work internationally	I can determine my own income	I am very interested in a specific subject or field	I can progress in the business world	I do not have to struggle with finding vacancies
I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours	I like to work with nature	I like to work with animals	I like to be physical active

Mine Surveyor			
General Information			
Description – what is this occupation?			
A mine surveyor undertakes underground and surface surveys to produce information for the construction of mine plans.			
Typical Job Activities – what will I do in this occupation?			
The mine surveyor uses advanced surveying techniques and instruments to determine the direction and extent of all the underground workings of a mine. You will have to plot these and keep them up-to-date, so that surface officials and management can pinpoint any spot underground at any given time. The mine surveyor is also responsible for measuring the areas and volumes blasted by the underground crew. Taking ore samples to establish which areas are the most profitable to mine is also part of the mine surveyor's duties. The mine surveyor performs the practical underground work in the mornings and spends the afternoons on the surface, assimilating the findings and doing the necessary calculations.			
Related Occupations – which occupations are more or less the same?			
- Assayer and sampler - Geologist - Geotechnologist - Land surveyor - Miner - Mineralogist - Mining assistant - Mining engineer - Topographical and engineering surveyor			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate. COMPULSORY SUBJECTS: Mathematics, Physical Science RECOMMENDED SUBJECTS: Geography, Computer Studies			
Entry to Work Place			
IN-SERVICE TRAINING: Government Mine Surveyor's Certificate of Competency: 18-month practical and theoretical in-service training. ADDITIONAL REQUIREMENTS: The mine surveyor must obtain a Certificate of Fitness (also called 'Red Ticket'), which declares him fit for work underground.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low

A mine surveyor should: - work accurately; - have an aptitude for figure work; - be honest; - have integrity; - be physical fit.

Miner			
General Information			
Description – what is this occupation?			
As a miner you will work underground where you will supervise drilling, blasting and rock-clearing operations to extract minerals.			
Typical Job Activities – what will I do in this occupation?			
The ore is moved to the surface by means of rails and hoisting apparatus. Mining also takes place on the surface in open-cast mines. Here large earth-moving machines and ore carriers are used to remove minerals. A miner is usually in charge of about 40 mineworkers. You have to plan and organise their work and you are also responsible for their safety. The mineworkers load the material onto mine cars or conveyors, and install timber, roof bolts or cribs to support walls and roofs of mines. Some miners open up passageways, air vents, auxiliary tunnels, rooms and shafts.			
Related Occupations – which occupations are more or less the same?			
- Assayer and sampler - Construction worker - Crane operator - High speed developer (tunnelling) - Mining assistant - Mining engineer - Mine surveyor - Shaft sinker - Surface blasting contractor			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 10 Certificate. For advancement to managerial positions, a Senior Certificate is necessary. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Mathematics, Physical Science, African Languages			
Entry to Work Place			
IN-SERVICE TRAINING: Permanent Blasting Certificate: - Duration of course: 12 months. - Contents of course: -- Rock-breaking. -- People management. -- Safety and health education. -- Productivity and cost effectiveness. -- Communication skills. FURTHER TRAINING: Mine Overseer's Certificate of Competency: - To obtain this Certificate a miner must be a shift overseer for a few years.			

What level of natural skill and/or aptitude do I need for this occupation?				
Exceptionally High	High	Moderate	Low	
A miner should: - enjoy working with his hands; - be safety conscious; - have leadership characteristics; - have good health and physical stamina; - have dexterity and co-ordination; - have quick reflexes; - have good vision; - not be afraid of enclosed areas.

Mineralogist			
General Information			
Description – what is this occupation?			
A mineralogist studies minerals in terms of their form, crystalline structure and physical and chemical properties.			
Typical Job Activities – what will I do in this occupation?			
The mineralogist applies his knowledge in the fields of: - geological exploration - metallurgical extraction - civil engineering - fire-resisting materials industry - ceramic manufacture - cement production - building research. Petrographic microscopes are used in the research for, and analysis minerals or finely ground mineral powders. If microscopic analysis does not give exhaustive results, x-ray apparatus and electron micro-analysis are used.			
Related Occupations – which occupations are more or less the same?			
- Chemist - Geographer - Geologist - Geophysicist - Hydrogeologist - Jeweller - Materials scientist - Metallurgist - Meteorologist - Palaeontologist - Physicist			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption for a degree course. Senior Certificate for a diploma course. COMPULSORY SUBJECTS: Mathematics, Physical Science RECOMMENDED SUBJECTS: Geography, Economics			

Entry to Work Place			
UNIVERSITY: BSC degree with Chemistry and Geology as major subjects. Post-graduate training: For researchers at least an Honours degree in Geology (with specialisation in Mineralogy) is required. Only a few universities offer Mineralogy as a subject. A Masters degree in Mineralogy is recommended. REGISTRATION: Registration with the South African Council for Natural Scientists (SACNAS) is required.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A mineralogist should: - have patience and perseverance; - be attentive; - be systematic; - be inquisitive and curious; - have an open mind and be intuitive; - have good vision; - like to make observations; - be able to communicate clearly in speech and in writing.			
Employment Indicators – what are the important employment facts regarding this occupation

Mining Assistant			
General Information			
Description – what is this occupation?			
The mining assistant performs a variety of duties underground in a mine as well as on the surface.			
Typical Job Activities – what will I do in this occupation?			
The mining assistant may: - erect and break down scaffolding at a construction site on the mine - collect waste material - help with the laying on of pipes and cables - do brickwork - transport materials and equipment to and from the workplace - load and unload crates - install, maintain and despatch mechanical and electrical machinery under supervision of trained operators - maintain the premises and gardens of the mine.			
Related Occupations – which occupations are more or less the same?			
- Blacksmith - Bricklayer - Farm worker - Gardener - Labourer - Miner			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
No specific requirements. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: None			
Entry to Work Place			
IN-SERVICE TRAINING: The mining assistant receives training on the job. Working experience is gained over a period of time.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A mining assistant should: - enjoy working with his hands; - be safety conscious; - have good health and physical stamina; - be trustworthy; - be responsible; - not be afraid of enclosed areas; - maintain good interpersonal relations.

I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours	I like to work with nature	I like to work with animals	I like to be physical active

Model			
General Information			
Description – what is this occupation?			
A model wears and displays the latest fashion designs and cosmetics. Models can be male or female.			
Typical Job Activities – what will I do in this occupation?			
Modelling agencies also use children as models to advertise their products.			
A model can specialise in live or photographic modelling. A live model appears in front of audiences (potential customers) wearing the latest styles of designers, manufacturers or retail shops while a compère describes the garments. A photographic model works in front of the camera wearing the garments or cosmetics being promoted.			
A model can also appear in television commercials, demonstrate new products or services at exhibitions or trade shows or pose for an artist who makes drawings to be used in advertisements.			
Related Occupations – which occupations are more or less the same?			
- Actress - Fashion director - Photographer - Sales representative - Stage manager - Television presenter			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
No specific requirements. Senior Certificate is recommended. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Art, Speech and Drama, Dance			

Entry to Work Place			
MODEL SCHOOLS AND AGENCIES: Leading mannequin schools and agencies are situated in Johannesburg, Cape Town, Pretoria and Durban. The prospective fashion model is required to follow both photographic, model and mannequin courses, as versatility is the most important thing about modelling in South Africa. Nature of training: Training involves deportment, poise, grooming, social etiquette, clothes sense and wardrobe planning, make-up and skin care, as well as modelling (photographic, wholesale, retail and ramp). Duration of course: Usually takes two months. REGISTRATION: No special licensing or certification is required. After a person has been trained as a fashion model registration as professional model with an established model agency is recommended. ADVANCE TRAINING AT A TECHNIKON OR UNIVERSITY: Technikon and university training in the areas of drama, art and clothing design is helpful in developing poise and a sense of style.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A model should: - be photogenic; - have natural attractiveness and charm; - maintain excellent health and have good physical stamina; - enjoy working together with people; - be imaginative and creative; - work well under pressure; - have initiative and self-confidence; - have poise and a sense of style. The required height of a female model is between 1,7 and 1,82 metres while a male model should not be shorter than 1, 75m.

I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours			

Moulder			
General Information			
Description – what is this occupation?			
A moulder casts molten metal into moulds to produce solidified castings.			
Typical Job Activities – what will I do in this occupation?			
A moulder prepares and shapes the sand in which the mould is to be formed. You will prepare the core (inside) of the casting by means of a core box. Then you will place the pattern into the moulding box and pack sand firmly around the pattern to impress its form in the sand. The top faces are covered by moulding boxes. Heavy castings are formed by holes being dug in the ground and lined with sand or brickwork. The pattern is then removed and the mould dusted. When dry, molten metal is poured through runners into the mould. After the cast metal has cooled down, the mould is broken away and the edges of the solidified casting are smoothed, before it is finally machined. The moulder works most of the time in foundries. You will have to see that the moulds are of high standard as they will be exposed to very high temperatures and pressure during the moulding process.			
Related Occupations – which occupations are more or less the same?			
- Blacksmith - Printing and newspaper industry worker - Quarry face stripper - Railway ballast man - Road surfacing man - Rigger - Sand clump worker			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 9 Certificate. Some employers prefer higher qualifications. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Trade Theory, Mathematics			

Entry to Work Place			
APPRENTICESHIP TRAINING: If you want to become a moulder you need to register with an employer providing suitable training. - Theoretical training: At a technical(FET) college or a correspondence course at Technisa. - Practical training: At an accredited training centre. - In-service training: Under supervision of a qualified tradesman. - Duration of course: 4 years but it can be completed in a shorter period provided that the candidate has higher educational qualifications. - Final examination: A compulsory trade test set by the Department of Labour to qualify as an artisan. ADDITIONAL REQUIREMENTS: If you want to become a moulder you must be at least 16 years old. NOTE: Changes in the training of artisans are subject to the official approval of the Registrar of Labour Training. A new system of apprenticeship training will be introduced within the next few years. Each industry will make use of its own methods and time to implement the system.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A moulder should: - enjoy working with his hands; - have a feeling for forms and structure; - have an aptitude for Mathematics; - read three-dimensional drawings; - be practical; - work accurately; - be patient; - have good health and stamina and average physical strength; - have good co-ordination; - have good eyesight.

The need is determined by government	The need is determined by the consumers	The need is determined by private companies	The need is determined by new technology	I can start a business in this field or with these skills	The job is fairly stable	The job is ideal for becoming a general manager
I can be of service to people	I can work with my hands	I can design things	I can repair things	I can work with technology	I can create new things	I'll be able to learn new things on an ongoing basis
I can work with languages	I can work with people	I can make more money than the average person	I can do practical work and I do not have to study theories	I can study for a number of years and face intellectual challenges	Minimum or no qualifications are required	I can work for myself
I can work flexible hours	I can entertain people	I can work internationally	I can determine my own income	I am very interested in a specific subject or field	I can progress in the business world	I do not have to struggle with finding vacancies
I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours	I like to work with nature	I like to work with animals	I like to be physical active

Navigator			
General Information			
Description – what is this occupation?			
The main responsibility of a navigator is to locate the position of other aircraft and to direct the course of the aeroplane.			
Typical Job Activities – what will I do in this occupation?			
The navigator uses navigational aids such as charts, radar, compasses, navigation computers and sophisticated electronic equipment. The career of the navigator consists of the following specialisation areas: - Assault navigator whose primary task is to trace hostile aircraft. - Maritime navigator who watches over the coastline. - Reconnaissance navigator whose main responsibility is to locate enemy aircraft without the enemy knowing that it is being watched. - Airborne navigator who needs to pin-point landing sites for parachutists.			
Related Occupations – which occupations are more or less the same?			
- Aeronautical engineer - Aircraft avionician - Air-traffic controller - Civilian pilot - Flight engineer - Military pilot - Navigating officer			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption. COMPULSORY SUBJECTS: Mathematics RECOMMENDED SUBJECTS: Physical Science, Geography, Computer Science			
Entry to Work Place			
SOUTH AFRICAN AIR FORCE: Basic Navigator Course (18 months) comprising 3 phases, namely: - Regimental training. - Officers' formative course. - Navigation training. The prospective navigator in the SAAF must: - be fully bilingual; - between 17 and 25 years of age; - undergo a strict selection process, which includes a medical and psychological evaluation. ADVANCE TRAINING: The Military Academy at Saldanha offers degree courses in collaboration with the University of Stellenbosch. The student can enrol on completion of the Basic Navigator Course.			

What level of natural skill and/or aptitude do I need for this occupation?				
Exceptionally High	High	Moderate	Low	
A navigator should: - be interested in electronics, science and aeroplanes; - have a sharp mind; - be able to make accurate decisions quickly; - be able to remain calm under extremely stressful conditions; - demonstrate leadership abilities; - have good interpersonal skills.				
Employment Indicators – what are the important employment facts regarding this occupation

I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours			

News Reporter			
General Information			
Description – what is this occupation?			
A news reporter collects and gathers information about newsworthy events in order to write stories for publication or broadcast.			
Typical Job Activities – what will I do in this occupation?			
News media broadly fall into two categories and a reporter will generally specialise in one or the other: - print media, which include newspapers and magazines - digital publishing on the World Wide Web and broadcast media, which cover radio and television. As a reporter you will start out by reporting on general news, such as court cases or crime. As you become more experienced you will move on to specialised areas such as sport or politics. News reporting offers a wide range of possibilities, depending on the reporter's temperament. One can opt for the high-pressure 'buzz' of a daily newspaper, for feature writing for magazines, for sub-editing and layout or even (if action is what you really want) broadcast reporting from war zones.			
Related Occupations – which occupations are more or less the same?			
- Advertising agent - Cameraman - Editor - Journalist - Producer - Public relations officer - Radio announcer - Television presenter - Television producer			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption for a degree course. Senior Certificate for a diploma course. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: History, Languages			
Entry to Work Place			
An academic background is preferred but is not essential. The training of a news reporter can be divided into two categories: career-orientated programs and broad communication courses. A tertiary student is trained within the career-orientated programs where theoretical training is combined with practical training. IN-SERVICE TRAINING: In-service training is also offered.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low

A news reporter should:

- have a 'nose for news';
- have an enthusiastic curiosity about people and events;
- have well-developed writing and communication skills;
- be objective;
- be persistent;
- have initiative;
- be creative and resourceful;
- have a good memory;
- have physical stamina and emotional stability to deal with pressing deadlines, long and irregular hours and sometimes disturbing, possibly even dangerous assignments;
- be at ease on camera (broadcast reporter);
- be at ease in unfamiliar places with all kinds of people.

Nuclear Scientist			
General Information			
Description – what is this occupation?			
The field in which the nuclear scientist works covers a broad range of activities, from designing and monitoring nuclear power plants to developing medicines and equipment.			
Typical Job Activities – what will I do in this occupation?			
The work is seldom routine and calls for a high degree of original thought. It is also highly complex, entailing the use of very sophisticated electronic equipment and computer-controlled systems. The work of the nuclear scientist includes basic and applied research in nuclear physics and chemistry, radiation physics and biophysics, medical physics, health physics and nuclear energy. The nuclear scientist works with the production of radioactive isotopes (radioisotopes) by means of nuclear reactors or large accelerators. The most suitable nuclear reaction with the minimum amount of unwanted radioactivity is determined. Radioisotopes can be used in: - diagnostic nuclear medicine - treatment of cancer - sterilising medical equipment - tracing the movement of air, tides, sea currents and sand (this can be used in industry to control aspects such as the release of industrial gases in the atmosphere) - the extension of the shelf-life of fresh products. The nuclear scientist is also involved in: - the purification of irradiated material - development of techniques to analyse samples which are of industrial, mining, geological or archaeological interest - the observation, measurement and control of radioactivity and radiation.			
Related Occupations – which occupations are more or less the same?			
- Biokineticist - Biomedical engineer - Medical physicist - Physicist - Physiologist - Radiation protection specialist - Radiographer			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption. COMPULSORY SUBJECTS: Mathematics, Physical Science RECOMMENDED SUBJECTS: None			

Entry to Work Place			
UNIVERSITY: BSc degree majoring in Physics and Chemistry or Physics and Mathematics. Post-graduate study: BSc Honours degree specialising in Physics, Chemistry or other relevant fields. An MSc or PhD is recommended, especially for a career in research.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A nuclear scientist should: - have high aptitude in Mathematics and Physical Science; - have above-average intelligence; - think abstractly and originally; - be responsible; - have practical insight and skills; - be versatile.			
Employment Indicators – what are the important employment facts regarding this occupation

I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours			

Nurse			
General Information			
Description – what is this occupation?			
The activities of a nurse include curative, preventative, promotive and rehabilitative health care for families, communities and individuals.			
Typical Job Activities – what will I do in this occupation?			
There are two main categories of nursing, namely a registered or professional nurse and an enrolled nursing auxiliary. The registered nurse(sister) is responsible for: - taking blood pressure and temperature - handling samples for laboratory tests - applying medication and giving injections - putting in and removing stitches - preparing patients for medical checkups and for operations - applying and changing dressings on wounds - assisting surgeons and anaesthetists during operations - assisting obstetricians in maternity wards and acting as midwives - performing health examinations at schools - caring for the mentally ill in psychiatric sections - managing wards or departments - updating and keeping of records - ordering of medical supplies and equipment - acting as supervisor of student nurses and nursing auxiliaries - acting as secretaries in doctors' consulting rooms. A nurse usually has to work long hours and generally has to work shifts.			
Related Occupations – which occupations are more or less the same?			
- Lecturer - Midwife - Social worker			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption for a degree course. Senior Certificate for a diploma course. Grade 10 Certificate for a nursing auxiliary although a Senior Certificate is preferred. COMPULSORY SUBJECTS: Mathematics, Physical Science (for the degree course) RECOMMENDED SUBJECTS: Mathematics, Physical Science, Biology			

Entry to Work Place			
Training is practical and theoretical. Training at the nursing college is done in collaboration with a university. Clinical or practical training is done at accredited training hospitals. The duration of the course is 4 years. ADVANCED TRAINING: The qualified nurse may study further in specialisation fields such as Paediatric Nursing Science, Orthopaedic Nursing Science, Intensive Nursing, Psychiatric Nursing, Community Health Nursing, Geriatric Nursing Science, etc. ADDITIONAL REQUIREMENTS: The prospective nursing student is subjected to selection. REGISTRATION: The qualified nurse has to register with the South African Nursing Council.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A nurse should: - have a strong desire to help others; - enjoy working with people; - be responsible and dependable; - follow orders carefully; - be tolerant, sympathetic and flexible; - work well under pressure; - be emotionally stable; - be physically fit to work long hours.			
Employment Indicators – what are the important employment facts regarding this occupation

Oceanographer			
General Information			
Description – what is this occupation?			
The oceanographer studies the physical and chemical properties of the ocean.			
Typical Job Activities – what will I do in this occupation?			
This work comprises geological, geophysical and geochemical surveys, as well as research into the dynamics of ocean currents, the interaction between wind and waves, and temperature and humidity on the water surface. The five branches of oceanography and their fields of study are: - Marine biology: The occurrence, distribution and development of plant and animal life. - Physical oceanography: The physical properties of the ocean such as the temperature, salt content, waves and sea currents. - Marine geoscience: Underwater land formation and physical composition of the ocean floor. - Marine chemistry: The chemical composition of seawater and the reactions of chemicals on the sea environment. The influence of pollution on the sea environment. - Coastal and ocean engineering: The development and maintenance of harbours, inlet pipes for seawater and the management of coastal areas. The oceanographer works in a laboratory and on a research boat. The development of underwater equipment makes it possible to stay underwater for longer periods and enables oceanographers to conduct research on marine life.			
Related Occupations – which occupations are more or less the same?			
- Aquatic scientist - Game ranger - Ecologist - Ichthyologist - Marine biologist - Microbiologist - Nature conservator - Zoologist			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption for a degree course. Senior Certificate for a diploma course. COMPULSORY SUBJECTS: Mathematics, Physical Science RECOMMENDED SUBJECTS: Biology			
Entry to Work Place			
UNIVERSITY: BSc degree with Zoology and Botany as major subjects with supporting courses in Physiology, Geology, Statistics and Mathematics. BSc Physical Oceanography An honours degree is the minimum qualification to become a researcher.			

What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
An oceanographer should: - have scientific aptitude; - be persistent and patient; - enjoy working outdoors; - work well with others; - have a strong sense of responsibility; - have good health and physical stamina; - have good observational skills; - be able to discriminate detail among objects; - have excellent physical fitness (for diving and long periods at sea on research vessels).

Optometrist			
:			
General Information			
Description – what is this occupation?:			
The optometrist examines eyes for vision problems, disease and other abnormal conditions.			
Typical Job Activities – what will I do in this occupation? As an optician you will test people's eyes for proper depth and colour perception and the ability to focus and co-ordinate the eyes. When required, you will prescribe, fit and adjust glasses or contact lenses. You will also prescribe corrective eye exercises or other treatment not requiring drugs or surgery. When a disease is present, you will refer the patient to an ophthalmologist. In addition, an optometrist consults with educators on preventive vision care for school children, and with public officials and management to help eliminate vision hazards. You will promote eye hygiene and general eye safety, and also inform people about correct reading habits and lighting.

Painter and Decorator			
General Information			
Description – what is this occupation?			
A painter and decorator paints, varnishes or stains the indoor and outdoor walls, roofs, doors and window frames of buildings.			
Typical Job Activities – what will I do in this occupation?			
The painter and decorator: - measures surfaces to be treated and determines quantities of the materials needed - prepares the surfaces by sanding, scraping or burning away old coverings (sometimes special chemicals need to be used) - fills nail holes, cracks or other problem areas with plaster, putty or other compounds - applies a primer or sealer coat - mixes paints and matches colours - applies the paint evenly on the surface. The painter and decorator may use rollers or spray guns rather than brushes as these tools allow paint to dry more quickly. The painter and decorator put up scaffolding or swinging chairs when working on high buildings or other structures.			
Related Occupations – which occupations are more or less the same?			
- Artist - Plasterer - Shopfitter - Spray-painter - Tiler - Upholsterer			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 9 Certificate. Grade 10 Certificate or N1 is recommended. COMPULSORY SUBJECTS: Mathematics RECOMMENDED SUBJECTS: Trade Theory, Painting and Decorating			

Entry to Work Place			
APPRENTICESHIP TRAINING: If you want to become a painter and decorator you need to register with an employer providing suitable training. Training consists of theoretical and practical work: - Theoretical training: At a technical(FET) college to obtain a N2 plus Institutional Competency-based Modular Training at a BIFSA Training College or any other accredited training centre. - Practical training: Practical site experience with an employer. - Duration of course: 2 to 4 years depending on the experience of the candidate. - Final examination: A compulsory trade test set by the Department of Labour to qualify as an artisan. ADDITIONAL REQUIREMENTS: If you want to become a painter and decorator you must be at least 16 years old. Training should comply with the Production Performance Criteria of BIFSA. NOTE: Changes in the training of artisans are subject to the official approval of the Registrar of Labour Training. A new system of apprenticeship training will be introduced within the next few years. Each industry will make use of its own methods and time to implement the system.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A painter and decorator should: - be neat and well organised; - have good colour sense; - enjoy working with his hands; - have numerical aptitude for finalising estimates; - have some artistic flair; - have manual dexterity; - have good eye-hand co-ordination; - be in good health and have stamina.

The need is determined by government	The need is determined by the consumers	The need is determined by private companies	The need is determined by new technology	I can start a business in this field or with these skills	The job is fairly stable	The job is ideal for becoming a general manager
I can be of service to people	I can work with my hands	I can design things	I can repair things	I can work with technology	I can create new things	I'll be able to learn new things on an ongoing basis
I can work with languages	I can work with people	I can make more money than the average person	I can do practical work and I do not have to study theories	I can study for a number of years and face intellectual challenges	Minimum or no qualifications are required	I can work for myself
I can work flexible hours	I can entertain people	I can work internationally	I can determine my own income	I am very interested in a specific subject or field	I can progress in the business world	I do not have to struggle with finding vacancies
I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours			

Palaeontologist			
General Information			
Description – what is this occupation?			
A palaeontologist is a scientist who specialises in the investigation of fossils.			
Typical Job Activities – what will I do in this occupation?			
By studying the markings on stratified rocks and fossilised remnants, palaeontologists have been able to establish, with amazing accuracy, a record of the evolution of life through geological time. They combine their findings with those of other scientists such as geologists, geographers and meteorologists, to reconstruct a progressive history of life on earth since ancient times. Fossils are furthermore utilised to determine the relative age of rocks and are particularly important in the search for coal and oil deposits. It is due to the work of palaeontologists that we now have some knowledge of what led to the extinction of certain species and the origin of others, and that we have a fairly accurate picture of ancient plants and the great dinosaurs that once roamed the earth.			
Related Occupations – which occupations are more or less the same?			
- Anthropologist - Ecologist - Engineering geologist - Game ranger - Geographer - Geohydrologist - Geophysicist - Meteorologist - Nature conservator			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption. COMPULSORY SUBJECTS: Mathematics, Physical Science RECOMMENDED SUBJECTS: Biology, Geography			
Entry to Work Place			
UNIVERSITY: BSc degree majoring in Botany or Zoology with specialisation in Anatomy and supporting courses in Geology and Archaeology. Post-graduate study: BSc Hons degree. Further post-graduate study is recommended in this field.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low

A palaeontologist should: - be patient; - have perseverance; - be intelligent; - be able to think independently and creatively; - work methodically and accurately; - have sound health to withstand long periods doing fieldwork under rough conditions.

Panelbeater/Vehicle Body Repairer			
General Information			
Description – what is this occupation?			
A vehicle body repairer/panelbeater is responsible for the repair and realignment of the damaged and dented panels of vehicles.			
Typical Job Activities – what will I do in this occupation?			
The vehicle body repairer straightens bent frames, removes dents and replaces damaged body parts. You will use special machines to align damaged frames, body sections and unit bodies. In some cases badly damaged sections of body panels are removed and new ones welded in their place. Small dents are repaired by smoothing them out or by filling them with plastic or solder. Dents are then filled, sanded and painted. The vehicle body repairer is also responsible for the final assembly and inspection for true fit, as well as for the testing for proper connection and working components in electrical fittings and lights. Although you will be expected to be able to repair almost any part of a vehicle, the work is becoming more specialised. In bigger workshops, the automotive body repairer may specialise, for example, in frame straightening, door and fender repairing or the installation of glass. The work environment is noisy and dirty and the work may be physically tiring.			
Related Occupations – which occupations are more or less the same?			
- Automotive mechanic - Automotive sheet metal worker - Spray-painter - Structural steel erector - Vehicle electrician			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 9 Certificate. Some employers demand higher qualifications. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Mathematics, Motor Body Repairing, Trade Theory			

Entry to Work Place			
APPRENTICESHIP TRAINING: If you want to become an vehicle body repairer you need to register with an employer providing suitable training. Training consists of theoretical and practical work: - Theoretical training: At a technical(FET) college to obtain a N2 Certificate. If you work in a rural area you may enrol at Technisa for a correspondence course. - Practical training: In-service training under supervision of a qualified tradesman. - Duration of course: 4 years but it can be completed in a shorter period. - Final examination: A compulsory trade test set by the Department of Labour to qualify as an artisan. ADDITIONAL REQUIREMENTS: If you want to become an vehicle body repairer you must be at least 16 years old. NOTE: Changes in the training of artisans are subject to the official approval of the Registrar of Labour Training. A new system of apprenticeship training will be introduced within the next few years. Each industry will make use of its own methods and time to implement the system.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
An vehicle body repairer should: - have a good sense of judgement; - be able to work accurately; - have physical strength and stamina; - have eye-hand co-ordination; - have good spatial and form perception; - be able to work with mechanical tools; - have manual dexterity; - possess mechanical insight and knowledge.

Pathologist			
General Information			
Description – what is this occupation?			
A pathologist studies the nature, cause, development and effects of disease. You will provide and interpret laboratory information essential to medical diagnosis and patient care.			
Typical Job Activities – what will I do in this occupation?			
Some pathologists perform autopsies to determine the nature and extent of diseases, the cause of death and the effects of treatment. Others supervise and co-ordinate the performance and reporting of a wide range of diagnostic and screening tests and maintain a rigid system of quality control to ensure the accuracy of test results.			
The pathologist may be involved in research concerning the nature and origins of disease and the possibilities for prevention and cure. You can also teach medical students, nurses and other health science students.			
Related Occupations – which occupations are more or less the same?			
- Artificial insemination technician - Biomedical engineer - Immunologist - Medical laboratory technologist - Medical doctor - Medical physicist - Pharmacist			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption. COMPULSORY SUBJECTS: Mathematics, Physical Science RECOMMENDED SUBJECTS: Biology NOTE: Competition to enter medical studies is stiff and there are usually plenty of applicants with A and B aggregates who will naturally be given preference.			
Entry to Work Place			
UNIVERSITY: MBChB degree - Theoretical training: 5 years. - Student internship: 1 year. - Practical work at a hospital: 1 year (also known as the house doctor year). Post-graduate study for specialisation as a pathologist: MMed or FCP(SA): 4 years. ADDITIONAL REQUIREMENTS: Before commencing post-graduate study for specialisation as a pathologist the candidate must: - be in possession of a MBChB degree for 2 years; - be registered as a medical doctor with the Interim Medical and Dental Council (IMDC) of South Africa for 1 year. REGISTRATION: On successful completion of the examination to qualify as specialist, the candidate must register with the IMDC as pathologist.			

What level of natural skill and/or aptitude do I need for this occupation?				
Exceptionally High	High	Moderate	Low	
A pathologist should: - be able to work well with others; - have the desire to help people; - work accurate; - be responsible; - be curious and imaginative; - be able to communicate well in writing and speech; - have an aptitude for science and mathematics; - have manual dexterity and physical stamina.

Pattern-maker: Metal and Engineering			
General Information			
Description – what is this occupation?			
The work of the pattern-maker in the metal and engineering industry entails the manufacture of durable patterns from materials such as wood, plastic, fibreglass or metal. These patterns are the starting point for a chain of activities leading to the manufacture of castings for products such as pumps and bearings.			
Typical Job Activities – what will I do in this occupation?			
The pattern-maker works from drawings and: - selects material - marks the material to size and cuts and saws it - finishes the material off - assembles the material into the pattern or model which is used by the moulder to form moulds for castings. The pattern-maker works indoors and uses equipment such as woodworking, sawing and sanding machines.			
Related Occupations – which occupations are more or less the same?			
- Architectural metalworker - Machine tool setter - Metal caster - Metal coremaker - Moulder - Sheet metal worker - Spin casting machine operator - Tube mill reliner - Twister: cable manufacturing			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 9 Certificate. Some employers prefer higher qualifications. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Mathematics, Physical Science, Woodwork, Trade Theory, Technical Drawing			

Entry to Work Place			
APPRENTICESHIP TRAINING: If you want to become a pattern-maker you need to register with an employer providing suitable training. - Theoretical training: At a technical(FET) college or a correspondence course at Technisa up to N6 level. - Practical training: At an accredited training centre. - In-service training: Under supervision of a qualified tradesman. - Duration of course: 4 years but it can be completed in a shorter period provided that the candidate has higher educational qualifications. - Final examination: A compulsory trade test set by the Department of Labour to qualify as an artisan. ADDITIONAL REQUIREMENTS: If you want to become a pattern-maker you must be at least 16 years old. NOTE: Changes in the training of artisans are subject to the official approval of the Registrar of Labour Training. A new system of apprenticeship training will be introduced within the next few years. Each industry will make use of its own methods and time to implement the system.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A pattern-maker should: - be able to pay attention to detail; - work carefully and accurately; - enjoy working with his hands; - concentrate under noisy working conditions; - be practical; - have mathematical aptitude.

Pet Shop Owner			
General Information			
Description – what is this occupation?			
Pet-shop owners sell and take care of any companion animals, from hamsters to dogs. They usually also stock various animal foods.			
Typical Job Activities – what will I do in this occupation?			
Pet-shop owners need to keep animal cages clean and see to it that the animals are properly fed. A pet-shop owner must have broad knowledge of animals that could make possible pets. Pet-shop owners also need to make sure all animals are healthy, because disease may spread and cause great havoc. For instance when fish get white spots they can die, and the condition is highly contagious. Health inspectors visit pet-shops to ensure that good care is taken of all animals. If animals are ill treated, the pet-shop owner could lose his/her license. Pet accessories can include sandboxes, leashes, collars, aquatic plants, pictures, sawdust, food, toys and food supplements, etc. Some pet-shop owners keep snakes and monkeys, but a special permit is needed to sell them.			
Related Occupations – which occupations are more or less the same?

The need is determined by government	The need is determined by the consumers	The need is determined by private companies	The need is determined by new technology	I can start a business in this field or with these skills	The job is fairly stable	The job is ideal for becoming a general manager
I can be of service to people	I can work with my hands	I can design things	I can repair things	I can work with technology	I can create new things	I'll be able to learn new things on an ongoing basis
I can work with languages	I can work with people	I can make more money than the average person	I can do practical work and I do not have to study theories	I can study for a number of years and face intellectual challenges	Minimum or no qualifications are required	I can work for myself
I can work flexible hours	I can entertain people	I can work internationally	I can determine my own income	I am very interested in a specific subject or field	I can progress in the business world	I do not have to struggle with finding vacancies
I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours			

Photo-Lithographer/Electronic Originator			
General Information			
Description – what is this occupation?			
Due to technological advances especially in the area of computers, the trade of photo-lithography has undergone considerable changes. Almost all the tasks previously done by the photo-lithographer are now done on high-powered computer systems. A new trade combining the skills of photo-lithography and electronic origination was started.			
Typical Job Activities – what will I do in this occupation?			
The photo-lithographer/electronic originator: - performs type-setting - prepares line or half-tone pictures in single or multi-colour separations (colour printing) - is responsible for the making up and laying out of the job in its final form with text, graphics, special effects and all other special requirements - makes positives and negatives - prepares the printing plates for the presses. The photo-lithographer/electronic originator normally works indoors in clean, well-equipped and air-conditioned areas.			
Related Occupations – which occupations are more or less the same?			
- Bookbinder - Composer - Electroplater - Lithographer - Machine minder - Photogravure engraver - Printer's mechanic - Sign-writer			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 10 Certificate for an apprenticeship at a company. Senior Certificate for full-time training at the South African Printing College. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Art, Computer Studies			

Entry to Work Place			
APPRENTICESHIP TRAINING: If you want to become a photo-lithographer/electronic originator you need to register with an employer providing suitable training. Training consists of theoretical and practical work: - Theoretical training: At the Southern African Printing College (full-time for 10 months) or through their Distance Learning Department (part-time). - Practical training: In-service training under supervision of a qualified tradesman (Competency-Based Modular Method). - Duration of course: 2 to 4 years depending on the experience of the candidate. - Final examination: A compulsory trade test set by the Department of Labour to qualify as an artisan. ADDITIONAL REQUIREMENTS: If you want to become a photo-lithographer/electronic originator you must be at least 16 years old. NOTE: Changes in the training of artisans are subject to the official approval of the Registrar of Labour Training.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A photo-lithographer/electronic originator should: - be able to adapt to the changes in technology; - have some artistic flair; - have good colour perception; - have an analytical mind; - be able to concentrate; - work quickly and accurately even under pressure; - be interested in photography.

Photographer			
General Information			
Description – what is this occupation?			
The modern photographer is a combination of an artist and a scientist who has to master the use of sophisticated equipment and development processes as well as see in a perceptive way. A photographer uses cameras to portray people, places, objects and events. Using your knowledge of design and composition, you will select images to obtain the effect you want.			
Typical Job Activities – what will I do in this occupation?			
Most photographers specialise but their basic equipment is the same: - The press photographer takes pictures of fires, accidents, prominent people, sports and other subjects of interest. You will not pose your subjects and you have to work against time. - A scientific photographer photographs visible objects or events, or use special equipment to photograph information not normally visible. You will usually work in a research institute or hospital. - A studio photographer works in a studio and takes photographs for passports, identity documents, formal portraits and wedding photographs. - A forensic photographer takes photographs of crime scenes for instance, the scene of a murder, in order to help detectives solve the crime. - An advertising photographer takes photographs of people or objects for use in advertisements. - The fashion photographer usually works for magazines and takes photographs of models displaying clothes. The work of a photographer contains two basic elements: - taking of a photograph - development and printing. A photographer often works in more than one field of photography.			
Related Occupations – which occupations are more or less the same?			
- Cameraman - Commercial artist - Film editor - Journalist - Lithographic artist - Micro photographer - Photograph retoucher - Sales representative - Technical illustrator			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Art, Mathematics, Physical Science			
Entry to Work Place			
Proof of experience and skills.			

What level of natural skill and/or aptitude do I need for this occupation?				
Exceptionally High	High	Moderate	Low	
A photographer should: - be creative and imaginative; - be patient and accurate; - be able to put people at ease in front of the camera; - be able to react and decide quickly; - be able to do detailed work; - have manual dexterity; - have good health and physical stamina; - have good vision and colour sense.

Photogravure Engraver			
General Information			
Description – what is this occupation?			
A photogravure engraver is responsible for the reproduction of all material on a copper plate which is used in the gravure printing process.			
Typical Job Activities – what will I do in this occupation?			
The photogravure engraver uses cameras and screens to photograph the material (photographs, text that has been set, line drawings, etc.) to be reproduced. You will develop a negative and then a positive on a transparent, light-sensitive celluloid or plastic material, which is placed beneath pigmented paper in a frame. The pigmented paper is finally transposed onto a slowly rotating copper cylinder in a trough containing hot water, to develop the image or picture. The photogravure engraver may also develop colour photographs by using three separate colour filters.			
Related Occupations – which occupations are more or less the same?			
- Cardboard and paper industry operator - Lithographer - Photo compositor - Photographic platemaker - Photo-lithographer/Electronic originator - Printer: block - Printing process operator - Process engraver			
Educational Requirements - which qualifications do I need to enter this occupation?

Photojournalist			
General Information			
Description – what is this occupation?			
The photojournalist specialises in one aspect of photography. You will photograph newsworthy events, people, other illustrative or educational material for use in publications or telecasts, using still cameras.			
Typical Job Activities – what will I do in this occupation?			
You normally have to travel to different and sometimes dangerous locations, for example to cover natural disasters or military conflicts. The photojournalist needs to understand the story behind the 'on-the spot news'. You will need to be able to portray this in a series of photographs which form a visual statement or essay. A photojournalist can also diversify into publishing photographic books, calendars, postcards and posters.			
Related Occupations – which occupations are more or less the same?

Activities to enhance career progress – what can I do to improve my career progress in this occupation?						
Further Studies in the specific career field	Further studies in related fields	Experience in specific field	Work performance	Work performance	Do presentations, seminars, publish articles, etc.	General management studies
Possible career paths – which kind of career path can I follow in this occupation?						
Specialist career in the specific field	Management positions in the specific field	Management positions in related fields	General business management	Executive positions	Consultant/ contractor/ own practice/ freelance	Own business
Employment Stability						
Is the demand (the need) for this particular skills stable over the years?						
Exceptionally Stable		Very stable		Moderately stable		Not very stable
The need for people in this occupation and with these skills is influenced by:						
Government policy and legislation		Government strategy and activities			The growth of private companies (big and small)	
Technology		Direct consumer demands – “man in the street”			My own performance and skills	
Possible reasons to consider this career – I should consider this career if I want a job where:						
The need is determined by government	The need is determined by the consumers	The need is determined by private companies	The need is determined by new technology	I can start a business in this field or with these skills	The job is fairly stable	The job is ideal for becoming a general manager
I can be of service to people	I can work with my hands	I can design things	I can repair things	I can work with technology	I can create new things	I'll be able to learn new things on an ongoing basis
I can work with languages	I can work with people	I can make more money than the average person	I can do practical work and I do not have to study theories	I can study for a number of years and face intellectual challenges	Minimum or no qualifications are required	I can work for myself
I can work flexible hours	I can entertain people	I can work internationally	I can determine my own income	I am very interested in a specific subject or field	I can progress in the business world	I do not have to struggle with finding vacancies
I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours			

Physicist			
General Information			
Description – what is this occupation?			
A physicist is a scientist who studies the fundamental properties of matter. These ranges from the microscopic world of subatomic and molecular particles to the macroscopic world of cosmology and astrophysics. Systematic observation and experimentation provide the data from which theories describing the fundamental forces and laws of nature can be developed.			
Typical Job Activities – what will I do in this occupation?			
The work of the physicist can fall into two broad categories: - Theoretical physics entails the formulation of the laws of nature, which determine the properties and transformation of matter and energy. - Experimental physics supplies the fundamental data on which physics is founded and involves laboratory work and the examining of new phenomena through systematic, exact measurement and experiments. The physicist may specialise in: - solid state physics and material science - nuclear, particle and radiation physics - optics and spectroscopy - environmental physics - medical physics and biophysics - solar-terrestrial physics, astronomy and astrophysics - plasma physics - engineering physics.			
Related Occupations – which occupations are more or less the same?			
- Agricultural scientist - Anatomist - Bacteriologist - Biologist - Botanist - Chemist - Engineer - Geologist - Hydrobiologist - Hydrologist - Mathematician - Meteorologist			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption. COMPULSORY SUBJECTS: Mathematics, Physical Science RECOMMENDED SUBJECTS: None			

Entry to Work Place			
UNIVERSITY: BSc degree with Physics and Mathematics as major subjects and courses in Chemistry, Geology, Astronomy, Applied Mathematics, Statistics. Post-graduate study: BSc Honours degree is the minimum requirement to become a physicist.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A physicist should: - have an aptitude for mathematics and physical science; - have above average intelligence; - have an aptitude for abstract reasoning; - be curious and imaginative; - be able to work independently; - be a keen observer; - be practical.			
Employment Indicators – what are the important employment facts regarding this occupation			
Employment Opportunities in South Africa for this Career			
Exceptionally High	High	Moderate	Low
Supply of People			
The number of people with the qualifications, skills (able to do it) or interest in this career, that I have to compete with			
Exceptionally High number of people	High number of people	Moderate number of people	Low number of people
Income Potential			
Estimated average income for people in this occupation (excluding extreme examples of high or low income):			
R300 000+per year	R144 000 - R300 000	R60 000 - R144 000	R 60 000 per year
Income based on Performance			
What is the chance to improve my pay in this occupation through exceptional performance, skills or business ideas?			
Exceptionally High	High	Moderate	Low
Self Employment			
Can I use this career to work for myself or to start a small company in this career field?			
Exceptionally High	High	Moderate	Low
General Management Opportunities			
What is the potential to use this occupation as a platform to become a general manager in a medium to big company or organisation?			
Exceptionally High	High	Moderate	Low
International Employment Market			
What is the chance of being able to use this career's qualifications and skills in the international labour market?			
Exceptionally High	High	Moderate	Low

Possible Employers – where do I find this occupation?						
Government (national, provincial, local councils and government related organisations like universities, semi-government, etc.	Big private companies	Medium or small companies	Own small business: Entrepreneurial opportunities in this field	Self-employed: Contractor, consultant, own practise, freelance		
- Manufacturers of materials - Manufacturers of equipment - Hospitals - Mining companies - Research organisations - Universities and technikons - Government departments - CSIR - AEC - Mintek - Sasol - SABS - Iscor A physicist with appropriate experience may act as a private consultant.						
Relevant Contact Details – where can I get more information on this occupation?						
- The Secretary, SA Institute of Physics, Department of Physics, University of Zululand, Private Bag X1001, KwaDlangezwa, 3886. Tel: (0359) 026000.						
Career Progress and Path						
Activities to enhance career progress – what can I do to improve my career progress in this occupation?						
Further Studies in the specific career field	Further studies in related fields	Experience in specific field	Work performance	Work performance	Do presentations, seminars, publish articles, etc.	General management studies
Possible career paths – which kind of career path can I follow in this occupation?						
Specialist career in the specific field	Management positions in the specific field	Management positions in related fields	General business management	Executive positions	Consultant/ contractor/ own practice/ freelance	Own business
Employment Stability						
Is the demand (the need) for this particular skills stable over the years?

I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours			

Physiologist			
General Information			
Description – what is this occupation?			
The physiologist is a biological scientist who studies the various life functions of plants, animals and man under normal and abnormal conditions.			
Typical Job Activities – what will I do in this occupation?			
The physiologist specialises in the study of cells, tissues or one of the organs. You will be interested in the internal "communication" of organs, energy procurement and utilisation, blood circulation, defence systems against infection, repair mechanisms, reproduction and metabolism. You will investigate the effects that factors such as drugs or pollution have on the life processes and bodily functions of plants and animals. The physiologist provides the basis for much of the work done by pathologists, nutritionists and toxicologists.			
Related Occupations – which occupations are more or less the same?			
- Chamber of Mines' Human Science Laboratory - Central Medical Laboratory of the Defence Force - Medical Research Council - CSIR - Department of Agricultural - Veterinary Research Institute, Onderstepoort - Agricultural research institutes - Medical schools - Hospitals - Pathology laboratories - Universities - Iscor (Industrial Hygiene) - Self-employed as industrial physiologist			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption. COMPULSORY SUBJECTS: Mathematics, Physical Science RECOMMENDED SUBJECTS: Biology			
Entry to Work Place			
UNIVERSITY: BSc degree in Physiology. Post-graduate study: BSc Honours, MSc and PhD are necessary for top positions in research, administration or university lecturing.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low

A physiologist should: - be interested in Biology, Chemistry and Mathematics; - have a systematic, probing mind; - be accurate and methodical; - be curious; - be patient and have perseverance; - think logically; - concentrate well; - have good health; - be able to work in a team.

Piano Tuner			
General Information			
Description – what is this occupation?			
A piano tuner tunes pianos, repairs mechanical defects, regulates pianos, repairs barrel organs and services accordions.			
Typical Job Activities – what will I do in this occupation?			
Before you can perform the actual piano tuning, you will have to determine if the instrument needs any mechanical repairing: - The felt-cover hammers can wear out or reproduce bad sound quality. It has to be replaced or scoured off. - The tuning pins to which the strings are attached sometimes have to be replaced with a thicker set of pins. - Piano keys need to be bleached or treated to regain the original colour. - When one of the steel strings breaks, it has to be replaced. After the piano has been cleaned and repaired, the actual tuning can start. Tuning-forks, hammers and felt wedges which are pressed between the strings are used. When piano keys are struck, felt-covered hammers strike steel strings in the piano which cause the strings to vibrate. The number of times that the string vibrates per second is called the pitch. The piano tuner adjusts piano strings to the proper pitch by using a tuning-fork. You will begin by adjusting the pitch of the 'A' string. You will then turn a steel pin to tighten or loosen the string until its pitch matches that of the tuning-fork and then adjust the pitch of the other strings in relation to the 'A' string.			
Related Occupations – which occupations are more or less the same?			
- Conductor - Musician - Music teacher - Orchestra leader - Organ repairer - Singer			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 10 Certificate. Senior Certificate is preferable. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Music			
Entry to Work Place			
DEPARTMENT OF NATIONAL EDUCATION: The only comprehensive and formal training in South Africa is the diploma course offered by the Department of National Education at the Pioneer School for the Blind in Worcester. ADDITIONAL REQUIREMENTS: Only blind and partially-sighted persons are considered. Strict selection procedures have to be undertaken. Although the ability to play the piano is useful it is not essential. NOTE: Sighted persons can only be trained as piano tuners overseas.			

What level of natural skill and/or aptitude do I need for this occupation?				
Exceptionally High	High	Moderate	Low	
A piano tuner should: - have good musical ability and tonal discrimination; - have good hearing; - concentrate while tuning the piano; - have patience and determination; - have finger and manual dexterity; - present a neat, well-groomed appearance.

Pilot: Civilian			
General Information			
Description – what is this occupation?			
A civilian pilot is a private or highly trained professional pilot.			
Typical Job Activities – what will I do in this occupation?			
As a private pilot you may not offer your services in exchange for a reward. You will fly merely for pleasure or you may apply your flying abilities in your own business. A professional pilot works within the commercial field. You will hold either a commercial pilot's licence or an airline transport pilot's licence. You will transport passengers and cargo to and from airports or you may perform tasks such as crop dusting, inspecting pipelines, conducting sightseeing trips or helping with rescue operations. There are usually two pilots on board during commercial airline operations but there may be more depending on the type of aircraft and specific requirements. The pilots are the pilot-in-command (captain) and the co-pilot (first officer). The captain is responsible for the safety of the aircraft, passengers, crew and cargo. As the captain, you will supervise the crew, give instructions and make all decisions. You will check the aircraft, route, weather and alternate destination before take-off. You will then fly the aircraft over the planned route, land it and file the flight report. The co-pilot assists or relieves the captain in the operation of the aircraft and monitors flight instruments and air traffic control channels. The working life of an airline pilot is highly regulated by flight duties. You will be allowed to fly only a specific number of hours in a month. Throughout your career you will be subject to re-evaluation and medical examinations.			
Related Occupations – which occupations are more or less the same?			
- Aeronautical engineer - Aircraft navigator - Airport manager - Air-traffic controller - Flight engineer - Pilot in non-scheduled commercial operations and in business/corporate operations - Pilot: helicopter - Pilot: military			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption. COMPULSORY SUBJECTS: Mathematics, Physical Science RECOMMENDED SUBJECTS: Geography, Languages			

Entry to Work Place

PRIVATE PILOT:

Training:

The training for a private pilot can be done at numerous licensed flying clubs or schools:

- theoretical training;
- practical training;
- at least 40 flying hours.

After completion of the course you obtain a Private Pilot License (PPL) which entitle you to fly for recreational purposes and not for money or any reward.

Additional requirements:

- pass compulsory aviation medical examination;
- must be at least 17 years old.

PROFESSIONAL PILOT:

The qualified private pilot may enrol at certain advanced flying schools to receive training as a commercial pilot and the qualified commercial pilot may receive training towards obtaining an Airline Transport Pilot's license.

1. COMMERCIAL PILOT:

Training:

Commercial pilot's license (CPL):

- theoretical examinations are written at the Department of Civil Aviation;
- the practical part is done by the Designated Examiners;
- 200 hours of flying experience.

After completion of the course you obtain a Commercial Pilot License (CPL) and you can start to work as a pilot but it is difficult to get employment with less than 500 hours of flying experience. Insurance companies usually require at least 500 hours of flying experience.

Additional requirements:

- in possession of a Private Pilot License (PPL);
- pass a more stringent aviation medical examination;
- 40 to 60 flying hours experience.

2. AIRLINE PILOT:

Training:

The Airline Transport Pilot License can be obtained from a private airline or the SAA and may take up to four years of active study and flying conversion training.

The SAA has its own Cadet Pilot training programme. You may apply for this programme during January and May when the SAA advertise in nearly all the local newspapers. The successful candidates is send by the SAA to a flying school of the SAA's choice. The training programme consist of a theoretical part at a ground school, and a practical part where the candidate is first trained in the flight simulator and thereafter in the aircraft. The successful candidate is employed as a co-pilot in the SAA and when experienced enough, promoted and trained to fly as captain.

Additional requirements:

- in possession of a Commercial pilot's license (CPL);
- younger than 35 years of age.

What level of natural skill and/or aptitude do I need for this occupation?

Exceptionally High

High

Moderate

Low

A civilian pilot should:

- have excellent health and stamina;
- have good hearing, eyesight and good colour discrimination;
- have no history of organic or nervous disease, mental disorders, drug addiction or alcoholism;
- be responsible;
- have above average intelligence;
- be able to work well under stress;
- be emotionally stable and mature;
- be able to work in a team.

Plasterer			
General Information			
Description – what is this occupation?			
The plasterer's work generally entails protecting, strengthening, covering and decorating brickwork and concrete by plastering the surface.			
Typical Job Activities – what will I do in this occupation?			
The plasterer spreads concrete on walls and sub-floors with a trowel. You will finish the wall off until it is smooth or you may even decorate it with patterns. The sub-floor is levelled with a screed. You will then lay the finishing surfaces for cement floors. The work of the plasterer also includes tasks such as the completion of concrete ceilings and the making and fixing of plaster-board ceilings. The plasterer not only applies but also prepares the coatings. Some plasterers do complex decorative and ornamental work using moulds or designs.			
Related Occupations – which occupations are more or less the same?			
- Air drill operator: construction - Bricklayer - Carpenter - Cement mason - Construction worker - Lime and cement burner - Mosaic worker - Stone and marble mason - Wall and floor tiler			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 9 Certificate. Grade 10 Certificate or N1 is recommended. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Mathematics			

Entry to Work Place			
APPRENTICESHIP TRAINING: If you want to become a plasterer you need to register with an employer providing suitable training. Training consists of theoretical and practical work: - Theoretical training: At a technical(FET) college to obtain a N2 plus Institutional Competency-based Modular Training at a BIFSA Training College or any other accredited training centre. - Practical training: Practical site experience with an employer. - Duration of course: 2 to 4 years depending on the experience of the candidate. - Final examination: A compulsory trade test set by the Department of Labour to qualify as an artisan. ADDITIONAL REQUIREMENTS: If you want to become a plasterer you must be at least 16 years old. Training should comply with the Production Performance Criteria of BIFSA. NOTE: Changes in the training of artisans are subject to the official approval of the Registrar of Labour Training. A new system of apprenticeship training will be introduced within the next few years. Each industry will make use of its own methods and time to implement the system.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A plasterer should: - work well with others; - enjoy working with his hands; - work well without supervision; - be accurate; - have manual dexterity; - have good co-ordination; - be in good physical health; - have good form perception.

Exceptionally Stable		Very stable		Moderately stable		Not very stable
The need for people in this occupation and with these skills is influenced by:						
Government policy and legislation		Government strategy and activities			The growth of private companies (big and small)	
Technology		Direct consumer demands – “man in the street”			My own performance and skills	

Possible reasons to consider this career – I should consider this career if I want a job where:						
The need is determined by government	The need is determined by the consumers	The need is determined by private companies	The need is determined by new technology	I can start a business in this field or with these skills	The job is fairly stable	The job is ideal for becoming a general manager
I can be of service to people	I can work with my hands	I can design things	I can repair things	I can work with technology	I can create new things	I'll be able to learn new things on an ongoing basis
I can work with languages	I can work with people	I can make more money than the average person	I can do practical work and I do not have to study theories	I can study for a number of years and face intellectual challenges	Minimum or no qualifications are required	I can work for myself
I can work flexible hours	I can entertain people	I can work internationally	I can determine my own income	I am very interested in a specific subject or field	I can progress in the business world	I do not have to struggle with finding vacancies
I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours			

Plastics Technologist/Polymer Scientist			
General Information			
Description – what is this occupation?			
A plastics technologist/polymer scientist performs highly skilled work in the plastics industry, which is linked to the chemical industry. The raw materials used in the manufacture of plastics are mainly coal and by-products of coal. Various techniques and processes are used to produce the different types of plastics known.			
The plastics technologist: - tests the processes used to produce plastics - puts the processes into operation - oversees these processes and the production of plastics - tests the quality of the plastics - tests the ultimate consumer product - locates and corrects factory faults. The plastics technologist is not only responsible for the development and testing of plastic products, but may also participate in the marketing, production, sales, services and management activities.			
Related Occupations – which occupations are more or less the same?			
- Building technologist - Chemical processor - Chemical engineering technician - Coal technologist - Leather technologist - Paint technologist - Paper technologist - Petroleum technologist - Physical sciences technologist - Rubber technologist			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption for a degree course. Senior Certificate for a diploma course. COMPULSORY SUBJECTS: Mathematics, Physical Science RECOMMENDED SUBJECTS: None			
Entry to Work Place			
UNIVERSITY: Post-graduate training: BSc (Hons) Polymer Science.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low

A plastics technologist should: - have a flair for management, production and quality control; - be observant and inquisitive; - have patience and perseverance; - be a responsible worker; - have an interest in chemistry; - have manual dexterity; - be technically inclined.

Plastics Worker/Operator			
General Information			
Description – what is this occupation?			
A vast number of objects today are made of plastic. The plastics worker/operator manufactures these products out of plastic mixed with resin bonding.			
Typical Job Activities – what will I do in this occupation?			
First, a basic structure is built and a release agent is spread onto it. Then gel is applied, followed by layers of plastic and resin bonding until the required thickness is obtained. Before the resin sets it has to be sanded on the uneven side with a sander until smooth. After the resin product has been removed from the ground structure the product is completed by mounting the rest of the required parts in or on the resin. The plastics worker has to set up and maintain the machines that transform plastic compounds into a wide variety of consumer products.			
Related Occupations – which occupations are more or less the same?			
- Coil sprayer - Coil winder - Coremaker - Cutter - Fibreglass worker - Instrument maker - Machinists - Plastics technologist			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
No specific requirements. Some employers prefer a Grade 10 or Senior Certificate. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Mathematics, Physical Science			
Entry to Work Place			
IN-SERVICE TRAINING: Training takes place over a period of three to six months under the close supervision of a qualified plastics worker. A course of six days is offered by the Plastics Federation to candidates in possession of a Senior Certificate or a Grade 10 qualification plus experience.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low

A plastics worker should: - be patient and precise; - be able to work alone; - have manual dexterity; - have three-dimensional visualisation; - have mathematical aptitude; - be physically healthy and fit.

Plumber			
General Information			
Description – what is this occupation?			
A plumber installs and repairs sanitation, drainage and water pipes in houses, factories and other buildings.			
Typical Job Activities – what will I do in this occupation?			
When installing a new system or modernising an old one, the plumber takes measurements and makes drawings to show where the pipes will connect with outside lines and where fixtures must be placed. Then pipes are measured, bent, cut and threaded according to the drawings. Pipes are joined by bolting, blazing, glueing, screwing or soldering. When doing repair or maintenance work, the plumber has to locate the cause of the problem, replace broken or worn-out valves and clear pipes and taps. The qualified plumber may also have to supervise other plumbers.			
Related Occupations – which occupations are more or less the same?			
- Airframe fitter - Blacksmith - Blaster - Boilermaker - Bricklayer - Chemical plumber (including sheetmetal working) - Coppersmith - Pipe-fitter - Steam-fitter			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 9 Certificate. Some employers prefer higher qualifications. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Trade Theory, Mathematics			

Entry to Work Place			
APPRENTICESHIP TRAINING: If you want to become a plumber you need to register with an employer providing suitable training. Training consists of theoretical and practical work: - Theoretical training: At a technical(FET) college to obtain a N2 plus Institutional Competency-based Modular Training at a BIFSA Training College or any other accredited training centre. - Practical training: Practical site experience with an employer. - Duration of course: 2 to 4 years depending on the experience of the candidate. - Final examination: A compulsory trade test set by the Department of Labour to qualify as an artisan. ADDITIONAL REQUIREMENTS: If you want to become a plumber you must be at least 16 years old. Training should comply with the Production Performance Criteria of BIFSA. NOTE: Changes in the training of artisans are subject to the official approval of the Registrar of Labour Training. A new system of apprenticeship training will be introduced within the next few years. Each industry will make use of its own methods and time to implement the system.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A plumber should: - be alert; - be conscientious; - have good work habits and perform tasks accurately; - be able to get along well with others; - have mechanical ability; - enjoy working with his hands and have manual dexterity; - be practical; - have spatial perception; - have good health and stamina.

The need is determined by government	The need is determined by the consumers	The need is determined by private companies	The need is determined by new technology	I can start a business in this field or with these skills	The job is fairly stable	The job is ideal for becoming a general manager
I can be of service to people	I can work with my hands	I can design things	I can repair things	I can work with technology	I can create new things	I'll be able to learn new things on an ongoing basis
I can work with languages	I can work with people	I can make more money than the average person	I can do practical work and I do not have to study theories	I can study for a number of years and face intellectual challenges	Minimum or no qualifications are required	I can work for myself
I can work flexible hours	I can entertain people	I can work internationally	I can determine my own income	I am very interested in a specific subject or field	I can progress in the business world	I do not have to struggle with finding vacancies
I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours			

Press Photographer			
General Information			
Description – what is this occupation?			
The main function of a press photographer is to photograph newsworthy events.			
Typical Job Activities – what will I do in this occupation?			
Dramatic front-page news photographs sell newspapers, so press photography presents particular challenges to the photographer. The pictures need to have a sense of immediacy and to portray the essence of a situation in usually no more than one shot. The press photographer has to be able to get to situations quickly, since newspaper deadlines are very tight and the photographs have to be prepared for publication. You will often be called upon to produce usable images under tough conditions.			
Related Occupations – which occupations are more or less the same?			
- Animator - Cartoonist - Fashion photographer - Forensic photographer - Journalist - Photo-lithographer - Video tape operator - Vision-mixer			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate for a diploma course. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Mathematics, Physical Science, Art			
Entry to Work Place			
Good portfolio and experience			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A press photographer should: - have initiative; - have a 'nose for news'; - be able to think, act and move quickly; - be able to deal with people assertively and tactfully at all times as a press camera can often incite hostility in a volatile situation; - have sound technical knowledge to produce images under the most appalling conditions; - be versatile to be able to cover a range of different subjects in the course of a day.			

Employment Indicators – what are the important employment facts regarding this occupation				
Employment Opportunities in South Africa for this Career

Printer's Cutter			
General Information			
Description – what is this occupation?			
Before the actual printing of books, newspapers, periodicals and other printed matter takes place, the paper must be prepared and submitted in the appropriate forms and sizes.			
Typical Job Activities – what will I do in this occupation?			
A printer's cutter measures and cuts the paper according to specified dimensions. Power-driven guillotines are used for this purpose. The paper is then arranged in batches and prepared for the printing operation. The printer's cutter must be well acquainted with receiving and despatching procedures.			
Related Occupations – which occupations are more or less the same?			
- Blockmaker/process engraver - Bookbinder - Carton maker - Letterpress machine minder - Printer: block and textile - Printer's mechanic - Printing and newspaper industry worker - Printing copy holder - Stereotyper			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 10 Certificate for an apprenticeship at a company. Senior Certificate for full-time training at the South African Printing College. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Mathematics			
Entry to Work Place			
APPRENTICESHIP TRAINING: If you want to become a printer's cutter you need to register with an employer providing suitable training. Training consists of theoretical and practical work: - Theoretical training: At the Southern African Printing College (full-time) or through their Distance Learning Department (part-time). - Practical training: In-service training under supervision of a qualified tradesman (Competency-Based Modular Method). - Duration of course: 2 to 3 years depending on the experience of the candidate. - Final examination: A compulsory trade test set by the Department of Labour to qualify as an artisan. ADDITIONAL REQUIREMENTS: If you want to become a printer's cutter you must be at least 16 years old. NOTE: Changes in the training of artisans are subject to the official approval of the Registrar of Labour Training. A new system of apprenticeship training will be introduced within the next few years. Each industry will make use of its own methods and time to implement the system.			

What level of natural skill and/or aptitude do I need for this occupation?				
Exceptionally High	High	Moderate	Low	
A printer's cutter should: - be neat; - work very accurate; - be alert and careful; - show a sense of responsibility; - have a certain amount of mechanical insight; - be able to work in a team. Printers' warehousing (including cutting) workers need: - manual dexterity; - good eye-hand co-ordination; - good vision; - stamina and strength.

Printer's Mechanic			
General Information			
Description – what is this occupation?			
A printer's mechanic is responsible for the installation and maintenance of the printing machines and other equipment in a printing company.			
Typical Job Activities – what will I do in this occupation?			
Due to technological advances the work has become very specialised and an important part of the industry. The printer's mechanic mounts, installs, maintains, repairs, moves and re-arranges a wide variety of machines and equipment. You will assemble, install and test a new machine, or part of a machine to integrate its operation with already existing machines. The printer's mechanic has to complete his work quickly and efficiently because downtime on a printing machine can lead to huge production losses. You will also have to be extremely cautious because negligence can lead to injuries.			
Related Occupations – which occupations are more or less the same?			
- Compositor - Construction plant mechanic - Electrician - Fitter and turner - Gravure machine-minder - Machine and tool setter - Machine mechanic - Radio and television mechanic			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 10 Certificate for an apprenticeship at a company. Senior Certificate for full-time training at the South African Printing College. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Mathematics, Trade Theory, Technical Drawing, Technika: Mechanical			
Entry to Work Place			
Training consists of theoretical and practical work: - Theoretical training: At the Southern African Printing College (full-time) or through their Distance Learning Department (part-time). - Practical training: In-service training under supervision of a qualified tradesman (Competency-Based Modular Method). - Duration of course: 2 to 3 years depending on the experience of the candidate. - Final examination: A compulsory trade test set by the Department of Labour to qualify as an artisan.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low

A printer's mechanic should: - be accurate and alert; - have mathematical aptitude; - have mechanical inclination; - enjoy working with his hands; - be practical; - be responsible; - have good work habits.

Process Engraver			
General Information			
Description – what is this occupation?			
A process engraver prepares all types of illustrations that cannot be typeset.			
Typical Job Activities – what will I do in this occupation?			
The process engraver operates process cameras and produces negatives of photographs and other artwork. These negatives are developed to make light impressions (exposures) on metal plates that are highly sensitive to light. Sections of the plates that have been exposed to light become resistant to acid. When the plate is immersed in a nitric acid bath, the acid etches away the unexposed sections of the plate and reveals the sections in full relief. As soon as a print is ready, it is ruled according to size and mounted on wood. The blocks are then mounted and composed in page form.			
Related Occupations – which occupations are more or less the same?

Production Manager			
General Information			
Description – what is this occupation?			
A production manager plans, organises, manages, co-ordinates and controls production. This entails the transformation of raw materials or a combination of raw materials into the final product.			
Typical Job Activities – what will I do in this occupation?			
The production manager selects new tools, machines and equipment as well as the most effective production processes and procedures for use in an industrial plant. You will arrange machinery and equipment and plan the workflow. You will decide whether all the components should be manufactured in-house or whether some should be obtained elsewhere. You will also conduct time and motion studies, analyse production jobs and set production and performance standards for workers. The production manager designs processing systems and applies research techniques to production and other problems. You will devise ways to keep health and accident hazards to a minimum, study the cost and quality of manufactured products and develop management control systems. These activities often require the application of statistical techniques in order to find the most favourable solution to production problems.			
Related Occupations – which occupations are more or less the same?			
- Administrative manager - Engineering technician - Factory foreman - Human Resources Manager - Industrial engineer - Industrial engineering technician - Material assaying technician - Production engineering technician			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption for a degree course. Senior Certificate for a diploma course. COMPULSORY SUBJECTS: Mathematics, Physical Science RECOMMENDED SUBJECTS: Business Economics			
Entry to Work Place			
The activities of each specific manufacturing organisation will determine which engineering field will be the most suitable to study. However, industrial engineers and industrial and production engineering technicians are in great demand. B degree courses in Industrial Engineering. BA, BCom and BAdmin degree with Industrial Psychology and Economy. PRODUCTION MANAGEMENT INSTITUTE OF SOUTH AFRICA: Diploma course in Production Management.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low

A production manager should: - be practical and enjoy solving problems; - be able to make decisions; - be accurate and persistent; - show good judgement; - work well with others; - express his ideas clearly in writing and in speech; - be willing to continue his education to keep up with the latest developments in the field.

I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours			

Production Worker			
General Information			
Description – what is this occupation?			
The production worker works for a manufacturer doing routine jobs to help produce goods.			
Typical Job Activities – what will I do in this occupation?			
You may work for one of many different types of manufacturing companies, for example, those which make electrical goods, chemicals, ceramics, metal goods, furniture and timber products, cars, food and drink, etc. Your job can include mixing and weighing materials, looking after machines and packing items. Your work might also include working at a conveyor belt and putting together parts of products such as washing machines. The production worker may test the goods for faults or inspect the work to ensure it is of acceptable quality. Some firms move workers around to make their jobs more interesting.			
Related Occupations – which occupations are more or less the same?			
- Assembly line worker - Labourer - Machine operator - Petrol pump attendant - Wrapper and labeller

Professional Hunter			
General Information			
Description – what is this occupation?			
Hunters stalk, track and kill animals either for pleasure or reward. Although some may hunt with others, most hunters work alone using dogs to track and corner prey.			
Typical Job Activities – what will I do in this occupation?			
Hunters use poison or guns to kill predatory animals such as hyenas. Some hunters collect animals for museums. All legal hunting activities are monitored and approved by a government agency. If hunters hunt without the necessary approval and permits, they can be fined and depending on the seriousness of the offence sent to jail. Hunting and trapping are often confused. Trappers catch animals using scented, camouflaged or baited traps, cages or nets. Many hunters skin animals to sell the skins and pelts. Hunters may be involved in wildlife management (relocation of animals, research activities (blood sampling, etc.) and disease control (destruction of various animals that threaten animal and public health and safety).			
Related Occupations – which occupations are more or less the same?			
- Zoologist - Zoo-keeper - Animal control officer - Forester - Game warden			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Entry to Work Place			
In service training may be provided under the supervision of an experienced hunter.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A hunter should: - be responsible; - have good eyesight; - enjoy working outdoors. You need to be at least 18 years old.

Projectionist			
General Information			
Description – what is this occupation?			
A projectionist operates and adjusts the equipment necessary for the showing of films. You have to run the projector, audio equipment, rewinding machine and seven or more reels of film.			
Typical Job Activities – what will I do in this occupation?			
When a new film is received, the projectionist compiles a film programme, splicing and advertising films, trailers and main feature reels onto a large screening reel. The film is be examined and repaired if necessary and loaded into the projector which is also checked to ensure that it is operating properly. Once the film has been threaded, the focus is adjusted to project a clear image. When the projector reaches the proper speed, the shutter is opened and the film is shown. The reel is rewound after the film has been projected. When a film programme ends, the projectionist has to break down the advertising films, trailers and main feature reels and dispatch it to the next destination. A projectionist has to deal with all minor repairs to equipment. You must be technically inclined and have a fair knowledge of the basic principles of machinery and electricity. The projectionists will probably also be expected to control the following activities at a cinema: - music before the film and at intervals - dimming the lights - adjusting the air-conditioning - informing the audience of the safety procedures in an emergency such as a fire.			
Related Occupations – which occupations are more or less the same?			
- Machine operator - Machine worker - Metal casting machine operator - Office machine servicer - Theatre manager			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 9 Certificate. A Senior Certificate is recommended. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Technika: Electrical, Technika: Mechanical			
Entry to Work Place			
IN-SERVICE TRAINING: In-house training (6 months) is provided by the organisation where the candidate is employed. The training consists of three areas which include: - handling of films; - projection (the technical side); - operation of the projector (lighting, screening and sound); - maintenance of the projector.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low

A projectionist should: - enjoy watching films; - enjoy working alone without direct supervision; - be responsible; - be an accurate worker; - have good eyesight and colour perception; - have good hearing; - have manual dexterity; - be mechanically inclined.

Proof-reader			
General Information			
Description – what is this occupation?			
A proof-reader reads the trial copy or proof of the material to be printed along with the original copy to be sure there are no errors			
Typical Job Activities – what will I do in this occupation?			
Using a standardised code, any grammatical, typographical or compositional errors on the proof are recorded. Sometimes a proof-reader will check the copy and make corrections on the proof while another person (copy holder) reads the original aloud. In addition, a proof-reader may measure dimensions, spacing and positioning of page elements to be sure they meet the specifications. After the corrections have been indicated, the proof-reader returns the proof for correction and later checks the corrected proof against the original.			
Related Occupations – which occupations are more or less the same?			
- Copy holder - Dispatcher - Journalist - Publisher - Secretary - Typist			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate or a higher certificate. COMPULSORY SUBJECTS: Languages RECOMMENDED SUBJECTS: None			
Entry to Work Place			
IN-SERVICE TRAINING: The proof-reader is usually trained in the work situation. Most printing houses first employ the proof-reader as a copy holder. He reads original manuscripts aloud while an experienced proof-reader makes the proper corrections at the same time.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A proof-reader should: - have the ability to concentrate under noisy conditions; - enjoy performing routine work tasks; - work accurately and quickly, even under pressure; - pay close attention to details; - follow directions closely; - have good vision and stamina; - have good work habits; - be bilingual and have a good command of languages (especially English).

Psychologist			
General Information			
Description – what is this occupation?			
A psychologist sees clients for psychological assessment, psychotherapy and counselling. You will work with individuals, couples, families, organisations and groups. You may also select people for posts and do evaluations.			
Typical Job Activities – what will I do in this occupation?			
A psychologist gathers information about people's interests, abilities and behaviour in order to be able to understand, explain and predict human actions. The psychologist is interested in adjustment problems and the results of prolonged stress. You will gather information through interviews, experiments and psychological tests. You may help individuals to deal with the problems of daily living, provide psychotherapy or conduct behaviour modification programmes in mental clinics and hospitals. You will also study human behaviour in terms of the environment or individual development. A psychologist may move out into the community and act as consultant or be involved in preventive work. You may offer to teach people problem-solving skills. You may also train community helpers to become more skilled in serving their communities. In the forensic field a psychologist can play an important role in custody disputes and criminal offences. The following psychological fields can be identified: - Clinical psychology: The clinical psychologist usually works in a hospital or in private practice where diagnostic and therapeutic services are provided to patients who are experiencing emotional and/or mental distress. - Counselling psychology: The counselling psychologist works mainly with people experiencing everyday adjustment problems and is responsible for career counselling, marriage counselling and general guidance. - Educational psychology: The educational psychologist works in an educational environment. Pupils, students, parents and teachers are given advice on topics such as academic performance and developmental strategies. - Industrial psychology: The industrial psychologist works in a business or industrial setting. Your function will be to direct the economic well-being of the employing organisation.

Psychometrist			
General Information			
Description – what is this occupation?			
A psychometrist is directly involved in psychological testing and works under the supervision of a professional psychologist.			
Typical Job Activities – what will I do in this occupation?			
A psychometrist carries out the testing and initial evaluation of clients by means of psychometric measuring instruments such as aptitude tests, interest questionnaires and personality inventories. You will conduct interviews, summarise test scores and keep records and statistical information up to date. These evaluations enable the psychologist to select the most suitable procedures for counselling, psychotherapy and job placement for individual clients. The psychometrist may also participate in personnel research projects and in the planning and evaluating of personnel enrichment programmes.			
Related Occupations – which occupations are more or less the same?

Public Prosecutor			
General Information			
Description – what is this occupation?			
The public prosecutor represents the Attorney-General in criminal cases in a magistrate's or regional court. Each prosecutor has a delegation to prosecute in a specific magisterial district or regional division.			
Typical Job Activities – what will I do in this occupation?			
The public prosecutor studies police dockets and often asks for additional police investigation to build up a complete case. On the basis of the evidence a decision is made whether the accused may reasonably be charged and in terms of which law or regulation this should be done. If it is decided to prosecute the accused, you will summon the accused and witnesses to appear in court. The public prosecutor puts the case to the court, explaining and arguing all relevant evidence, whether against or in favour of the accused, to ensure that justice prevails. You will try to prove the alleged transgression beyond reasonable doubt. The public prosecutor's work is done mostly in court and in an office where research is done on a case. You may sometimes accompany the witnesses to the scene of the crime to get more information about the case. You also have to do administrative work and you have to write reports to the Attorney-General and keep record of cases dealt with.			
Related Occupations – which occupations are more or less the same?			
- Advocate - Article clerk - Attorney - Legal adviser - Legal assistant/paralegal - Magistrate - Notary - State attorney			
Educational Requirements - which qualifications do I need to enter this occupation?

Public Relations Practitioner			
General Information			
Description – what is this occupation?			
Public relations is a management tool aimed at bringing people together to promote understanding.			
Typical Job Activities – what will I do in this occupation?			
A public relations practitioner uses different forms of communication to establish an efficient two-way interaction between a company and other groups of people. You will help people and organisations gain public acceptance by explaining the aims, objectives and methods of the organisation, and by building and maintaining a favourable image. The public relations practitioner gives out information for newspaper items, magazine articles and news spots so that the public will be aware of a particular company's projects and accomplishments. You will also arrange and conduct public contact campaigns which may include setting up speaking engagements, writing speeches, speaking for employers at community functions, planning company conferences and managing fund-raising drives. You may help to prepare stockholders' reports or work to improve employer/employee relations. The public relations practitioner may work in a variety of areas or in one specific field: - consulting - community involvement - employee communication - industrial affairs - media liaison - corporate advertising - videos - speeches - organising of special events - crisis communication.

Publisher			
General Information			
Description – what is this occupation?			
The main responsibility of a book publisher is to decide what to publish.			
Typical Job Activities – what will I do in this occupation?			
An author may submit a manuscript or may be commissioned to write a book. Manuscripts are either submitted by an author, or an author may be commissioned to write a book. When an author submits a manuscript, the publisher makes a decision on whether to publish it or not, based on the quality and suitability of the book for the company's publishing list. Commissioning general books requires an ability to accurately assess trends in the reading market. Commissioning for educational publishing entails regular contact with educational or university departments, depending on the sector of education, to establish suitable subject areas in which to publish. Once a reading trend or subject area has been identified, the publisher has to find a suitable author to write the manuscript and a publishing contract is negotiated. When a book is accepted for publication it is subjected to a process of editing, design, production and marketing. In medium- to large-sized publishing houses, specialised personnel usually control these processes. As a publisher you must, however, keep in touch throughout the process as budgets, deadlines, publicity and special editorial agreements are ultimately your responsibility.			
Related Occupations – which occupations are more or less the same?			
- Author/writer - Art editor and critic - Copy-writer - Journalist - Librarian and Information worker - Marketing manager and researcher - Public relations officer - Translator			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption. COMPULSORY SUBJECTS: Languages RECOMMENDED SUBJECTS: None			

Entry to Work Place			
This is a senior position which requires a working knowledge of the publishing process. Graduates are therefore most likely to enter the industry as editors, marketing representatives or production assistants. OTHER TRAINING: The Publishing Training Project offers a range of short courses including: - Publishing Overview. - Publishing Management. - Commissioning. - Editing. - Production Management. - Book Design.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A publisher should: - be an avid reader; - have a wide general knowledge; - foster a deep interest in all aspects of education (educational publisher); - have co-ordination, financial and negotiation skills.

Purchasing Manager			
General Information			
Description – what is this occupation?			
A purchasing manager ensures the effective supply of machinery, raw materials and services to enterprises by buying items which are used or processed by his employer.			
Typical Job Activities – what will I do in this occupation?			
The main duty of a purchasing manager is to find suppliers who offer the best value. You will therefore have to compare catalogues and journals, telephone suppliers, examine samples and attend demonstrations and conferences. You will consult with employees in the various departments to determine the specifications of the items needed. The purchasing manager must establish good business relationships with suppliers in order to obtain satisfactory payment plans, quick delivery for emergency orders and cost savings. You must check delivered goods before you can authorise payment. You therefore need a sound knowledge of every aspect of the company.

Quantity Surveyor			
General Information			
Description – what is this occupation?			
A quantity surveyor is a highly qualified member of a profession that plays an indispensable role in the building, construction and allied industries, including mining.			
Typical Job Activities – what will I do in this occupation?			
Your work will involve the control of the financial aspects of the planning, design and construction of buildings. The quantity surveyor is also described as a 'building economist'. You will act mainly in the area of cost control (particularly cost to the client) and you will be a member of a professional team which may include architects, engineers and electrical and mechanical engineers, all of whom are appointed to advise their client on various aspects of a particular building project. The quantity surveyor: - prepares estimates, feasibility studies and budgets for building projects - prepares tender documentation for competitive tendering - negotiates building contracts - advises on and prepares contract documentation - monitors costs for the duration of the project - determines final costs - prepares property valuations for insurance purposes.			
Related Occupations – which occupations are more or less the same?			
- Assayer - Builder - Building contractor - Civil engineer - Construction quantity surveyor - Draughtsman - Industrial designer - Industrial engineer - Landscape architect - Town and regional planner - Valuer			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption. COMPULSORY SUBJECTS: Mathematics, Physical Science RECOMMENDED SUBJECTS: Accounting			
Entry to Work Place			
ADDITIONAL REQUIREMENTS: The student who has completed his degree must do 2 or 3 year practical work under the supervision of a qualified quantity surveyor. REGISTRATION: After he completed a professional ability test the candidate can register with the South African Council for Quantity Surveyors.			

What level of natural skill and/or aptitude do I need for this occupation?				
Exceptionally High	High	Moderate	Low	
A quantity surveyor should: - be proficient in speech and writing; - work accurately; - be scrupulous and reliable; - have mathematical ability; - be practical; - have perseverance; - be interested in legal procedures, finance and building.

Quick Sketch Artist			
General Information			
Description – what is this occupation?			
Artists express thoughts, feelings and ideas by creating paintings or drawings. After making preliminary sketches they complete the composition by using acrylics, oils and watercolours.			
Typical Job Activities – what will I do in this occupation?			
Quick sketch artists draw people, animals, still lives, landscapes etc. Some quick sketch artists work from photographs. Their work may be exhibited by various art galleries and sometimes even sold abroad. Some sell their work to the public by exhibiting at flea markets. Although quick sketch artists do not necessarily have to have a tertiary training qualification, it is extremely difficult to make a living from art alone. Therefore a degree in graphic arts or art and design will give an artist access to other careers in the arts field, e.g. graphic design. To be a quick sketch artist takes a lot of talent and many hours of practice.			
Related Occupations – which occupations are more or less the same?			
- Body make-up artist - Police artist - Paint maker - Sculptor - Painter - Screen printer

Radio and Television Mechanic			
General Information			
Description – what is this occupation?			
The radio and television mechanic has to trace defects and repairs radios and TV sets. They may be defective for various reasons, e.g. parts that have worn out or bad connections as a result of heat and dampness.			
Typical Job Activities – what will I do in this occupation?			
The radio and television mechanic: - finds the source of the problem by checking tubes, observing the picture and sound, and looking for broken connections - may make simple adjustments in customers' homes - uses wiring diagrams and special testing equipment to find and fix more complex problems - may set up, install and adjust TV antennas and receivers and instruct customers on the proper use of this equipment - may also install and repair components in stereo systems, video-tape machines, car radios and public address systems. Most of the radio and television mechanic's work is done indoors in a workshop, but you will also be expected to travel to clients' homes.			
Related Occupations – which occupations are more or less the same?			
- Air-conditioning and refrigeration mechanic - Computer mechanic - Electrician - Instrument mechanic - Lift mechanic - Office machine mechanic - Radar and radio mechanic - Telecommunications mechanic - Theatre technician			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 9 Certificate. Some employers prefer higher qualifications. COMPULSORY SUBJECTS: Mathematics RECOMMENDED SUBJECTS: Trade Theory, Technika: Electronics			

Entry to Work Place			
APPRENTICESHIP TRAINING: If you want to become a radio and television mechanic you need to register with an employer providing suitable training. Training consists of theoretical and practical work: - Theoretical training: At a technical(FET) college or a correspondence course at Technisa. - Practical training: In-service training under supervision of a qualified tradesman. - Duration of course: Up to 4 years depending on the progress of the candidate in the modular system. - Final examination: A compulsory trade test set by the Department of Labour to qualify as an artisan. ADDITIONAL REQUIREMENTS: If you want to become a radio and television mechanic you must be at least 16 years old. NOTE: Changes in the training of artisans are subject to the official approval of the Registrar of Labour Training. A new system of apprenticeship training will be introduced within the next few years. Each industry will make use of its own methods and time to implement the system.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A radio and television mechanic should: - enjoy working with his hands; - have mechanical ability; - have a thorough knowledge of electronics; - work well without supervision; - get along well with others; - be bilingual; - have hand and finger dexterity; - have an eye for detail; - have good colour vision and hearing.

Referee			
General Information			
Description – what is this occupation?			
A referee or umpire officiates at sporting events, observing the actions of participants to determine whether they are transgressing the rules of a sport.			
Typical Job Activities – what will I do in this occupation?			
As a referee, you will use your experience and knowledge of a sport, within a framework of established guidelines, to resolve disputes. In many sporting codes 'electronic eyes' or video cameras are now used to assist the referee. The referee's decision is generally regarded as the final word in a sporting event and, in certain sports such as cricket or rugby, serious penalties are inflicted on players who show the slightest sign of questioning such a decision.

Reflexologist			
General Information			
Description – what is this occupation?			
Reflexology is a branch of holistic medicine which is based on the principle that every part of the body corresponds to reflexes in the feet and that working on the feet in a specific way can help to heal those parts of the body. It is believed that disease is caused by the body being constantly exposed to stress which gradually erodes its immune system.			
Typical Job Activities – what will I do in this occupation?			
The reflexologist therefore aims at reducing stress, consequently enabling the body to heal itself naturally. Circulation and the supply of nutrients and oxygen to the cells improve when the body is in a state of relaxation. The reflexologist, in keeping with the holistic approach to healing, combines this special treatment with advice on nutrition, exercise and positive thinking. Reflexology is not regarded as a replacement for medical treatment, but as a complementary therapy.			
Related Occupations – which occupations are more or less the same?			
- Acupuncturist - Aromatherapist - Chiropractor - Homoeopath - Osteopath

I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours			

Refrigeration Mechanic			
General Information			
Description – what is this occupation?			
The industrial refrigeration mechanic installs, repairs and maintains the air-conditioning and refrigeration equipment used in a wide range of applications.			
Typical Job Activities – what will I do in this occupation?			
This involves reading and understanding mechanical, electrical and architectural drawings and the use of hand- and workshop tools, brazing and soldering equipment and measuring instruments.			
The refrigeration mechanic installs the unit and makes the necessary electrical connections. A good knowledge of electrical principles is essential. You will also undertake the maintenance and repair of units. In doing this you must be able to trace a fault and make repairs and adjustments. These faults may be electrical or mechanical.			
Related Occupations – which occupations are more or less the same?			
- Construction electrician - Construction plant mechanic - Electrical wireman - Knitting-machine mechanic - Millwright - Radio and television mechanic - Radiotrician			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 9 Certificate. Some employers prefer higher qualifications. COMPULSORY SUBJECTS: English RECOMMENDED SUBJECTS: Trade Theory, Mathematics, Technical Drawing, Physical Science, Technika: Mechanical			
Entry to Work Place			
APPRENTICESHIP TRAINING: If you want to become a refrigeration mechanic you need to register with an employer providing suitable training. - Theoretical training: At a technical(FET) college or a correspondence course at Technisa up to N6 level. - Practical training: At an accredited training centre. - In-service training: Under supervision of a qualified tradesman. - Duration of course: 4 years but it can be completed in a shorter period provided that the candidate has higher educational qualifications. - Final examination: A compulsory trade test set by the Department of Labour to qualify as an artisan. ADDITIONAL REQUIREMENTS: If you want to become a refrigeration mechanic you must be at least 16 years old. NOTE: Changes in the training of artisans are subject to the official approval of the Registrar of Labour Training. A new system of apprenticeship training will be introduced within the next few years. Each industry will make use of its own methods and time to implement the system.			

What level of natural skill and/or aptitude do I need for this occupation?				
Exceptionally High	High	Moderate	Low	
A refrigeration mechanic should: - have mechanical aptitude; - enjoy working with his hands; - be able to liaise well with clients; - have mathematical aptitude; - be able to give attention to detail; - be accurate and work carefully; - be able to work without direct supervision.

Career Progress and Path						
Activities to enhance career progress – what can I do to improve my career progress in this occupation?						
Further Studies in the specific career field	Further studies in related fields	Experience in specific field	Work performance	Work performance	Do presentations, seminars, publish articles, etc.	General management studies
Possible career paths – which kind of career path can I follow in this occupation?						
Specialist career in the specific field	Management positions in the specific field	Management positions in related fields	General business management	Executive positions	Consultant/ contractor/ own practice/ freelance	Own business
Employment Stability						
Is the demand (the need) for this particular skills stable over the years?						
Exceptionally Stable		Very stable		Moderately stable		Not very stable
The need for people in this occupation and with these skills is influenced by:						
Government policy and legislation		Government strategy and activities		The growth of private companies (big and small)		
Technology		Direct consumer demands – “man in the street”		My own performance and skills		
Possible reasons to consider this career – I should consider this career if I want a job where:						
The need is determined by government	The need is determined by the consumers	The need is determined by private companies	The need is determined by new technology	I can start a business in this field or with these skills	The job is fairly stable	The job is ideal for becoming a general manager
I can be of service to people	I can work with my hands	I can design things	I can repair things	I can work with technology	I can create new things	I'll be able to learn new things on an ongoing basis
I can work with languages	I can work with people	I can make more money than the average person	I can do practical work and I do not have to study theories	I can study for a number of years and face intellectual challenges	Minimum or no qualifications are required	I can work for myself
I can work flexible hours	I can entertain people	I can work internationally	I can determine my own income	I am very interested in a specific subject or field	I can progress in the business world	I do not have to struggle with finding vacancies
I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours	I like to work with machines		

Road Construction Worker			
General Information			
Description – what is this occupation?			
Unskilled labourers usually perform road construction work. Workers can specialise in certain types of work or operate various pieces of equipment. If you are diligent and responsible you may be promoted to a supervisory position where you will train and supervise workers.			
Typical Job Activities – what will I do in this occupation?			
Several types of work can be distinguished: - General worker: Performs general excavations with a pick and shovel and cleans the side of the road using a shovel and a broom. - Machine operator: Performs road excavations using mechanical or air pressure jackhammers to loosen the road material. Vibratory tampers are used to compact material in layers. - Lorry driver: Transports workers and equipment to the site and carries out all other transporting functions. - Tar patcher: Receives written orders from the foreman. You will supervise your team to repair holes and trenches in the road and determine the amount of tar and other materials required. - Road maker: Receives orders and drawings indicating the road-building programme. You will organise the moving of road camps. You will supervise the work of the road construction plant operators and other workers and control the maintenance of machinery. The noise level in this type of work is high and conditions are dusty, but employers provide appropriate safety clothing.			
Related Occupations – which occupations are more or less the same?			
- Assembly line worker - Bricklayer - Earth-moving equipment mechanic - Gardener - Labourer - Machine worker - Miner - Rigger - Road construction plant operator			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
No specific requirements. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: None			
Entry to Work Place			
IN-SERVICE TRAINING: In-service training is offered by all employers.			

What level of natural skill and/or aptitude do I need for this occupation?				
Exceptionally High	High	Moderate	Low	
A road construction worker should: - be in good health as the work is physically demanding; - be willing to work outdoors in all kinds of weather; - not mind working away from home; - work as part of a team; - be able to follow instructions.

Roll Turner			
General Information			
Description – what is this occupation?			
The trade name of 'roll turner' is descriptive of the work. A metal blank is formed (turned) to a specific shape required for the rolling of steel in a rolling mill. Railway rails are one of the products made by a roll turner.			
Typical Job Activities – what will I do in this occupation?			
At rolling mills, metals are shaped by passing heated metal blocks back and forth between the specially formed rolls of a mill stand, until the desired shape and length have been obtained. The roll turner forms and shapes these sets of rolls by means of a lathe and specially prepared tools such as templates (patterns) until they conform to the specified shape. Working from a blueprint the roll turner clamps a steel block in a giant lathe and cuts the desired grooves into the steel block, using cutting tools. You will constantly check the shape and size of the grooves on the roll against a template (pattern). In this way you will manufacture the rolls to be used in rolling mills to shape other steel blocks.			
Related Occupations – which occupations are more or less the same?			
- Airframe fitter - Automotive fitter assembler - Carriage and wagon fitter - Compositor - Construction plant mechanic - Die-maker - Fitter and turner - Instrument maker - Machine-minder - Roll tool-maker - Template or pattern-maker			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 9 Certificate. Some employers prefer higher qualifications. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Trade Theory, Mathematics, Metalwork, Technical Drawing			

Entry to Work Place			
APPRENTICESHIP TRAINING: If you want to become a roll turner you need to register with an employer providing suitable training. - Theoretical training: At a technical(FET) college or a correspondence course at Technisa. - Practical training: At an accredited training centre. - In-service training: Under supervision of a qualified tradesman. - Duration of course: 2 to 4 years but it can be completed in a shorter period provided that the candidate has higher educational qualifications. - Final examination: A compulsory trade test set by the Department of Labour to qualify as an artisan. ADDITIONAL REQUIREMENTS: If you want to become a roll turner you must be at least 16 years old. NOTE: Changes in the training of artisans are subject to the official approval of the Registrar of Labour Training. A new system of apprenticeship training will be introduced within the next few years. Each industry will make use of its own methods and time to implement the system.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A roll turner should: - be meticulously accurate; - concentrate for long periods; - be a very careful worker; - be responsible; - like to work with his hands.

Rubber Technologist			
General Information			
Description – what is this occupation?			
As a rubber technologist you will apply your knowledge of physics, chemistry and engineering to the process of converting raw rubber material into saleable products such as tyres and rubber bands.			
Typical Job Activities – what will I do in this occupation?			
The rubber technologist usually specialises in one of the following areas of the rubber industry: - Product and production control: This entails drawing up standard formulae for the production of rubber products based on laboratory experimentation. - Product development: Here the rubber technologist is involved in the design of new rubber products. Planning is done in co-operation with engineers, draughtsmen and consumers in the mining, chemical and automotive industry. A prototype is made and tested to ensure it complies with the requirements. - Quality control: Control of the rubber manufacturing process and ensuring that quality standards are maintained throughout. - Sales: The rubber technologist gives technical advice to customers and may be involved in work studies, technical writing, purchasing, market research, training and sales of rubber products.			
Related Occupations – which occupations are more or less the same?			
- Chemical laboratory technician - Coal technologist - Fibreglass worker - Petroleum technologist - Plastics technologist - Textile technologist - Timber technologist			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate. COMPULSORY SUBJECTS: Mathematics, Physical Science RECOMMENDED SUBJECTS: Computer Studies, Technical Drawing			
Entry to Work Place			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low

A rubber technologist should: - have an analytical mind; - be able to solve problems logically; - be adaptable; - master both chemical and engineering problems; - be interested in physics and chemistry.

Sailmaker and Upholsterer			
General Information			
Description – what is this occupation?			
A sailmaker and upholsterer uses canvas and PVC sheets to make or repair a variety of articles like tool bags, blinds, camping beds, tents, army webbing, sails, tarpaulins, garden chairs and sun visors.			
Typical Job Activities – what will I do in this occupation?			
The sailmaker and upholsterer: - cuts canvas and PVC sheets according to patterns and stacks them - stitches the various pieces together by hand or machine - adds the necessary accessories such as PVC windows, eyelets, ropes, zips, press studs and buckles for fastening - manufactures or repairs large items such as tents, sails and tarpaulins - cuts and stitches material lining or stiffening into certain articles. When articles are made with PVC sheeting only, modern apparatus is used to fuse the seams together.			
Related Occupations – which occupations are more or less the same?			
- Automotive trimmer - Bottom stainer: shoes - Boring machine setter operator - Button maker - Leather tradesman - Sewing-machine operator - Upholsterer			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 8 Certificate. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Needlework and Clothing			

Entry to Work Place			
IN-SERVICE TRAINING: At sail factories a worker can receive in-service training. SA NAVY: A sailmaker can do an apprenticeship of 4 years in the SA Navy in Durban or Simonstown. The candidate need not to pass a trade test. APPRENTICESHIP TRAINING: If you want to become a sailmaker and upholsterer you need to register with an employer. All costs of successful training are borne by the employer. Wage increases during the stages of apprenticeship are dependent on the progress through the system as well as entry level. Entry levels are more practical than academic. The Furniture Industry Training Board (FITB) enables the industry to provide comprehensive training to all its employees: - Theoretical and practical training: Provided by professional trainers at one of the centres of the FITB. Progress depends on the ability to "do" rather than to "know". - Duration of course: 2 to 4 years depending on the progress of the candidate in the modular system. - Final examination: A compulsory trade test at the Centre of Trade Testing at Olifantsfontein as well as accredited training centres. ADDITIONAL REQUIREMENTS: If you want to become a sailmaker and upholsterer you must: - be at least 16 years old; - undergo a selection test battery. NOTE: Changes in the training of artisans are subject to the official approval of the Registrar of Labour Training. A new system of apprenticeship training will be introduced within the next few years. Each industry will make use of its own methods and time to implement the system.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A sailmaker and upholsterer should: - be willing to work hard; - be creative and like making things; - enjoy routine tasks; - work in a team; - have good eye-hand co-ordination; - have manual dexterity to work with sewing machines; - be healthy and strong to work with heavy machinery, canvas or PVC.

Sales Manager			
General Information			
Description – what is this occupation?			
A sales manager organises and monitors marketing and distribution strategies. Your work will include the supervision of sales staff and the development of sales programmes designed to introduce prospective customers to new products and services.			
Typical Job Activities – what will I do in this occupation?			
The sales manager is also responsible for reviewing market trends and evaluating sales. Sales management may include the development of a network of dealers who sell a product in the field. It is important that the sales manager leads by example in providing excellent service to clients and the public at large. Poor service can lead to a decline in profit for the company. The sales manager must provide the sales staff with the best training and information on sales strategies. In bigger companies there may be more than one sales manager and every manager may be responsible for a number of sales representatives.			
Related Occupations – which occupations are more or less the same?			
- Buyer - Marketing manager - Market researcher - Salesperson - Sales representative			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption for a degree course. Senior Certificate for a diploma course. COMPULSORY SUBJECTS: Mathematics RECOMMENDED SUBJECTS: Business Economics, Accounting, Economics			
Entry to Work Place			
UNIVERSITY: An appropriate B-Degree. OTHER TRAINING: The Institute of Marketing Management: Diploma in Marketing Management (three years). Certificate in Sales Management, Salesmanship, Retail Marketing and Marketing Management (one year).			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low

A sales manager should: - be persistent and persuasive; - judge character accurately; - enjoy detailed work; - be perceptive; - deal easily with people; - be able to make decisions and work without supervision; - have mathematical ability; - understand of human nature.

Sales Representative			
General Information			
Description – what is this occupation?			
A sales representative introduces the public to the products or services and tries to create an interest which leads to the placement of orders for products or the utilisation of services. You will introduce your firm's wares or services by means of samples and brochures.			
Typical Job Activities – what will I do in this occupation?			
You will explain the use and benefits of a product and answer questions about it. As a sales representative, you will not only act as a vendor, but you will in fact be your firm's ambassador to the public. You will explain the sales policies, attitudes, aims and intentions of your firm. You are also a liaison officer between your firm and it's clients. Your client can be anyone from an attorney to a mechanic. You will visit them regularly and try to maintain a positive attitude towards your firm. It is therefore expected from the sales representative to travel extensively. The company usually provides you with a car or a transport allowance to cover your travel expenses.			
Related Occupations – which occupations are more or less the same?

Salesperson			
General Information			
Description – what is this occupation?			
A salesperson sells products to the public.			
Typical Job Activities – what will I do in this occupation?			
You must know the products that you are selling, so that you can answer customers' questions about the products, can demonstrate how they work and how they should be used. You will show various models and colours of the products and make suggestions to suit the customer's needs. The salesperson makes out sales slips and invoices, takes cash payments and returns change and receipts. Sometimes you may complete hire-purchase documents and have them duly signed. In some cases you will handle product returns, exchanges and trade-ins.			
Related Occupations – which occupations are more or less the same?			
- Insurance agent - Real estate agent - Sales representative - Shop assistant			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 10 Certificate. Senior Certificate is recommended. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Mathematics, Business Economics, Accounting, Economics			
Entry to Work Place			
IN-SERVICE TRAINING: Although no specific training course is required for this occupation, the science and art of selling today has become so finely developed that a truly good salesperson deserves the description "professional". Entry requirements just like the nature of the work depend on the type of product offered by the firm. A salesman usually starts his career as a clerk, shop assistant, cashier or apprentice and later undergoes in-service training.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low

I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours			

Saw-operator			
General Information			
Description – what is this occupation?			
There are two kinds of saw-operators:			
Typical Job Activities – what will I do in this occupation?			
The forestry saw-operator: -- works in a plantation and is responsible for the cutting of trees -- fells trees in forests and cuts them into logs -- uses an axe, manual saw or chain-saw -- observes the tree and determines the direction in which it should fall when cut -- makes an undercut in the trunk and then a saw-cut on the opposite side to meet the undercut which causes the tree to fall in the right direction. - The sawmill saw-operator: -- works in the sawmill where felled trees are processed -- operates the following machines: band-saw, frame-saw and circular saw. It is important that both the forestry and sawmill saw-operator should be extremely cautious because of the high-risk nature of the job.			
Related Occupations – which occupations are more or less the same?			
- Forester - Gardener - Groundskeeper - Saw-doctor - Saw-repairer - Sawing machine operator: metal - Tree marker - Tree planter: forestry - Wood grinderman - Woodmachinist - Wood preparation plant operator - Wood processing machine operator - Wood processing production worker			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
No specific requirements. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Woodwork			

Entry to Work Place			
FORESTRY SAW-OPERATOR: In-service training is given to the experience forestry worker. After the in-service training the worker works for a further 6 months before he is appointed as a chain-saw operator. SAW-MILL SAW-OPERATOR: Training is provided at the SALMA Sawmilling Training Centre at Sabie in Mpumalanga Province.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A saw-operator should: - be dependable and responsible; - work and decide independently; - have above-average physical health and strength; - have manual dexterity; - have good eye-hand co-ordination; - be able to lead those under him (foreman).

Sea Transport Worker: Deck and Engine-room Rating

General Information

Description – what is this occupation?

A deck and engine-room worker is responsible for maintaining the exterior of the ship, lookout watches at sea, gangway duties in port and cleaning, repairing and ensuring that the ship's engine is kept in good working order. You will be trained in the art of seamanship and general nautical knowledge.

Typical Job Activities – what will I do in this occupation?

- Quartermaster: In addition to normal deck duties the quartermaster is responsible for manning the gangway in port, making deck rounds, checking moorings and steering in restricted waters.
- Boatswain: The boatswain is in charge of the quartermasters and deck crew and takes orders from the first officer of the ship.
- Watch-keeper: In addition to normal engine-room duties the watch-keeper assists the senior engineer officer on watch with watch-keeping duties, maintains the engine and supervises engine-room cleanliness.
- Maintenance assistant: The engine-room leading hand is the petty officer in charge of the watch-keepers and engine-room crew. You will be responsible for stowage and the security of engine-room stores and take your orders from the second engineer officer.

Related Occupations – which occupations are more or less the same?

- Fisherman
- Naval engineering officer
- Naval intelligence officer

Educational Requirements - which qualifications do I need to enter this occupation?

Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training

Entry to Tertiary or Further Studies

Senior Certificate.
COMPULSORY SUBJECTS: None
RECOMMENDED SUBJECTS: Maritime Studies

Entry to Work Place

IN-SERVICE TRAINING:
Shipping companies offer induction courses on the art of seamanship and general nautical knowledge. On completion the trainee is sent on 6 to 9 months practical training at sea under the guidance of the boatswain and engine-room leading hand. On completion of the practical training the trainee is promoted to ordinary seaman and will be allocated to either the deck or engine-room.

ADDITIONAL REQUIREMENTS:
Crew-member positions on a ship are only available to persons over the age of 16.

What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A deck and engine-room worker should: - love the sea and outdoor life; - be in good health and physically fit; - be willing to work hard and live in confined conditions.

I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours			

Sheet Metal Worker			
General Information			
Description – what is this occupation?			
A sheet metal worker manufactures various types of articles and components out of sheet metal less than three millimetres thick.			
Typical Job Activities – what will I do in this occupation?			
The sheet metal worker: - makes and installs sheet metal ducts for air-conditioning, heating and ventilation systems - makes and installs flat metal for kitchen walls and counters and stamped metal for roofing and siding - installs roof gutters and down pipes for rainwater drainage - makes skylights and vents for industrial buildings. The sheet metal worker manufactures most metal components in a workshop. You will measure, cut, bend, shape and joins most of the pieces you will use. After the metal has been cut you will cement, bolt, rivet, solder or weld the seams and joints together to form ducts, pipes, tubes and other items. In the final stage, the excess soldering or welding is removed and the article cleaned. Sometimes a product has to be treated against rust by galvanising or tin-plating.			
Related Occupations – which occupations are more or less the same?			
- Automotive body repairer - Boilermaker - Instrument maker - Instrument mechanician - Joiner - Machinist - Metal pattern-maker - Ornamental ironworker - Ornamental sheet metal worker - Plate roller: steel metal products - Roll turner - Saw repairer - Sheet roller: steel - Steel worker: construction			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 9 Certificate. Some employers prefer higher qualifications. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Trade Theory, Mathematics, Physical Science, Plumbing and Sheet Metal Work, Welding and Metalworking			

Entry to Work Place			
APPRENTICESHIP TRAINING: If you want to become a sheet metal worker you need to register with an employer providing suitable training. - Theoretical training: At a technical(FET) college or a correspondence course at Technisa up to N6 level. - Practical training: At an accredited training centre. - In-service training: Under supervision of a qualified tradesman. - Duration of course: 4 years but it can be completed in a shorter period provided that the candidate has higher educational qualifications. - Final examination: A compulsory trade test set by the Department of Labour to qualify as an artisan. ADDITIONAL REQUIREMENTS: If you want to become a sheet metal worker you must be at least 16 years old. NOTE: Changes in the training of artisans are subject to the official approval of the Registrar of Labour Training. A new system of apprenticeship training will be introduced within the next few years. Each industry will make use of its own methods and time to implement the system.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A sheet metal worker should: - be deft with his hands and have manual dexterity; - be a precision worker; - be interested in mechanical work; - work alone as well as part of a team; - have good health and physical stamina; - have mechanical aptitude; - have good eye-hand co-ordination.

Shop Assistant			
General Information			
Description – what is this occupation?			
A shop assistant is the link between the store's products and the customer. It is important that you promote a positive image of the shop because your actions will determine if a client will visit the store again. You will usually sell merchandise in all types of retail stores.			
Typical Job Activities – what will I do in this occupation?			
Your work will depend on the type of store you work in. You have to know a great deal about the products you are selling, e.g. if you are working in an electrical appliances store you will need to know how these appliances work. A shop assistant shows products to customers and helps them to select products which suit their needs. You will receive payment and give change for purchases. You will fill out sales slips, wraps up or bag purchases and make the arrangements for pick-up or home delivery. When you are not busy with customers you may have to note which items are running low or which supplies are required. Other duties include answering telephone calls, handling enquiries and monitoring the store to prevent shoplifting.			
Related Occupations – which occupations are more or less the same?			
- Cashier - Enquiries clerk - Library assistant - Real estate agent - Sales manager - Salesperson - Sales representative - Stock clerk - Travel agency clerk			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
No specific high school requirements is necessary to enter this career but it is a Senior Certificate is recommended. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Accounting, Mathematics			
Entry to Work Place			
IN-SERVICE TRAINING: Most shop assistants learn their skills on the job. Large stores may provide training programmes which last for several days, followed by on-the-job training under an experienced worker. The programme enables the shop assistant to know beforehand what the job entails and he can commence work with confidence.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low

A shop assistant should: - be alert and even-tempered; - enjoy working with the public; - be tactful and patient; - get along well with others; - be persuasive; - be friendly; - have good health and stamina; - have a neat, well-groomed appearance; - have good taste and insight into the tastes of clients.

Soil Scientist			
General Information			
Description – what is this occupation?			
As a soil scientist you will apply your knowledge of soil properties to determine the possible yield of a particular type of soil and what effect alternative practices will have on soil productivity.			
Typical Job Activities – what will I do in this occupation?			
The duties of the soil scientist include: - classifying soil according to standard types - conducting experiments on farms to determine the best soil type for different plants - analysing soil to establish chemical and mineralogical relationships to plant growth - investigating the effect of tillage, fertilisation, crop rotation, environmental factors and pollution on different soil types. A soil scientist works both in the laboratory and in the field. You will work closely with other agricultural experts and with farmers, ensuring that research results and your knowledge are used to improve soil-management practices. A soil scientist can specialise in different aspects of soil namely: classification, mineralogy, biology, chemistry, physics, fertility and decay.			
Related Occupations – which occupations are more or less the same?

Sound Operator: Radio, Television and Film			
General Information			
Description – what is this occupation?			
A sound operator (radio, television and film) is responsible for recording the sound tracks for productions and the broadcast thereof.			
Typical Job Activities – what will I do in this occupation?			
You will use a control desk, microphones, tape recorders and turntables to achieve the optimum sound quality. Sound work entails an interesting mix of elements to create a realistic sound track. Besides recording the actual voices or music for a programme, the sound operator also has to create background sound and special effects. Over time you will pick up various tricks as how to produce everyday sounds so that they sound realistic when broadcasted. The sound operator works very closely with the producers on sound mixing to achieve the delicate balance of voices, sound effects and background music to create the right setting and mood. A film sound operator is sometimes called upon to dub films from one language to another. This is a difficult task because lip movements, sound effects and acoustics have to be as close as possible to the original. Broadcasting of outside sports events poses special problems for radio and television sound operators.			
Related Occupations – which occupations are more or less the same?			
- Producer - Scenic designer - Sound-mixer - Theatre technician - Video tape operator - Vision-mixer			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Technika: Electronics, Speech and Drama			
Entry to Work Place			
IN-SERVICE TRAINING: Most employers offer a 6-week basic training course. On-going in-service training is given.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low

A sound operator should: - have a high level of technical skill; - be creative; - have excellent hearing; - have patience and perseverance.			
Employment Indicators – what are the important employment facts regarding this occupation

Speech-Language Therapist and Audiologist			
General Information			
Description – what is this occupation?			
The speech-language therapist and audiologist helps babies, children and adults to overcome or reduce their communication disorders.			
Typical Job Activities – what will I do in this occupation?			
Speech-language therapy: This entails the assessment and remediation of speech disorders e.g. articulation problems, stuttering, cleft lip and palate, delayed language development and speech problems after a stroke. Audiology: This entails the diagnosis of hearing problems, fitting of hearing aids and therapy for patients with impaired hearing. Therapy is aimed at improving language, speech and lip-reading abilities as well as listening disabilities and the treatment of persons with cochlear implants. Depending on the cause of the disorder the speech-language therapist and audiologist may work individually or as a team with one or more of the following: medical doctors, psychologists, physiotherapists, social workers, educationists and occupational therapists. Once the problem has been identified, an individual programme is worked out and in many cases the family of the patient is included in the therapy.			
Related Occupations – which occupations are more or less the same?			
- Occupational therapist - Psychologist - School Counsellor - Social worker - Special needs education teacher			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Mathematics, Biology, Physical Science			
Entry to Work Place			
REGISTRATION: On completion of the Bachelor's degree, the speech-language therapist has to register with the Interim Medical and Dental Council of South Africa.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low

A speech-language therapist and audiologist should: - be able to get along well with others; - be tactful; - be able to communicate well; - be emotionally stable and mature; - be patient and sensitive to the needs of others, but have the ability to remain objective; - be responsible; - be able to work independently; - have leadership ability; - want to help others.

Speleologist			
General Information			
Description – what is this occupation?			
Speleology (the study of caves), is an interdisciplinary science.			
Typical Job Activities – what will I do in this occupation?			
. In addition to specialising in speleology, one needs to have a broad knowledge of hydrology, chemistry, survey techniques, geology, biology and climatology, Many experts in the field have also been trained in land management concerns such as utilising caves as commercially viable tourist attractions, or in teaching. Early speleology is attributed to Emile Riviere (1890). In the early days, speleologists educated themselves, even though their jobs had absolutely nothing to do with natural resources. A speleologist by the name of Markel is a case in point, since he was a lawyer by training and not a scientist. Speleologists aim for the greatest possible degree of professionalism in data production. They use maps, drawings, scientific research, photos and reports to achieve this.			
Related Occupations – which occupations are more or less the same?			
- Spelunker - Caver			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training

I can be of service to people	I can work with my hands	I can design things	I can repair things	I can work with technology	I can create new things	I'll be able to learn new things on an ongoing basis
I can work with languages	I can work with people	I can make more money than the average person	I can do practical work and I do not have to study theories	I can study for a number of years and face intellectual challenges	Minimum or no qualifications are required	I can work for myself
I can work flexible hours	I can entertain people	I can work internationally	I can determine my own income	I am very interested in a specific subject or field	I can progress in the business world	I want to be physically active
I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours	I like to work with animals	I like to work with nature	I want to work outdoors

Sports Coach			
General Information			
Description – what is this occupation?			
Sports coaches teach individuals and teams how to improve the way they play their sport by analysing their performances, instructing players in relevant skills and enhancing players' performances. They help sportsmen/women to increase their sporting skills, abilities and techniques and attempt to maximize the players potential.			
Typical Job Activities – what will I do in this occupation?			
Coaches also are responsible for managing the team during both practice sessions and competitions. They direct team strategy and are responsible for replacements during competitions. Advocating good sportsmanship, promoting a competitive spirit, tutoring fairness, and teaching teamwork are all important responsibilities of the coach. Many coaches derive great satisfaction working with children or young adults, helping them to learn new physical and social skills, improving their physique, while also achieving success. Coaches employed in paid positions often work long, irregular hours and travel extensively. They must work evenings, weekends and holidays when most games and competitions take place. A sports coach may perform the following tasks: - observe individuals' performances to determine the level of instruction required - organise and supervise practice sessions - plan fitness and training programmes - organise and liaise with sports science support staff - teach players techniques to acquire additional skills or improve existing skills - keep up with changing rules, techniques, technology and philosophies in their sport - arrange schedules and entries into competitions - choose the team - plan and direct game strategy, sometimes in consultation with club officials - analyse the progress of games or competitions, and give signals and instructions to players - analyse the strengths and weaknesses of their athletes and those of the competition (often through the use of videotapes and films) - revise plans and strategies as needed - meet with media representatives and do public relations work - undertake related administrative tasks such as booking venues, organising tours and budgeting - recruit players and other coaching staff - manage coaching staff - acquire equipment.			
Related Occupations – which occupations are more or less the same?			
- Sport Advancement Officer - Sports Professional (sportsman) - Sport Manager - Aerobics/fitness instructor			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matriculation exemption for a degree course. Senior Certificate for diploma or BTech Degree. Note: Some entry-level positions for coaches or instructors only require experience derived as a participant in the sport or activity.			

Entry to Work Place			
Frequently, coaches are former athletes, especially at the professional level. Other qualification requirements vary from one sport to another and from one level of a sport to another. UNIVERSITY: Degree in Sport Sciences/Sport Psychology. TECHNIKON: Diploma or degree in Sport Management/Sport and Exercise Technology.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A coach needs: - a thorough understanding and knowledge of the skills, rules, techniques and psychology of the game or sport they coach; - to be physically fit; - to be able to lead, motivate and work well with sports players and teams; - good communication and instructional skills; - good organisational skills; - skills in evaluating the sporting ability of individual players and teams; - to be patient, fair, and able to work well under pressure; - be able to face criticism.

Sports Manager			
General Information			
Description – what is this occupation?			
The sports manager organises sport events and co-ordinates sport programmes.			
Typical Job Activities – what will I do in this occupation?			
You will also design and develop organisation structures and management systems to control large-scale investments and sponsorships. The Comrades road race is an example of the work a sport manager is involved in. The sports manager also: - designs and manages scientific training programmes for sportsmen - manages training programmes for the ordinary person who wants to keep fit - manages an enterprise e.g. a gymnasium or sport club - manages financial matters - advises how to obtain sponsorships - may also be involved in personnel matters such as selection, recruitment and development. Sports administrators regulate, plan and promote sporting and recreational activities. They make contact with other sports organisations in order to plan and co-ordinate such activities. They attend sporting tournaments, training courses and meetings where the administrative aspects of sports meetings and events are dealt with. They organise coaching sessions for trainers and leaders in sports and recreation, as well as special sports events and fitness schemes. They may help plan and design sporting and recreation complexes, and do research in the field of training, fitness, diet, equipment and apparatus. They also participate in the process of conflict resolution between sporting organisations or individual sportsmen and women.

Sportsman			
General Information			
Description – what is this occupation?			
The professional sportsman participates in competitive events such as soccer or boxing in order to entertain an audience.			
Typical Job Activities – what will I do in this occupation?			
As a professional sportsman you will spend a great part of your time exercising and practising under the direction of a coach to maintain a peak level of fitness and to improve and refine your technique. This is a very competitive career and the lifestyle of a professional sportsman is rigorous and disciplined with very little time for leisure. You will also have to pay strict attention to your diet as this is essential for developing the energy and physique that will bring you success in your field. You will generate the bulk of your income through your sport. It is, however, impossible to maintain a peak level of fitness for an indefinite period, so many sportsmen diversify into related activities such as the endorsement and sale of sports clothing and equipment as well as sports journalism in preparation for a future career.			
Related Occupations – which occupations are more or less the same?			
- Aerobics instructor - Biokineticist - Coach (professional) - Personal trainer - Physical education teacher - Sport advancement officer - Sport manager - Team manager			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
No specific requirements. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: None			
Entry to Work Place			
SPORTS COACHING: The professional sportsman needs to ensure that he or his team has the services of the best coach that can be afforded.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A professional sportsman should: - have a passion for sport; - be dedicated; - have excellent health and physical fitness; - have a competitive temperament; - be able to concentrate; - have stamina and self-discipline.

Spray-painter			
General Information			
Description – what is this occupation?			
A spray-painter uses a spray gun to spray paint onto the bodywork of a vehicle to change its colour or to repaint scratched or damaged paint work.			
Typical Job Activities – what will I do in this occupation?			
The spray-painter: - prepares the body work by removing dirt or grease - smoothes parts that have been panel-beaten - removes paint with sandpaper or paint-removing chemicals - covers the rest of the bodywork with paper in order to protect it - applies a preliminary coating of primer and then a thin layer of primer filler. The spray-painter mixes paints until exactly the same shade as the rest of the vehicle is obtained before the final four or five coatings of the required colour are applied. Paint has to be applied evenly and each coat must be allowed to dry thoroughly before the next is applied.			
Related Occupations – which occupations are more or less the same?			
- Automotive body repairer - Motor mechanic - Sheet metal worker - Vehicle body builder - Welder			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 9 Certificate. Some employers demand higher qualifications. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Mathematics, Motor Body Repairing, Trade Theory, Painting			
Entry to Work Place			
APPRENTICESHIP TRAINING: If you want to become a spray-painter you need to register with an employer providing suitable training. Training consists of theoretical and practical work: - Theoretical training: At a technical(FET) college or a correspondence course at Technisa. - Practical training: In-service training under supervision of a qualified tradesman. - Duration of course: 3 years depending on the experience of the candidate and his qualifications prior to the apprenticeship. - Final examination: A compulsory trade test set by the Department of Labour to qualify as an artisan. ADDITIONAL REQUIREMENTS: If you want to become a spray-painter you must be at least 16 years old. NOTE: Changes in the training of artisans are subject to the official approval of the Registrar of Labour Training. A new system of apprenticeship training will be introduced within the next few years. Each industry will make use of its own methods and time to implement the system.			

What level of natural skill and/or aptitude do I need for this occupation?				
Exceptionally High	High	Moderate	Low	
A spray-painter should: - have good eye-sight and colour sense; - be able to distinguish between various shades of the same colour; - have balanced eye-hand co-ordination; - be able to stand or crouch for long periods; - work very accurately, carefully and neatly; - have patience.

I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours	I like to work with animals	I like to work with nature	I want to work outdoors

Stained Glass Artist			
General Information			
Description – what is this occupation?			
Plate and window glass are very popular and are used by stained glass artists, who create designs for art objects made of glass, such as windows, bottles, bulbs, dishes and lampshades. (Some special glass products, such as windshields and glass blocks used in building and construction are made from safety glass.)			
Typical Job Activities – what will I do in this occupation?			
Stained glass artists study the shape of the window and integrate practical requirements with their knowledge of symbolic images and glass cutting. They make a full size working pattern and select and cut the glass according to the specific pattern. The stained glass artist then assembles all the pieces and secures them in place. The glass is then stained or painted and fired in order to stabilise the colours. The stained glass artist then installs the completed window.			
Related Occupations – which occupations are more or less the same?			
- Ceramist - Jeweller and goldsmith			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training

Stereotyper			
General Information			
Description – what is this occupation?			
A stereotyper manufactures the surfaces (stereos) which are fixed to printing machines to do the printing.			
Typical Job Activities – what will I do in this occupation?			
The stereotyper receives the set type in steel frames from the compositor and manufactures stereo plates for the printing machine. The type form is pressed into a moist substance, called a 'flog', which hardens after the impression is secured and the moisture extracted. This negative impression is placed in a casting box and molten metal is poured onto it under slight pressure. It is then rapidly cooled and trimmed. A number of plates or casts are manufactured from one mould or matrix. After passing through the final stages of production the stereotypes are sent to the rotary machine minder who affixes them to the printing machine.			
Related Occupations – which occupations are more or less the same?			
- Blockmaker/process engraver - Bookbinder - Carton maker - Letterpress machine-minder - Printer: block and textile - Printer's cutter - Printer's mechanic - Printing and newspaper industry worker - Printing copy holder			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 9 Certificate for an apprenticeship at a company. Senior Certificate for full-time training at the South African Printing College. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Physical Science, Trade Theory, Metalwork, Mathematics			

Entry to Work Place			
APPRENTICESHIP TRAINING: If you want to become a stereotyper you need to register with an employer providing suitable training. Training consists of theoretical and practical work: - Theoretical training: At the Southern African Printing College (full-time) or through their Distance Learning Department (part-time). - Practical training: In-service training under supervision of a qualified tradesman (Competency-Based Modular Method). - Duration of course: 3 to 4 years depending on the experience of the candidate. - Final examination: A compulsory trade test set by the Department of Labour to qualify as an artisan. ADDITIONAL REQUIREMENTS: If you want to become a stereotyper you must be at least 16 years old. NOTE: Changes in the training of artisans are subject to the official approval of the Registrar of Labour Training. A new system of apprenticeship training will be introduced within the next few years. Each industry will make use of its own methods and time to implement the system.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A stereotyper should: - be strong and healthy; - be alert and safety-conscious; - be responsible and able to work accurately and quickly; - be fit and strong as the work can entail physical exertion; - have manual dexterity.

Stockbroker			
General Information			
Description – what is this occupation?			
There are many career directions that can be pursued in the fast-moving world of stockbroking.			
Typical Job Activities – what will I do in this occupation?			
The portfolio manager in the Investment Department assesses clients' financial status. The analyst in the Research Department analyses the companies listed on the stock exchange. The information compiled assists the portfolio manager in investing clients' funds and is sold to the broker's clients by the Institutions and Client Services Departments. The dealer who works on the trading floor presents the popular image of the stockbrokers. There are various categories of dealers: - unauthorised clerks 'run' orders from the trading desk to the dealers - the authorised clerk carries out buying and selling orders with dealers from other brokers - the institutional dealer takes and carries out buying and selling orders over the telephone from local corporations and offer companies market information - an arbitrageur does the same tasks as the institutional dealer, but deals with foreign institutions. The Derivatives Department trades in the futures and options market, an area so unpredictable that it is often said that these dealers are born with a 'nose' for the job. The dealer does the trading in this market and a strategist applies his knowledge and experience to the market to develop new strategies. The Corporate Finance Department lists shares on the Johannesburg Stock Exchange and the Administration Department does the paperwork for all the other departments - a task which can become quite pressurised at times.			
Related Occupations – which occupations are more or less the same?			
- Accountant - Auditor - Bookkeeper - Chartered accountant - Clerk - Economist - Financial and investment manager - Marketing manager and researcher			
Educational Requirements - which qualifications do I need to enter this occupation?

The need is determined by government	The need is determined by the consumers	The need is determined by private companies	The need is determined by new technology	I can start a business in this field or with these skills	The job is fairly stable	The job is ideal for becoming a general manager
I can be of service to people	I can work with my hands	I can design things	I can repair things	I can work with technology	I can create new things	I'll be able to learn new things on an ongoing basis
I can work with languages	I can work with people	I can make more money than the average person	I can do practical work and I do not have to study theories	I can study for a number of years and face intellectual challenges	Minimum or no qualifications are required	I can work for myself
I can work flexible hours	I can entertain people	I can work internationally	I can determine my own income	I am very interested in a specific subject or field	I can progress in the business world	I do not have to struggle with finding vacancies
I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours	I like to work with numbers		

Stonemason			
General Information			
Description – what is this occupation?			
A stonemason builds and repairs stone structures such as piers, walls and abutments.			
Typical Job Activities – what will I do in this occupation?			
The stonemason works predominantly with two types of stone: - natural stone such as marble, granite and limestone - artificial stone made from cement, marble chips or other masonry material. The stonemason cuts, shapes and cleans these stones to erect structures. You will also lay pavements and paths. You will use kerbstones and special types of masonry for vats, tanks and floors. You may work from drawings on which it has been indicated where each stone should be placed.			
Related Occupations – which occupations are more or less the same?			
- Bricklayer - Cementmason - Marblemason - Mosaic worker - Plasterer - Terrazzo worker - Tiler			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 9 Certificate. Grade 10 Certificate or N1 is recommended. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Mathematics, Trade Theory			

Entry to Work Place			
APPRENTICESHIP TRAINING: If you want to become a stonemason you need to register with an employer providing suitable training. Training consists of theoretical and practical work: - Theoretical training: At a technical(FET) college to obtain a N2 plus Institutional Competency-based Modular Training at a BIFSA Training College or any other accredited training centre. - Practical training: Practical site experience with an employer. - Duration of course: 2 to 4 years depending on the experience of the candidate. - Final examination: A compulsory trade test set by the Department of Labour to qualify as an artisan. ADDITIONAL REQUIREMENTS: If you want to become a stonemason you must be at least 16 years old. Training should comply with the Production Performance Criteria of BIFSA. NOTE: Changes in the training of artisans are subject to the official approval of the Registrar of Labour Training. A new system of apprenticeship training will be introduced within the next few years. Each industry will make use of its own methods and time to implement the system.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A stonemason should: - enjoy working outdoors; - work well with other people; - be able to work quickly and efficiently; - have physical strength and stamina; - have manual dexterity and agility; - have some artistic ability.

Stunt Performer			
General Information			
Description – what is this occupation?			
Stunt performers replace film actors in scenes that are dangerous, for example where the character has to jump from an exploding car and so on.			
Typical Job Activities – what will I do in this occupation?			
They need to know exactly how to perform the stunt, so that it looks real to the audience but is safe to perform. There are various types of stunt roles, for example the "nondescript" and the "double". As a double, the stunt performer must look and act like the actor. In the nondescript role, the stunt performer doesn't replace a person, but is a nameless, incidental character, for example a driver in a freeway chase scene. Stunts can make a movie exciting, and therefore probably more profitable. It is for the director to decide how the stunts will appear on the screen. Stunt co-ordinators plan the stunts, set the scene and hire a recommended stunt performer. A stunt co-ordinator will immediately know if a stunt scene will take a long time to perform, although on film it may eventually last only a few seconds. Stunt performers work closely with the prop, make-up and wardrobe artists. They also work with the special effects team to ensure safety and anticipate problems. Stunt performers are dedicated professionals who work hard to make stunts believable, but also act responsibly by taking extra precautions, such as making use of cables and air bags.			
Related Occupations – which occupations are more or less the same?			
- Actor/actress - Director			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Entry to Work Place			
In service training may be provided under the supervision of an experienced stunt performer.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A stunt performer should: - be agile and fit - have safety conscious. You need to be at least 16 years old.

Surgeon			
General Information			
Description – what is this occupation?			
The surgeon is a doctor who specialises in performing surgery to prevent the spread of disease, to correct deformities, to repair injuries and to improve body functions. Patients are referred to him by general practitioners and specialists.			
Typical Job Activities – what will I do in this occupation?			
The surgeon examines each patient thoroughly, reviews the medical history and may consult with other specialists to make sure that an operation is necessary. The surgical procedure is explained to the patient and/or the family. Before surgery, the surgeon checks the equipment, instruments and surgical set up to be sure everything needed is present and sterile. After surgery the patient's condition is monitored until he or she is completely recovered from the operation.			
Related Occupations – which occupations are more or less the same?

I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours	I like to work with animals	I like to work with nature	I want to work outdoors

Tattoo Artist			
General Information			
Description – what is this occupation?			
Tattooing has been practised by many cultures dating back to 200 BC. There are two types of tattoo artists: professional and amateur. The professional has a tattoo license and is very safe to go to.			
Typical Job Activities – what will I do in this occupation?			
The professional has a tattoo license and is safe to consult. Tattoo artists use an electrically powered instrument to inject the tattoo and the design is fitted using approximately seven needles that are placed in a needle bar. Some people inflate their own tattoos or obtain tattoos from a friend. The amateur tattoo artist often works in unhygienic conditions, using objects such as pens and needles, carbon, mascara and dirt. The tattoos are done on ankles, hands, thighs and shoulders because they are easy to reach. Reputable tattoo artists do not tattoo minors without the written consent of their parents. Their work area is scrupulously clean and there is adequate lighting. Tattoo artists usually have a heat sterilisation machine that sterilises equipment after tattooing a customer. Sterilised tattoo needles must be thrown away in a bio-hazardous container after use. Ink should never be poured back into the bottle – it must be thrown away after each procedure. Tattoo artists use latex gloves during the procedure to protect them from infection. They also advise their customers on how to clean the tattoo to prevent infection.			
Related Occupations – which occupations are more or less the same?			
- Body piercer - Body painting artist			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
You need to have at least Grade 9.			
Entry to Work Place			
In service training may be provided under the supervision of an experienced tattoo artist.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A tattoo artist should: - be artistic; - have good eye-hand coordination; - have good colour vision; - have a steady hand. You need to be at least 16 years old.

Taxi Driver			
General Information			
Description – what is this occupation?			
The taxi driver transports passengers for a fee.			
Typical Job Activities – what will I do in this occupation?			
There are basically two categories of taxis: - those that cater mainly for business travellers and tourists - those that service regular commuter routes (minibus taxi). The taxi driver that caters for business travellers and tourists usually transports people to airports, convention centres or places of entertainment. You will pick up passengers at airports, bus and railroad terminals, convention centres or hotels. A customer may also call the taxi company, which relays the information to the taxi driver by means of a two-way radio. The taxi driver transports the passengers, collects the fee according to the meter in the taxi and records the transaction in a log. The taxi driver in this category is expected to be familiar with tourist hotels and places of interest. The minibus taxi driver transports: - daily commuters from outlying areas to their places of work in the city or other industrial areas - children to school. This taxi driver charges a set fare for a particular route and distance. You will collect your passengers at a taxi rank at any point along a regular route. The passengers use hand signals to indicate the part of town to which they want to travel. They expect the minibus taxi driver to be familiar with peak hour traffic patterns and less congested routes to ensure that they get to work on time.			
Related Occupations – which occupations are more or less the same?			
- Bus driver - Cargo controller - Chauffeur - Crane operator - Driver and stacker - Driver instructor - Tractor driver - Truck driver - Vehicle driver			
Educational Requirements - which qualifications do I need to enter this occupation?

Taxidermist			
General Information			
Description – what is this occupation?			
A taxidermist preserves, stuffs and mounts animal skins for display in museums or private collections and study collections.			
Typical Job Activities – what will I do in this occupation?			
You will use your artistic ability and knowledge of the technical processes to create preserved animals that looks as life-like as possible. Taxidermy methods have changed considerably through the ages. Today, extensive use is made of dermosculpture, which entails making a plaster of Paris mould, fitting the tanned damp skin over the cast, gluing it and keeping it in place during the drying process by means of pins and various methods of bandaging. A recent advance in taxidermy is the freeze-drying method, where the animal is placed in a life-like position and frozen. The moisture is then vacuum-extracted from the frozen specimen. This procedure is usually combined with more traditional methods. The most successful method of preserving fish, reptiles and invertebrates is to create a plaster of Paris mould which is then painted to look life-like. Taxidermists draw extensively on nature to achieve realistic work, for example animal anatomy, natural poses and positions of animals and birds and natural-looking skin colours. They are sometimes called upon to do fieldwork to collect animal and bird specimens.			
Related Occupations – which occupations are more or less the same?			
- Animal scientist - Display-artist - Leather and patent leather worker - Leather technologist - Technical illustrator - Upholsterer			
Educational Requirements - which qualifications do I need to enter this occupation?

Teacher: Art			
General Information			
Description – what is this occupation?			
An art teacher helps pupils to develop the knowledge, skills and understanding necessary to work in various fields of art.			
Typical Job Activities – what will I do in this occupation?			
The art teacher is employed by a school, university of technology, university or college. Lessons are planned according to a curriculum and the materials needed are selected. The teacher prepares and assigns class projects and evaluates the progress of the pupils. You may organise trips to art museums or exhibitions and may also arrange displays of pupil's artwork.			
An art teacher at a school will have to attend staff meetings and perhaps parent-teacher meetings in the evenings. You will sometimes be expected to teach another school subject in addition to art.

Teacher: Home Economics			
General Information			
Description – what is this occupation?			
The teacher is responsible for the facilitation of learning and the development of skills in children.			
Typical Job Activities – what will I do in this occupation?			
The home economics teacher instructs individuals in subjects related to family living and home-making e.g. nutrition, clothing and textiles, family relations and home-management. The teacher is also required to do administrative work such as setting examination papers, marking answer sheets and homework, completion of registers, drawing up of schedules and writing of reports. The teacher is also expected to plan and organise extracurricular activities such as sporting events, cultural activities, tours, camps and outings to places of interest. The home economics teacher is often involved in catering for school functions. The home economics teacher may also provide extension courses on an informal basis to women, churches, welfare and youth organisations, immigrant groups and government departments. Such extension courses involve lectures, demonstrations, exhibitions and group discussions.

Telephonist/Switchboard Operator			
General Information			
Description – what is this occupation?			
A telephone operator operates a switchboard in order to relay incoming and inter-office calls to the correct parties.			
Typical Job Activities – what will I do in this occupation?			
Calls are transferred and connections for outgoing calls are made. Information is supplied and charges determined for long-distance calls. The telephone operator may arrange conference calls for businesses. In small organisations general clerical duties including typing and filing may be part of the work. In emergency situations, the telephonist may have to contact the fire or police departments.			
Related Occupations – which occupations are more or less the same?			
- Bank teller - Dispatcher - Hotel clerk - Receptionist - Telegraphic-typewriter operator - Travel clerk			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 10 Certificate. Employers prefer a Senior Certificate. COMPULSORY SUBJECTS: Languages RECOMMENDED SUBJECTS: None			
Entry to Work Place			
IN-SERVICE TRAINING: The telephonist receives training under actual working conditions. The minimum age to commence training are 16 years. The basic training period with full pay varies from 4 to 8 weeks or longer according to the candidate's ability to learn. A telephonist usually needs some experience on a small switchboard before a company with a large switchboard will employ him. The Post Office offers a finishing course for the telephonist who is already employed and have been operating a switchboard for at least 3 to 6 months. For appointment as a telephonist courses in speech, office practices and business methods will be helpful.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low

A telephonist should: - enjoy working with the public; - be pleasant and courteous; - enjoy routine work tasks; - work well under pressure; - have a good ability to concentrate; - have insight, a good memory, self-control and tact; - have a clear and pleasant speaking voice; - have good hearing; - have manual dexterity; - be proficient in official languages.

Television Producer			
General Information			
Description – what is this occupation?			
A television producer plans and co-ordinates the practical organisational aspects of a television production.			
Typical Job Activities – what will I do in this occupation?			
It is important that the television producer knows what the audience want. Early in your career you will follow data, statistics and figures. As time goes by you will get an instinctive feeling of what to do. You will watch a lot of television to: - get an idea what the customer is interested in - see what your competitors are doing - get ideas - evaluate standards. You will call on the commissioning executives and talk to them about the channel's viewers, its policies and its branding. It is important to know the psyche of the channel. The television producer: - decides on, designs and develops a television programme (daily, weekly or ad hoc) - sets up auditions for actors or participants - controls the securing of costumes, props and other equipment - coordinates the sound, scenes, music, camera work, timing and modifications to the script - instructs the actors, participants and crew regarding the time-table and rehearsals and sees that the production runs to schedule - ensures that the production does not run over budget - negotiates staff contracts, authorises the payment of salaries and arranges publicity for the production. As a television producer you will probably specialise in an area you are interested in such as the news, game shows, sport programmes, actuality programmes, etc.			
Related Occupations – which occupations are more or less the same?			
- Advertising copy-writer - Art editor and critic - Industrial theatre director - Journalist - Radio announcer - Scriptwriter - Television presenter			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption for a degree course. Senior Certificate for a diploma course. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Speech and Drama, Music, Art			

Entry to Work Place			
Experience and a portfolio			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A television producer should: - be creative; - have excellent organisational and communication skills; - display initiative in recommending ways to keep within budget and still produce a programme of high quality; - have stamina to withstand high pressure and a long working day.

Thatcher			
General Information			
Description – what is this occupation?			
A thatcher covers roofs of buildings with reeds or straw to make them weatherproof. You may thatch houses, pubs, barns, dovecotes or summerhouses.			
Typical Job Activities – what will I do in this occupation?			
You will use traditional tools and one of three types of thatching material such as water reed, long straw or combed wheat straw. You will take off old or damaged thatch and peg the thatching material on the roof in overlapping layers, fixing it securely with hooks. The thatcher cuts the edges and sometimes decorates parts of the roof with decorative patterns or shapes. You will beat and brush the thatch until it is smooth and often cover it with protective wire netting to keep out birds and pests.			
Related Occupations – which occupations are more or less the same?			
- Roofer - Forest worker - Bricklayer - Painter and decorator - Plasterer - Tiler			
Educational Requirements - which qualifications do I need to enter this occupation?

The number of people with the qualifications, skills (able to do it) or interest in this career, that I have to compete with						
Exceptionally High number of people	High number of people	Moderate number of people	Low number of people			
Income Potential						
Estimated average income for people in this occupation (excluding extreme examples of high or low income):						
R300 000+per year	R144 000 - R300 000	R60 000 - R144 000	R 60 000 per year			
Income based on Performance						
What is the chance to improve my pay in this occupation through exceptional performance, skills or business ideas?						
Exceptionally High	High	Moderate	Low			
Self Employment						
Can I use this career to work for myself or to start a small company in this career field?						
Exceptionally High	High	Moderate	Low			
General Management Opportunities						
What is the potential to use this occupation as a platform to become a general manager in a medium to big company or organisation?						
Exceptionally High	High	Moderate	Low			
International Employment Market						
What is the chance of being able to use this career's qualifications and skills in the international labour market?						
Exceptionally High	High	Moderate	Low			
Possible Employers – where do I find this occupation?						
Government (national, provincial, local councils and government related organisations like universities, semi-government, etc.	Big private companies	Medium or small companies	Own small business: Entrepreneurial opportunities in this field	Self-employed: Contractor, consultant, own practise, freelance		
- Self-employed						
Relevant Contact Details – where can I get more information on this occupation?						
- CETA: Construction Education and Training Authority, 2nd Floor, Unit 5, Momentum Business Park, Main Road, Midrand, 1685, Tel: (011) 265 5900 Fax: (011) 805 3093, www.ceta.org.za						
Career Progress and Path						
Activities to enhance career progress – what can I do to improve my career progress in this occupation?						
Further Studies in the specific career field	Further studies in related fields	Experience in specific field	Work performance	Work performance	Do presentations, seminars, publish articles, etc.	General management studies
Possible career paths – which kind of career path can I follow in this occupation?						
Specialist career in the specific field	Management positions in the specific field	Management positions in related fields	General business management	Executive positions	Consultant/ contractor/ own practice/ freelance	Own business

Employment Stability						
Is the demand (the need) for this particular skills stable over the years?						
Exceptionally Stable		Very stable		Moderately stable		Not very stable
The need for people in this occupation and with these skills is influenced by:						
Government policy and legislation		Government strategy and activities		The growth of private companies (big and small)		
Technology		Direct consumer demands – “man in the street”		My own performance and skills		
Possible reasons to consider this career – I should consider this career if I want a job where:						
The need is determined by government	The need is determined by the consumers	The need is determined by private companies	The need is determined by new technology	I can start a business in this field or with these skills	The job is fairly stable	The job is ideal for becoming a general manager
I can be of service to people	I can work with my hands	I can design things	I can repair things	I can work with technology	I can create new things	I'll be able to learn new things on an ongoing basis
I can work with languages	I can work with people	I can make more money than the average person	I can do practical work and I do not have to study theories	I can study for a number of years and face intellectual challenges	Minimum or no qualifications are required	I can work for myself
I can work flexible hours	I can entertain people	I can work internationally	I can determine my own income	I am very interested in a specific subject or field	I can progress in the business world	I want to be physically active
I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours	I like to work with animals	I like to work with nature	I want to work outdoors

Theatre Technician			
General Information			
Description – what is this occupation?			
A theatre technician is responsible for the smooth running of theatrical performances as far as technical aspects are concerned. You will work in a team managed by a stage manager.			
Typical Job Activities – what will I do in this occupation?			
As a theatre technician you will have a specific set of tasks according to your field of expertise: - The lighting technician uses lighting to interpret the moods that the artistic director wishes to convey in the production. You will install and position the correct lighting equipment and operate it during productions. - The sound technician installs and maintains all sound equipment such as microphones and loudspeakers and positions them as required. You will also be responsible for the pre-recording of the sound effects needed for various productions. - The theatre mechanic is responsible for operating and moving technical equipment and stage machinery. - The property master designs, creates or acquires authentic properties or requisites and places them correctly for use during stage productions. In addition, you will fix all decor elements onto sliding stages or trucks. - The costumier produces the costumes required for the production. You will have to do research to determine the type of costumes that should be produced for the play. - The scene-painter is responsible for painting the decor. - The make-up artist ensures that the actors portray the characters they are acting - for example a clown, a princess etc..			
Related Occupations – which occupations are more or less the same?			
- Actor - Architectural model builder - Artist - Colour consultant - Dancer - Décor designer - Display artist - Draughtsman - Electrician - Fashion designer - Singer - Stage designer - Stage manager			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate for a diploma course. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Technika: Electrical, Technika: Electronics, Speech and Drama, Music, Art			

Entry to Work Place				
What level of natural skill and/or aptitude do I need for this occupation?				
Exceptionally High	High	Moderate	Low	
A theatre technician should: - have technical ability; - have manual dexterity; - love and have a feeling for the performing arts; - be diligent and self-disciplined; - be willing to help with the painting, constructing and moving of stage pieces.

Tiler			
General Information			
Description – what is this occupation?			
The work of the tiler comprises the artistic and functional covering and finishing of interior and exterior walls and floors according to design specifications.			
Typical Job Activities – what will I do in this occupation?			
The tiler: - examines plans - measures and marks surfaces to be tiled - does the layout of the work - spreads plaster base over the laths with a trowel - levels the plaster to a specified thickness - cuts and shapes the tiles with tile-cutters and biters - positions the tiles and taps them with a trowel handle to affix them to plaster or adhesive base - fills the gaps between the tiles with grouting - cleans the tiles. The tiler may also measure metal laths and cut them with tin snips to size for walls and ceilings. You will tack these to surfaces with a staple-gun or hammer.			
Related Occupations – which occupations are more or less the same?			
- Bricklayer - Carpenter - Cementmason - Construction worker - Marblemason - Mosaic worker - Plasterer - Stonemason - Welder			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 9 Certificate. Grade 10 Certificate or N1 is recommended. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Mathematics, Trade Theory			

Entry to Work Place			
APPRENTICESHIP TRAINING: If you want to become a tiler you need to register with an employer providing suitable training. Training consists of theoretical and practical work: - Theoretical training: At a technical(FET) college to obtain a N2 plus Institutional Competency-based Modular Training at a BIFSA Training College or any other accredited training centre. - Practical training: Practical site experience with an employer. - Duration of course: 3 to 4 years depending on the experience of the candidate. - Final examination: A compulsory trade test set by the Department of Labour to qualify as an artisan. ADDITIONAL REQUIREMENTS: If you want to become a tiler you must be at least 16 years old. Training should comply with the Production Performance Criteria of BIFSA. NOTE: Changes in the training of artisans are subject to the official approval of the Registrar of Labour Training. A new system of apprenticeship training will be introduced within the next few years. Each industry will make use of its own methods and time to implement the system.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A tiler should: - be neat and orderly; - work accurately; - have manual dexterity; - be able to work alone without supervision; - have arithmetic and three-dimensional abilities; - have good health and physical stamina; - have good eyesight and colour perception.

Tool-, Jig- and Die-maker			
General Information			
Description – what is this occupation?			
The tool-, jig- and die-maker manufactures a wide variety of equipment e.g. pressing tools, jigs and gauges. The products are used by operators to mass-produce other products and parts.			
Typical Job Activities – what will I do in this occupation?			
In tool-making this artisan produces devices that hold metal while it is shaved, stamped or drilled. You will make gauges and measuring devices used in manufacturing precision parts. Jigs are devices used to clamp pieces of metal or other material in a required position and to guide the tools being used. This eliminates marking and positioning pieces of work individually. The artisan constructs dies (forms) to shape metal used in stamping and forging operations. You will also make moulds for die-casting and for moulding plastics. The tool-, jig- and die-maker may also build and repair worn or damaged dies, gauges and fixtures.			
Related Occupations – which occupations are more or less the same?			
- Die-sinker and engraver - Draughtsman - Fitter and turner - Instrument maker - Instrument mechanician - Machine operator - Machine tool operator - Moulder - Plastics and fibreglass worker			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 9 Certificate in the metal industry. Grade 10 Certificate in the motor, weapon and aerospace industries. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Trade Theory, Mathematics, Physical Science, Technical Drawing, Metalwork			

Entry to Work Place			
APPRENTICESHIP TRAINING: If you want to become a tool-, jig- and die-maker you need to register with an employer providing suitable training. - Theoretical training: At a technical(FET) college or a correspondence course at Technisa up to N6 level. - Practical training: At an accredited training centre. - In-service training: Under supervision of a qualified tradesman. - Duration of course: 2 to 4 years but it can be completed in a shorter period provided that the candidate has higher educational qualifications. - Final examination: A compulsory trade test set by the Department of Labour to qualify as an artisan. ADDITIONAL REQUIREMENTS: If you want to become a tool-, jig- and die-maker you must be at least 16 years old. NOTE: Changes in the training of artisans are subject to the official approval of the Registrar of Labour Training. A new system of apprenticeship training will be introduced within the next few years. Each industry will make use of its own methods and time to implement the system.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A tool-, jig- and die-maker should: - enjoy working with his hands; - be able to concentrate on details; - be a precision worker; - have a good working knowledge of mathematics and mechanics; - be able to read and understand drawings; - be good and solving problems; - have finger and manual dexterity; - be in good physical health and have stamina; - be able to visualise mechanical and physical relations between objects.

Topographical and Engineering Surveyor			
General Information			
Description – what is this occupation?			
Surveying is the science of representing the layout of the land accurately on a map or plan, and indicating the exact position of any structure or other man-made or natural object, above or below ground. It plays a vital role in the planning, provision and maintenance of all types of construction and development.			
Typical Job Activities – what will I do in this occupation?			
Surveying comprises mainly two fields: - Topographical surveying entails the gathering of information to map the forms of the earth. This is done by means of: -- triangulation (measuring of angles) -- traversing -- levelling (determining of heights) -- aerial photographs -- calculating positions and heights -- establishing place names -- annotating aerial photographs by indicating the topographical features. Back in office, the surveyor applies this information to the task of preparing a detailed land map. You will use a photogrammetric machine to assist you in the process. - Engineering surveying entails the collection of all relevant information on the site of a proposed construction project and mapping out the area. Once the design of the project is complete, the surveyor pegs it out on the actual site and also monitors construction in progress to ensure that it does not exceed the specifications. The work is satisfying and offers a good balance of field and office work.			
Related Occupations – which occupations are more or less the same?			
- Architect - Building supervisor - Building surveyor - Cartographer - Construction manager - Draughtsman - Landscape architect - Quantity surveyor - Town and regional planner			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training

Tourism Manager			
General Information			
Description – what is this occupation?			
Tourism is currently the fastest growing industry in South Africa. Especially overseas tourists find South Africa sunny, interesting and affordable. However, more should be done to ensure their safety.			
Typical Job Activities – what will I do in this occupation?			
The tourism manager works with tourists of different cultures and traditions from all over the world. You must therefore be able to keep different needs and requirements in mind. You have to market your product or service creatively and dynamically. Different target markets have to be identified and appropriate travelling packages have to be designed. It is important that the packages attract people and persuade them to revisit. As a tourism manager you will be working with people on holiday so you will have to be prepared to work irregular hours.

Tourist Guide			
General Information			
Description – what is this occupation?			
The main responsibility of a tourist guide is to escort groups of tourists on bus or minibus trips and provide them with factual and interesting information about the sights they are seeing.			
Typical Job Activities – what will I do in this occupation?			
Often tourist groups have been on guided tours before, so a guide's presentation needs to be dynamic to hold their interest. As a tourist guide you may be allocated a half-day sight-seeing tour or longer tours, in which case you will be responsible for ensuring adherence to the tour itinerary. You will also need to provide tourists with information regarding currency, drinking water, restaurants and tipping. You should always be able to deal professionally with enquiries from the tour group.			
Related Occupations – which occupations are more or less the same?			
- Bus driver - Foreign service officer - Game ranger - Guesthouse manager - Public relations officer - Tourism manager - Travel agent			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Foreign languages, History, Geography			
Entry to Work Place			
IN-SERVICE TRAINING: Most tour operators provide in-service training by an experienced tourist guide. REGISTRATION: A tourist guide must be registered with Satour and is assessed by this body for the purpose of granting a licence. Licences are granted on three levels: - for a particular city only; - for a wider region; - country-wide.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low

A tourist guide should: - have good communication skills; - have an excellent knowledge of South Africa's places of interest, geography, its unique history, politics and flora and fauna; - have organisational skills; - enjoy working with people; - be able to control groups of people and deal with unexpected situations.

Town and Regional Planner			
General Information			
Description – what is this occupation?			
A town and regional planner develops (at many scales from regional to neighbourhood level) programmes for the most advantageous and purposeful development of towns, cities and rural areas.			
Typical Job Activities – what will I do in this occupation?			
The work of the town and regional planner is focused on improving the living conditions of people. You will estimate future needs for housing, business and industrial sites, community facilities and open spaces in order to meet the needs of expansion and renewal. You will furthermore investigate the nature and extent of problems concerning prospective development such as projecting future needs in traffic and transportation. You must keep up with legal issues involving community development and changes in housing and building codes. Most of the work of a town and regional planner is done in an office but you will also need to go out on site inspection to establish whether everything is done according to the proposed development plan. You will work closely with architects, engineers, economists, sociologists, administrators and management.			
Related Occupations – which occupations are more or less the same?			
- Architect - Building supervisor - Cartographer - Civil engineer - Construction manager - Landscape architect - Land surveyor - Model builder - Quantity surveyor - Property developer			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption for a degree course. Senior Certificate for a diploma course COMPULSORY SUBJECTS: Mathematics RECOMMENDED SUBJECTS: Physical Science, Geography, Economics, Business Economics, Biology			
Entry to Work Place			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low

A town and regional planner should: - have above average intelligence; - be creative and concerned with improving society and living standards; - have the ability for three-dimensional perception; - have integrity, tact and sociability; - have a wide general knowledge; - be original; - have initiative.

Tractor and Agricultural Machinery Mechanic			
General Information			
Description – what is this occupation?			
A tractor and agricultural machinery mechanic maintains, repairs and overhauls farm machinery, equipment and vehicles such as tractors, harvesters, pumps, ploughs, planters and irrigation apparatus.			
Typical Job Activities – what will I do in this occupation?			
Apart from visual inspection of the equipment, the tractor and agricultural machinery mechanic listens and uses electronic equipment to trace problems. The tractor and agricultural machinery mechanic may: - dismantle defective units and repair or replace parts using various tools - reassemble, adjust and lubricate these parts to ensure that they operate efficiently - install and repair farm irrigation systems - maintain farm electrical systems. The tractor and agricultural machinery mechanic must be able to work with both petrol and diesel engines and occasionally may have to do welding. You will often have to work very quickly since farmers cannot afford to have important machinery out of order for long.			
Related Occupations – which occupations are more or less the same?			
- Aircraft maintenance mechanic - Automotive body repairer - Automotive machinist and fitter - Diesel fitter - Diesel mechanic - Farm foreman - Motor cycle and scooter mechanic - Motor mechanic - Telecommunications mechanic - Tool, jig and die-maker - Turner and machinist - Welder			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 10 Certificate. Some employers prefer higher qualifications. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Trade Theory, Tractor Mechanics, Technika: Electrical, Technika: Mechanical, Technical Drawing, Welding and Metalworking, Mathematics, Physical Science			

Entry to Work Place			
APPRENTICESHIP TRAINING: If you want to become a tractor and agricultural machinery mechanic you need to register with an employer providing suitable training. Training consists of theoretical and practical work: - Theoretical training: At a technical(FET) college to obtain a N2 Certificate. If you work in a rural area you may enrol at Technisa in Johannesburg for a correspondence course. - Practical training: In-service training under supervision of a qualified tradesman. - Duration of course: 4 years but it can be completed in a shorter period. - Final examination: A compulsory trade test set by the Department of Labour to qualify as an artisan. ADDITIONAL REQUIREMENTS: If you want to become a tractor and agricultural machinery mechanic you must be at least 16 years old. NOTE: Changes in the training of artisans are subject to the official approval of the Registrar of Labour Training. A new system of apprenticeship training will be introduced within the next few years. Each industry will make use of its own methods and time to implement the system.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A tractor and agricultural machinery mechanic should: - have mechanical aptitude; - be able to work independently; - have problem-solving ability; - be meticulously accurate and careful; - have manual dexterity; - have good hearing and vision; - have physical strength and stamina to be able to work with heavy machinery and components.			
Employment Indicators – what are the important employment facts regarding this occupation

Typist			
General Information			
Description – what is this occupation?			
A typist uses computers with word processing programmes to type letters, articles or documents. Typewriters are not used often any more.			
Typical Job Activities – what will I do in this occupation?			
The typist: - prepares neatly typed copies of hand-written, printed and recorded words - addresses envelopes - types headings on standardised letters and performs other routine typing chores. An experienced typist performs tasks which require a high degree of accuracy and independent judgement such as planning and typing of complicated statistical tables, combining and rearranging of materials from different sources and preparing of master copies to be produced on copying machines. The typist may type letters, reports, forms and memos from dictating equipment or operate high-speed word-processing machines with programmed memories. Sometimes other clerical activities, such as filing and the answering of phones are part of the typist's duties.. The work of a typist depends on the nature of the job and type of company or department. The typist may work in a typing pool where the supervisor distributes the work. Completed work is handed in and a new assignment is then tackled. As the work of a personal assistant is becoming more and more complex with a variety of tasks the typist may assist the personal assistant in typing documents such as letters or reports			
Related Occupations – which occupations are more or less the same?			
- Branch secretary - Clerk - Data typist - Employment agency secretary - Operator: word processor - Receptionist - Secretary - Shop and counter assistant - Stenographer - Travel agency clerk			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Typing, Economics, Accountancy			
Entry to Work Place			
IN-SERVICE TRAINING: Experience and knowledge are gained through in-service training.			

What level of natural skill and/or aptitude do I need for this occupation?				
Exceptionally High	High	Moderate	Low	
A typist should: - have a good command of both official languages, spelling, grammar and punctuation; - be courteous and alert; - be able to concentrate amid distractions; - work well under pressure; - be well organised; - work well with others; - have good typing skills and speed as well as manual dexterity; - present a neat, well-groomed appearance; - be able to operate office equipment.

Upholsterer			
General Information			
Description – what is this occupation?			
An upholsterer is responsible for applying the soft finishes to furniture and also repairs and rebuilds sofas, chairs and other upholstered furniture			
Typical Job Activities – what will I do in this occupation?			
The upholsterer: - removes the covering and padding from the seat, arms, sides and back of the piece being redone - removes the webbing and replaces it with new webbing - removes defective springs and replaces them with new or retied springs - measures and cuts materials for the new covering - sews and attaches the material to the frame - adds trimming such as braid or buttons - may also have to refinish wooden surfaces. The upholsterer should have knowledge of the ergonomics of design, different finishes, fabrics, foams and webbing. An upholsterer may work in a factory, with interior designers or directly with customers who indicate the work to be done and the type of fabric to be used.			
Related Occupations – which occupations are more or less the same?			
- Automotive trimmer - Cabinet-maker - Carpenter - Factory manager - Frame-maker - Furniture polisher - Interior decorator - Joiner - Leather worker - Saw operator - Shopfitter - Woodcarver - Woodmachinist			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 8 Certificate. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Trade Theory, Woodwork, Mathematics			

Entry to Work Place			
APPRENTICESHIP TRAINING: If you want to become an upholsterer you need to register with an employer. All costs of successful training are borne by the employer. Wage increases during the stages of apprenticeship are dependent on the progress through the system as well as entry level. Entry levels are more practical than academic. The Furniture Industry Training Board (FITB) enables the industry to provide comprehensive training to all its employees: - Theoretical and practical training: Provided by professional trainers at one of the centres of the FITB. Progress depends on the ability to "do" rather than to "know". - Duration of course: 2 to 4 years depending on the progress of the candidate in the modular system. - Final examination: A compulsory trade test at the Centre of Trade Testing at Olifantsfontein as well as accredited training centres. ADDITIONAL REQUIREMENTS: If you want to become an upholsterer you must: - be at least 16 years old; - undergo a selection test battery. ADVANCED TRAINING: The Furniture Production Unit of the FITB in Johannesburg offers the following courses: Diploma in Furniture Production: 2 year full-time course for matriculants. Certificate in Furniture Production: 3 months course for employees already in the industry. NOTE: Changes in the training of artisans are subject to the official approval of the Registrar of Labour Training. A new system of apprenticeship training will be introduced within the next few years. Each industry will make use of its own methods and time to implement the system.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
An upholsterer should: - have finger and manual dexterity; - have good co-ordination; - move large and heavy pieces of furniture; - calculate the amount of material required correctly; - enjoy working with his hands; - work well without supervision; - be creative; - have an eye for detail; - work quickly, accurately and neatly.

Valuer and Appraiser			
General Information			
Description – what is this occupation?			
A valuer and appraiser establishes the monetary worth of property, merchandise, business assets, objects d'art, precious stones, motor vehicles and household effects.			
Typical Job Activities – what will I do in this occupation?			
In recent years the term 'valuer' has been used to describe a person who determines the value of immovable property, while the term 'appraiser' is used to describe a person who determines the value of any property, merchandise, goods and assets for purposes of managing deceased estates. The appraiser uses the most readily available comparable facts and examine goods for condition and authenticity. The valuer and appraiser: - provides information for the parties concerned with the sale or expropriation of property - establishes the value of security offered for a loan or mortgage - assesses the value of properties to enable local authorities to raise rates - ascertains the value of company assets and shares - evaluates the cover and claim amounts for insurance purposes - estimates the value of plant and machinery.			
Related Occupations – which occupations are more or less the same?			
- Building inspector - Business administrator - Estate agent - Insurance agent - Internal auditor			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption for a degree course. Senior Certificate for a diploma course. COMPULSORY SUBJECTS: Mathematics RECOMMENDED SUBJECTS: Economics, Business Economics, Accounting			
Entry to Work Place			
UNIVERSITY: Various university degrees are recognised. REGISTRATION: All valuers and appraisers must register with the South African Council for Valuers.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low

A valuer and appraiser should: - have good communication skills; - be honest and objective; - have good judgement; - possess integrity; - be able to think logically; - be familiar with sources of public information; - be able to read blueprints and mechanical drawings; - have a knowledge of building construction.

Is the demand (the need) for this particular skills stable over the years?						
Exceptionally Stable		Very stable		Moderately stable		Not very stable
The need for people in this occupation and with these skills is influenced by:						
Government policy and legislation		Government strategy and activities			The growth of private companies (big and small)	
Technology		Direct consumer demands – “man in the street”			My own performance and skills	
Possible reasons to consider this career – I should consider this career if I want a job where:						
The need is determined by government	The need is determined by the consumers	The need is determined by private companies	The need is determined by new technology	I can start a business in this field or with these skills	The job is fairly stable	The job is ideal for becoming a general manager
I can be of service to people	I can work with my hands	I can design things	I can repair things	I can work with technology	I can create new things	I'll be able to learn new things on an ongoing basis
I can work with languages	I can work with people	I can make more money than the average person	I can do practical work and I do not have to study theories	I can study for a number of years and face intellectual challenges	Minimum or no qualifications are required	I can work for myself
I can work flexible hours	I can entertain people	I can work internationally	I can determine my own income	I am very interested in a specific subject or field	I can progress in the business world	I want to be physically active
I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours	I like to work with figures	I like to work with nature	I want to work outdoors

Vehicle Body Builder			
General Information			
Description – what is this occupation?			
A vehicle body builder designs and builds chassis and bodies for vehicles like trucks, trailers, caravans, panel vans and buses.			
Typical Job Activities – what will I do in this occupation?			
The vehicle body builder works from plans, drawings and specifications. Materials are measured, sawn or cut to size, fitted and welded together. The floor of the bodywork is then manufactured and bolted onto the chassis. Metal beams are cut, welded together and reinforced to form a sturdy frame for the body. The panels of the body-work are made from various sizes and thickness of sheet metal panels which are welded or riveted together onto the framework. Different materials are used for the inside panels to insulate or soundproof where necessary. The vehicle body is then cleaned and painted and windows are installed and fitted. Finally, the electrical fittings and other trimmings are installed.			
Related Occupations – which occupations are more or less the same?			
- Assembler: airframe fitter - Automotive body repairer (panelbeater and spray painter) - Automotive fitter assembler - Boat builder and shipwright - Boilermaker - Coach builder - Fitter assembler: motor vehicle, aircraft - Motor fitter - Sheet metal worker - Vehicle electrician - Welder			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 10 Certificate. Some employers prefer higher qualifications. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Trade Theory, Welding and Metalworking, Technical Drawing, Mathematics, Physical Science			

Entry to Work Place			
APPRENTICESHIP TRAINING: If you want to become a vehicle body builder you need to register with an employer providing suitable training. Training consists of theoretical and practical work: - Theoretical training: At a technical(FET) college to obtain a N2 Certificate or enrol at Technisa in Johannesburg for a correspondence course. - Practical training: In-service training under supervision of a qualified tradesman. - Duration of course: 4 years but it can be completed in a shorter period. - Final examination: A compulsory trade test set by the Department of Labour to qualify as an artisan. ADDITIONAL REQUIREMENTS: If you want to become a vehicle body builder you must be at least 16 years old. NOTE: Changes in the training of artisans are subject to the official approval of the Registrar of Labour Training. A new system of apprenticeship training will be introduced within the next few years. Each industry will make use of its own methods and time to implement the system.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A vehicle body builder should: - like to work with his hands; - have a certain amount of mechanical insight and spatial perception; - be able to read plans and interpret specifications; - like assembling and dismantling engines and other mechanical devices; - be dexterous and good at handling tools; - have good eye-hand co-ordination; - be physically strong and healthy with plenty of stamina.

Ventriloquist			
General Information			
Description – what is this occupation?			
A ventriloquist differs from puppeteer in that the ventriloquist creates the illusion that the puppet can actually talk, while remaining in full view of the audience.			
Typical Job Activities – what will I do in this occupation?			
Many people believe that a ventriloquist has a special throat, giving the person an extraordinary ability to create another voice. This is not so. Ventriloquism is a production of a voice. Ventriloquists usually work indoors on a stage or in a hall. Sometime they work outdoors or on an open air stage.			
Related Occupations – which occupations are more or less the same?			
- Comedian - Clown - Mime artist - Puppeteer			
Educational Requirements - which qualifications do I need to enter this occupation?

Veterinary Nurse			
General Information			
Description – what is this occupation?			
The prime responsibility of a veterinary nurse is to assist the veterinary surgeon.			
Typical Job Activities – what will I do in this occupation?			
The duties of a veterinary nurse includes the following: - assisting at operations - preparing the theatre and the instruments for operations and cleaning them afterwards - looking after animals recovering from anaesthetics - collecting of skin scrapings, blood smears, faeces and urine samples - taking of X-rays - physiotherapy - assisting at artificial insemination procedures and pregnancy examinations - doing blood transfusions and dressing wounds. The veterinary nurse is usually required to combine general nursing duties with reception and basic administration work which means making all the necessary enquiries regarding the animal's illness and completing the required documentation. This will usually be done on a computer. A veterinary nurse also advises patients' owners on post-operative care and inoculations.			
Related Occupations – which occupations are more or less the same?			
- Animal scientist - Game warden - Nature conservator - Nurse - Nursing auxiliary - Veterinary surgeon - Veterinary technologist			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption. COMPULSORY SUBJECTS: Mathematics, Physical Science RECOMMENDED SUBJECTS: Biology			
Entry to Work Place			
REGISTRATION: Registration with the SA Veterinary Council is essential to practice.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low

A veterinary nurse should: - have a scientific aptitude; - love animals; - be able to work with animals in a practical manner, without becoming distressed; - be able to organise; - be willing to work long and irregular hours.

Veterinary Surgeon			
General Information			
Description – what is this occupation?			
The veterinary surgeon diagnoses and treats animal diseases and disorders.			
Typical Job Activities – what will I do in this occupation?			
The veterinary surgeon tests dairy herds for tuberculosis and brucellosis, and inoculates animals against diseases. You will perform autopsies to determine causes of death, inspect animals intended for human consumption, both before and after slaughtering. You will also give advice on the care and breeding of animals. The veterinary surgeon in general practice may treat various animal species or may specialise in pets or large animals. The veterinary profession also plays an important role in the capture and care of wild animals. Research and development, consultation, teaching, technical writing, prevention and control of animal diseases, agricultural education, the sale or production of commercial products and the rendering of technical services for commercial firms are fields the veterinary surgeon may be involved in.

Veterinary Technologist			
General Information			
Description – what is this occupation?			
The veterinary technologist plays an important role in the maintenance of animal health and productivity.			
Typical Job Activities – what will I do in this occupation?			
The veterinary technologist is trained to execute laboratory procedures, to handle and inject animals and to record observations. You will also be expected to implement animal health schemes and to control disease in the field. The tasks of a veterinary technologist can be divided into three main categories: - Diagnostic work: Collection of feed, blood and tissue specimens from animals for testing to determine the cause of disease or death. - Research: This is carried out in disciplines such as virology, bacteriology, parasitology, toxicology, pathology and nutrition. The research mainly focuses on preventing animal diseases and on developing of methods to increase animal productivity. - Preparation of veterinary biological products: The preparation of antigens and vaccines involves large scale cultivation of bacteria and viruses and as well as developmental work in the field of ferment technology.

Viticulturist			
General Information			
Description – what is this occupation?			
The viticulturist specialises in the management of vineyards and the production of grapes under a wide variety of natural conditions.			
Typical Job Activities – what will I do in this occupation?			
You will provide guidance to the wine farmer on manipulation of the vineyards to obtain the best results. You can use your knowledge in the management of both table and wine grapes. The viticulturist uses plant science principles and processes such as sunlight interception to help with the preparation of the land as well as planting, trellising and pruning. You have to recognise and treat abnormalities in the vineyard. You have to determine when the grapes are at the right stage to be harvested. The correct handling, packing and transporting of table grapes is another field where the knowledge of the viticulturist can be used. A viticulturist can also act as producer, wine-maker, consultant, researcher and marketing agent.			
Related Occupations – which occupations are more or less the same?			
- Agricultural extension officer - Agricultural inspector - Agriculturist - Beer brewing consultant - Brewing technologist - Farmer - Marketing agent - Microbiologist - Wine-maker - Wine steward			
Educational Requirements - which qualifications do I need to enter this occupation?

Volcanologist			
General Information			
Description – what is this occupation?			
Volcanologists study volcanoes and predict eruptions and their effects. Short-term forecasting of large volcanic eruptions has improved immensely.			
Typical Job Activities – what will I do in this occupation?			
Volcanologists monitor active volcanoes by using various methods to track an active volcano, for example gas monitoring, deformation studies and seismic monitoring.			
Many volcanologists find work as a university lecturer teaching petrology or a geological subject such as volcanology as the main field of interest. Some find work evaluating the safety of the long-term storage of nuclear waste. Seismometers determine the strength and location of an earthquake, by measuring ground vibrations. Seismographs receive signals and plot data in the form of a line called a seismogram.			
Volcanoes can be extremely dangerous, but with the help of volcanologists and technology, many lives can be saved.			
Related Occupations – which occupations are more or less the same?			
- Speleologist - Geologist - Scientist(various) - Archaeologist - Palaeontologist			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training

Watchman			
General Information			
Description – what is this occupation?			
A watchman guards entrances to factories, office complexes and, increasingly, to residences or residential streets. A watchman is usually classified as a Grade E security guard.			
Typical Job Activities – what will I do in this occupation?			
A day watchman at industrial or commercial premises monitors incoming traffic and pedestrians, watching carefully for suspicious people and firearms. You will keep a security record of persons entering the premises. You will sign and issue security passes. Outgoing traffic and pedestrians have to return their security passes. A watchman is constantly on the lookout for stolen equipment and motor cars. The night watchman at commercial and industrial premises patrols the premises, often with a guard dog, keeping a constant lookout for attempted break-ins. You will also check that all windows and doors are closed and locked and watch out for irregularities such as a fire, gas or water leakages or explosions. There is a constant element of danger in the work of a watchman, particularly the work of a night watchman. You may therefore carry a firearm and must be trained to use it. You may also be linked with two-way radio to your security company. The watchman at private residences and in streets in residential areas keeps a constant lookout for burglars and hi-jackers. You will usually escort residents into their properties to ensure their personal safety and the safety of their vehicles.			
Related Occupations – which occupations are more or less the same?			
- Armoured car guard - Bodyguard - Caretaker - Fireman - Police officer - Private investigator - Security officer			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
No specific requirements. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: None			
Entry to Work Place			
SECURITY OFFICERS' BOARD: Certificate courses at various levels are offered by independent institutions and instructors registered with the Board. IN-SERVICE TRAINING: Employers offer in-service training.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low

A watchman should: - be in good health; - be physically fit; - be alert; - have integrity; - be responsible and dependable; - act quickly and decisively when faced with an emergency.

Weaver			
General Information			
Description – what is this occupation?			
There are two types of weavers: hand weavers and operators of mechanised weaving machines.			
Typical Job Activities – what will I do in this occupation?			
The hand weaver weaves cloth on table or floor looms. You need to have sufficient knowledge of the weaving process to enable you to control the quality of the final product. You will work either to specific instructions in a factory-type setting or independently as an artistic weaver, creating your own designs. The weaver who operates automated weaving machines in textile factories needs to acquire expertise in operating the automated machinery. The tasks include: - observing the machine-weaving process for defects - removing defects in the cloth by cutting and pulling out filling - examining automated looms to determine the causes of stoppages - marking or cutting cloth to specified lengths and - replacing bobbins on non-automatic looms.			
Related Occupations – which occupations are more or less the same?			
- Artist - Costume designer - Fashion buyer - Fashion designer - Fashion journalist - Fashion marketer - Knitter - Pattern-maker - Sewing-machine operator - Textile designer			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
No specific requirements for the technical(FET) college courses. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Art, Mathematics			
Entry to Work Place			
IN-SERVICE TRAINING: Offered by employers.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low

A hand weaver should; - be patient and meticulous; - enjoy working with his hands; - have a creative imagination; - have a flair for and knowledge of the principles of textile design. A machine weaver should: - have manual dexterity; - have physical stamina; - be able to concentrate on a monotonous process for long periods; - have a 'quick' eye to detect weaving defects.

I can work flexible hours	I can entertain people	I can work internationally	I can determine my own income	I am very interested in a specific subject or field	I can progress in the business world	I want to be physically active
I can apply my special skills	I can communicate and interact with people	I can work on my own without interacting too much with people	I'll work fixed hours	I like to work with animals	I like to work with nature	I want to work outdoors

Wedding Consultant			
General Information			
Description – what is this occupation?			
Wedding consultants provide a service to couples planning a wedding.			
Typical Job Activities – what will I do in this occupation?			
Because it is one of the biggest days in one's life, the bride and the groom want their wedding day to be perfect. A wedding consultant helps turn their dream into a reality. Not all wedding consultants provide the same service. Most sell wedding gowns, bridal trousseau and clothing suitable for the bridal party. Some may combine services with advice on hairdos and make-up. The wedding consultant takes into consideration aspects such as colour, taste and the type of wedding, as well as wedding gifts and maintaining a gift register. Wedding consultants give advice on etiquette during rehearsals. The bride-to-be usually requests the wedding consultant to help her choose china, flowers, glassware, silverware, etc. Wedding consultants usually have many wedding magazines that brides can study for ideas. They may also be involved in the catering for the wedding, designing the colour scheme, decorating the tables, the layout of the hall or garden, flowers, etc.			
Related Occupations – which occupations are more or less the same?			
- Bridal shop owner - Magazine publisher or editor - Fashion journalist			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Entry to Work Place			
No formal training is available. A broad knowledge of clothing, catering, etc. and business sense will stand you in good stead.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A wedding consultant should: - be able to communicate well; - be able to work within a budget; - have excellent organizational skills; - be able to deal with all kinds of people; - be enthusiastic. You need to be at least 16 years old.

Welder			
General Information			
Description – what is this occupation?			
A welder plays a key role in the manufacturing process. The work varies from repair and maintenance welding to construction and fabrication.			
Typical Job Activities – what will I do in this occupation?			
The welder's skills are used in the construction and maintenance of pipelines, boilers, nuclear reactors, pressure vessels, motor cars, oil rigs and turbine castings. You have to be competent in welding many types of metal (mild steel, stainless steel or aluminium) using various processes. Recognising welding defects and being able to correct them is also part of the job. The welder must be able to identify welding electrodes and filler wire compositions and know how to store and dry electrodes and fluxes. The three most common types of welding are electric arc, resistance and gas welding. Other methods include the use of electron beams and laser beams.			
Related Occupations – which occupations are more or less the same?			
- Blacksmith - Boilermaker - Fibre weaver - Instrument maker - Lace weaver - Metal buffer - Plumber - Sheetmetal worker - Tool-, jig- and die-maker			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 9 Certificate. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Trade Theory, Welding and Metalworking, Mathematics, Physical Science			
Entry to Work Place			
APPRENTICESHIP TRAINING: If you want to become a welder you need to register with an employer providing suitable training. Training consists of theoretical and practical work: - Theoretical training: At a technical(FET) college or a correspondence course at Technisa. - Practical training: In-service training under supervision of a qualified tradesman. - Duration of course: 2 to 4 years depending on the experience of the candidate. - Final examination: A compulsory trade test set by the Department of Labour to qualify as an artisan. ADDITIONAL REQUIREMENTS: If you want to become a welder you must be at least 16 years old. NOTE: Changes in the training of artisans are subject to the official approval of the Registrar of Labour Training.			

What level of natural skill and/or aptitude do I need for this occupation?				
Exceptionally High	High	Moderate	Low	
A welder should: - be willing to conform to rigid standards of performance; - be able to produce work of high quality; - be able to concentrate; - work accurately and carefully; - be willing to keep up to date with advances in technique and equipment.

Wine Steward			
General Information			
Description – what is this occupation?			
The wine steward serves wine and drinks to clients in hotel lounges, bars and the dining rooms of restaurants.			
Typical Job Activities – what will I do in this occupation?			
The main responsibility of a wine steward is to establish what clients want to drink and to serve them accordingly. It is important that all drinks are served in the correct manner. The level of responsibility in steward duties differs from one establishment to another. In more up-market establishments, the wine steward is responsible for selecting, obtaining, storing, controlling and replenishing the stock of wines. You will also discuss wines with clients and assist them in making their selection.			
Related Occupations – which occupations are more or less the same?			
- Barman - Caterer - Food service manager - Food service supervisor - Waiter - Wine-maker			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
No specific requirements. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Mathematics, Languages, Hotelkeeping and Catering			
Entry to Work Place			
IN-SERVICE TRAINING: The wine steward learns the occupation by on-the-job training. Short courses are offered by the Hospitality Industries' Training Board. The wine steward in an up-market establishment needs to attend wine courses on a regular basis to update his product knowledge.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A wine steward should: - be friendly and have a pleasant personality; - enjoy meeting all kinds of people; - be patient, diplomatic and even-tempered; - present a neat appearance; - be able to take orders accurately; - be able to stand for hours at a time.

Wine-maker			
General Information			
Description – what is this occupation?			
A wine-maker (oenologist) is responsible for the whole wine-making process, from crushing the grapes, fermentation of the must, refining and stabilising the wine to bottling and marketing.			
Typical Job Activities – what will I do in this occupation?			
The wine-maker directs and co-ordinates all the activities of the production of wine in a winery. You will contract growers to provide grapes for processing or, if the winery is attached to a vineyard, work closely with the viticulturist (the person who cultivates the grapes) to determine whether the grapes are ready for processing into wine. The wine-maker is responsible for overseeing the testing and crushing of the grapes, for fermenting the juice, for fortifying, clarifying and ageing the wine, and for finishing the wine, which includes cooling, filtering and bottling. The wine-maker blends wines according to formulas or knowledge and experience in wine-making. Although the modern wine-maker has access to laboratory equipment to assist in blending, the sensory aspect of tasting for selection still remains a vital part of the process. Wine-making is therefore both a science and an art. The wine-maker is also responsible for introducing the wines to potential consumers by regularly presenting wine tastings, both locally and abroad.			
Related Occupations – which occupations are more or less the same?			
- Agriculturist - Barman - Beer brewing consultant - Brewing technologist - Farmer - Wine steward - Waiter			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption for the degree course. Senior Certificate for the agricultural college course. COMPULSORY SUBJECTS: Mathematics, Physical Science RECOMMENDED SUBJECTS: Biology			
Entry to Work Place			
Agricultural colleges may also provide training in this field.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A wine-maker should: - have an excellent sense of smell and taste; - have a knowledge of Chemistry and Microbiology; - be willing to work long hours; - be able to work with people.

Woodcarver			
General Information			
Description – what is this occupation?			
Although much of the work previously done by hand is now done by machine, some tasks still require the skill and ingenuity of the woodcarver.			
Typical Job Activities – what will I do in this occupation?			
A woodcarver carves beautiful images and designs into selected pieces of furniture. You will, for example, design and carve lyre-backed chairs, ball-and-claw feet for tables and chairs, ribbon-festooned aprons of tables, drawer fronts of chests, tea coasters and the like. The woodcarver marks with chalk those pieces of wood which must be cut away. You must work carefully so that you do not cut away too much wood. You will lay the article on a workbench or clamp it firmly in a bench vice and slowly cut and chisel away the wood. You will finish the article by sand papering it carefully and then you will stain or varnish it.			
Related Occupations – which occupations are more or less the same?			
- Cabinetmaker - Carpenter - Factory manager - Frame-maker - Furniture polisher - Joiner - Saw operator - Shopfitter - Upholsterer - Woodmachinist			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Grade 8 Certificate. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Trade Theory, Woodwork, Woodworking, Mathematics			

Entry to Work Place			
APPRENTICESHIP TRAINING: If you want to become a woodcarver you need to register with an employer. All costs of successful training are borne by the employer. Wage increases during the stages of apprenticeship are dependent on the progress through the system as well as entry level. Entry levels are more practical than academic. The Furniture Industry Training Board (FITB) enables the industry to provide comprehensive training to all its employees: - Theoretical and practical training: Provided by professional trainers at one of the centres of the FITB. Progress depends on the ability to "do" rather than to "know". - Duration of course: 2 to 4 years depending on the progress of the candidate in the modular system. - Final examination: A compulsory trade test at the Centre of Trade Testing at Olifantsfontein as well as accredited training centres. ADDITIONAL REQUIREMENTS: If you want to become a woodcarver you must: - be at least 16 years old; - undergo a selection test battery. ADVANCED TRAINING: The Furniture Production Unit of the FITB in Johannesburg offers the following courses: Diploma in Furniture Production: 2 year full-time course for matriculants. Certificate in Furniture Production: 3 months course for employees already in the industry. NOTE: Changes in the training of artisans are subject to the official approval of the Registrar of Labour Training. A new system of apprenticeship training will be introduced within the next few years. Each industry will make use of its own methods and time to implement the system.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A woodcarver should: - be dexterous and skilled with his hands; - be artistic and enjoy working with wood; - be careful and patient; - work accurately and neatly; - enjoy working on his own; - have good eye-hand co-ordination; - have good eyesight; - have a feeling for form and line; - be physically healthy and strong; - be able to handle heavy pieces of furniture; - be able to stand all day; - have perseverance to practise his skill until it is perfected.

Woodmachinist			
General Information			
Description – what is this occupation?			
The woodmachinist produces furniture components for the making of furniture.			
Typical Job Activities – what will I do in this occupation?			
In large furniture factories about 16 different machines are used, ranging from the simplest band-saw to the most complex computer controlled spindle moulder. The woodmachinist has to set up, adjust, operate and maintain them all. The unprepared wood is sawn into the required shapes and sizes. It is then transported to the planning machine. If the joining of wood or panels of wood is necessary, dowel pins are inserted. Details, according to design specifications, are then marked off on the wood. The next machine is then set and adjusted to obtain the required form. The wood is held firmly in place with set apparatus. Some of these tasks require special skills, whilst others are completed automatically by the machine.			
Related Occupations – which occupations are more or less the same?

Work Study Officer			
General Information			
Description – what is this occupation?			
The task of the work study officer is to give advice on organisational and work procedures in order to raise efficiency.			
Typical Job Activities – what will I do in this occupation?			
To do this you will observe the workers and work procedures to determine the amount of time and the movements needed to perform each task. You will then analyse the data and recommend changes to make the work simpler and more effective. The work study officer classifies work and develops means of measuring productivity and suggests incentive schemes. You will investigate computerisation, new filing systems and labour-saving devices. You may suggest rearranging or decreasing the number of workers, set new standards of performance and plan the most effective use of accommodation. You will present recommendations based on your research findings to management.			
Related Occupations – which occupations are more or less the same?			
- Administrative manager - Financial clerk - Management consultant - Personnel manager - Production manager			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate for a diploma course or in-service training. COMPULSORY SUBJECTS: None RECOMMENDED SUBJECTS: Mathematics			
Entry to Work Place			
IN-SERVICE TRAINING: In-service training schemes are another avenue of training, e.g. the public service offers intensive training to candidate work study officers in its employ.			
What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low

A work study officer should:

- have logical reasoning;
- have the ability to maintain good human relations under all circumstances;
- have patience and a high frustration tolerance level;
- be creative;
- be objective;
- have perseverance;
- be accurate.

Work study officers need:

- mathematical ability;
- ability to express their ideas clearly in writing and in speech.

Zoologist			
General Information			
Description – what is this occupation?			
The zoologist studies the origin, growth and development, structure, environment, classification, behaviour and life processes of animals.			
Typical Job Activities – what will I do in this occupation?			
Because this field is so broad, the zoologist usually specialises in a type of animal or animal family, or in certain aspects of animal life such as genetics or animal classification. As a zoologist, your tasks will be determined by your speciality and by your employer. You may: - study live animals in controlled or natural settings - dissect animals to study their anatomy and physiology - be involved in the identification and classification of animals - do research into the diagnosis, the prevention and the treatment of both animal and human diseases - work as a consultant or curator for a zoo, aquarium or wild life park.			
Related Occupations – which occupations are more or less the same?			
- Agronomist - Biochemist - Entomologist - Horticulturist - Microbiologist - Pathologist - Veterinarian - Virologist			
Educational Requirements - which qualifications do I need to enter this occupation?			
Exceptionally High 4-7 years University/ Technikon Studies	High 3-4 years University/ Technikon Studies	Moderate 1-3 Years FET or practical training	Low One year or less or on the job training
Entry to Tertiary or Further Studies			
Senior Certificate with matric exemption. COMPULSORY SUBJECTS: Mathematics, Physical Science RECOMMENDED SUBJECTS: Biology			
Entry to Work Place			
UNIVERSITY: BSc degree course with Zoology as a major. A student should decide beforehand in which field he wishes to specialise and choose his second major accordingly: Botany, Chemistry, Physiology, Geology, Biochemistry, Genetics, Microbiology. Post-graduate study: An honours degree or preferably a MSc or PhD degree is essential for the full professional development of the zoologist. Post-graduate studies involve a series of research projects chosen by the student in accordance with his interests. NOTE: Employers give preference to candidates with post-graduate training.			

What level of natural skill and/or aptitude do I need for this occupation?			
Exceptionally High	High	Moderate	Low
A zoologist should: - love nature and have a genuine interest in biological science; - be able to work independently or as part of a team; - be imaginative and curious; - have good judgement and problem-solving skills; - be a keen observer; - have patience and perseverance; - be accurate and have an aptitude for detail.
